HIST109301
Modern History I DELVAUX, MATTHEW C
Spring 2021
This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** History I **Prerequisites:** None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course is the first half of the History Core. Offered in the spring semester of the academic year. Fulfills the Core History I requirement.

HIST111401
The African Diaspora and the World II SUMMERS, MARTIN A
Spring 2021
This course explores the African diaspora and its relationship to the world from 1800 to the present. African diaspora refers to both the continent and the communities of African- descended people that have formed in the Americas, Asia, and Europe as the result of forced and voluntary migrations over the last five hundred years. This course examines such topics as the role of slavery in the development of capitalism; the role of black resistance in expanding concepts of freedom and equality; European imperialism in Africa; and the relationships between black freedom struggles in the Americas and anticolonial struggles in Africa.

HIST150301
Understanding Race, Gender and Violence JOHNSON, MARILYNN; MCGUFFEY, CLIFTON S
Spring 2021
This course explores pressing problems of modern race and gender-based violence across the globe, including domestic violence, youth gangs, police violence, sexual assault, and genocide. Using both historical and sociological perspectives, we will examine the roots of such violence, the ways in which it has been expressed, the meanings attached to it, and its implications for society--particularly for racial/ethnic minorities, women, and LGBT people. The lab for the course will involve students in collaborative work with local anti-violence projects and organizations in the Boston area.

HIST151301
Powering America: The Past and Future of Energy, Technology, and the Environment EBEL, JOHN E; VALENCIUS, CONEVERY B
Spring 2021
This course explores U.S. energy. From the perspectives of history, culture, technology, engineering, and foreign policy, we ask how we have created and distributed energy in the past, how energy systems function in the present, and how they may evolve. We investigate energy production, distribution, and use--coal, oil, nuclear power, hydropower, wind, and solar power-- along with cables, pipelines, and transmission systems. Through hands-on exercises and field trips, students learn how past technological and economic choices shaped current U.S. energy systems, how energy systems affect the environment, and how sustainable energy systems will be in the future.

HIST171701
Consumer Culture: Past, Present and the Fate of the Planet SCHOR, JULIET; FLEMING, ROBIN
Spring 2021
Although we are increasingly aware that our habits of consumption affect the environment, it is hard to imagine that consuming patterns are capable of being changed. In this class, students will learn that practices of consumption are both socially and historically constructed, that they change dramatically over time, and that there are (and always have been) urgent moral issues connected to practices of consumption. We will explore the global, social, and environmental dimensions of consumption, studying things like the 1897 Sears catalog, 1950s television shows, Canada Goose jackets, DIY manuals and makerspaces, and hippy cookbooks of the 1960s.

HIST172501
Who Are You? The Science of Self TONN, JENNA A
Spring 2021
How do you answer the question of who you are? Are you your body, your IQ, your race, your gender, your personality, your social roles or relationships (e.g., student, sibling), where you grew up? These courses explore the science and sociology of the self. We will examine how the modern sciences have understood the self since the nineteenth century. Scientific knowledge has been used to quantify and compare human traits and make recommendations about how best to live, work, and play. It has also been deployed to reinforce social inequalities and stigmatize minority groups. Similarly, sociologists have theorized the ways people define themselves in relation to others, sort themselves into groups and construct social boundaries, and perform their identities. Sociological thinking also examines the role of institutions (like colleges) in both reproducing and disrupting unequal outcomes for various social groups.
Course topics will include racial and sexual science, the social construction of deviant identities, the self in relation to college life, and the self in the age of social media, self-care, and quarantine.

HIST183301
Resisting and Rebelling II PICONE, MARIA DE LOS ANGEL
Spring 2021
Opening with the dramatic slave revolt that resulted in the Haitian independence, this course will examine the numerous instances of rebellion and resistance in Modern Latin America. While these terms might first bring us to struggles for state power, our readings will reveal that rebelling and resisting transcended theoretical articulations of authority in an effort to transform everyday lives. How did rebelling and resisting look like in different places? How did colonial legacies shape uprisings, and how were they resolved? How did global ideological trends, especially during the Cold War, affect resistance in Latin America?

HIST184101
Core Topics: When Worlds Collide: From Contact to the Constitution LYERLY, CYNTHIA L
Spring 2021
This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

HIST202001
Japanese Cultural Icons through Modern Times SERAPHIM, FRANZISKA
Spring 2021
This course surveys Japanese history from 1600 to the present. Each week focuses on a cultural icon that dominated public culture at the time or came to be identified as such later. Examples include the samurai warrior, the courtesan, the "men of high purpose" in the Meiji Revolution, the war general, the modern girl, the emperor, the postwar salaryman, etc. Some are anti-heroes, but all have found a firm place in Japan's cultural history. Lectures place these figures in historical context, while readings examine their cultural meanings through literature, biography, scholarly texts, visual images, and film.

HIST204301
The First Emperor and the Rise of Imperial China CHEN, YUAN J
Spring 2021
This course studies the history of early imperial China, by focusing on the short reign of the First Emperor of the Qin dynasty (221-210 BCE). Students will learn to use a variety of materials (literary, archaeological, artistic, and multimedia) and to think critically about issues including the formation of China's early imperial dynasties; early China's social, intellectual, and cultural histories; the continuity of China's bureaucratic system and authoritarian tradition; and China's relations with the outside world. The course is reading and discussion intensive.

HIST204501
A Material and Cultural History of Food in China CHEN, YUAN J
Spring 2021
This course studies historical continuity and changes of dietary traditions and culinary practices in China. We will examine how certain foods gave possibilities to and conditioned China's cultural formation and, in return, how food and ways of eating are culturally, socially, and politically constructed. The course's themes include food and religion in early China, food and Chinese medicine in the early medieval, food exchanges with central Asia, food and urbanization during the "Medieval Economic Revolution," the New World food in late imperial China, regional culinary and cultural diversities, and eating in globalized, modern China.

HIST218001
Africa Since 1850 LAL, PRIYA
Spring 2021
This course provides an overview of the recent history of sub-Saharan Africa. It begins by examining colonization and the dynamics of colonialism, then traces the development of anti- colonialism and nationalism, and concludes by surveying the trajectories of post-colonial states and societies. Throughout the semester we will think about popular experiences in addition to institutional or elite narratives, ask questions about the changing position of Africa in the world, and contemplate the stakes of conceptualizing African history in the present. Materials will include a range of academic literature, fiction and non-fiction works by African intellectuals, and visual media.

HIST220601
Roman Law and Family ESHLEMAN, KENDRA J
Spring 2021
We will look at the makeup and dynamics of the Roman household through legal sources, which allow investigation of Roman legal arguments and approaches to issues such as marriage, dowry, divorce, disciplining children, adultery, procreation, adoption, and women's rights, and the role of the pater familias. We will also observe similarities and differences between Roman family law and modern American family law. By the end of the course you will have gained a better understanding not only of the Roman family but also of how societies--including our own-
-use law to order and regulate family relationships.

HIST223001
Science before the Scientific Revolution MATUS, ZACHARY A
Spring 2021
The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre- modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.

HIST225401
A Social History of Money in the World ISMAY, PENELOPE G
Spring 2021
Money, they say, makes the world go round. But what is it? How does it acquire value? Who or what says how much it is worth? This question has been answered in very different ways throughout time and throughout the world. Even today the meaning of money varies greatly. This course will explore the meaning of money mostly in ancient, medieval, modern Europe and America but we will also explore the meaning of money in non-Western parts of the world, as well.

HIST225801
The British Empire: Its Rise and Fall RAFFERTY, OLIVER P
Spring 2021
How did a relatively small country at the edge of Europe come to acquire the largest empire in history? At its height it covered 24% of the earth's surface. How was it built up? What sustained it? What were the political, diplomatic, and military accomplishments of this empire "o'er which the sun never set?" Beginning with Colonial America this course will trace the history of the empire, and the men and women who shaped it, from the loss of the American colonies in 1781 to the handover of Hong Kong to China in 1997.

Spring 2021
This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

HIST229801
The Soviet Experiment EATON, NICOLE M
Spring 2021
This course follows the rise and fall of the world's most influential socialist experiment. Combining lectures and discussions, the course explores the nature of the socialist revolution, the rapid and brutal transformation of city and countryside, the role of terror and belief in Soviet communism, the tragedy of the Second World War and ultimate victory, the Cold War, the collapse of communist regimes in 1989, and the fate of the Soviet successor states.

HIST245201
The Secret Lives of Spies GALLAGHER, CHARLES R
Spring 2021
This course is a survey history of the U.S. Intelligence Community that is grounded in the autobiographies of America's most famous (and infamous) spies. The task is to learn American Intelligence History by reading spies in their own words. Some spies wrote to expose government censorship, others to justify their work for enemy nations, and others to assuage their own egos or bolster their bank accounts. The course will look at the ethics of spying, the operations compromised, and the way many spies have attempted to philosophically justify their actions.

HIST247601
The Cold War in the Third World JACOBS, SETH S
Spring 2021
The half-century conflict between the United States of America and the Soviet Union began in the mid- to late 1940s when the two superpowers established spheres of influence in Europe. Thereafter, unable to make much headway on the Continent, Washington and Moscow jockeyed for influence in the so-called "third world" of developing, decolonizing, and predominantly nonwhite areas in Africa, Asia, and Latin America. This course examines America's campaign to win the third world to its side, and the often tragic consequences of that effort, as U.S. policymakers frequently wound up simplifying local and regional developments, equating nationalism with communism, aligning America with unstable and unrepresentative regimes, and wedding American interests to the status quo in places experiencing massive social, political, and economic upheaval.

HIST248201
African American History II MILLER, KAREN
Spring 2021
The two-semester survey examines the history and culture of African-Americans from the pre- colonial period to the present. The first semester treats the period before the middle passage, the evolution of slave and free society, development of Black institutions, and emergence of the protest movements through the Civil War's end. During the second semester, the emphases are placed on issues of freedom and equality from Reconstruction, urban migration, civil rights struggles through current consideration of race, class, and gender conflicts.

HIST250201
Introduction to Feminisms MURPHY, ANNALYSSA G
Spring 2021

This class will introduce students to terms and concepts that ground feminist theory and gender analysis, a range of issues that intersect with gender in various ways (e.g., nationalism and post colonialism, health, labor, sexuality, race, family), and some classic texts in Women's Studies. It will also combine a brief historical overview of the development of the first, second, and third wave of women's movements, with an examination of their critiques by women of color. Finally, we will follow selected stories in the news that bear on the themes of the course.

HIST250901
Catholics and Social Justice MURPHY, THOMAS
Spring 2021
This course examines how Catholic lay involvement in the American labor movement stimulated the inauguration of the papal social encyclical tradition in 1891. It will go to describe how American Catholics both supported and opposed this tradition from the Progressive movement to the censure of Senator Joseph McCarthy in 1954. The tendency of the movement's critics to confuse Catholic social teaching with Marxist socialism will be stressed.

HIST270201
Colonial Pasts/Global Presents KENT, STACIE A
Spring 2021
While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euromerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

HIST282401
Metropolitan America: Cities and Suburbs in the Twentieth Century GLASS, MICHAEL
Spring 2021
In 1920, a majority of Americans lived in cities for the first time. By 1990, a majority lived in suburbs. These dramatic shifts influenced every facet of life, from politics to economics, labor to culture. This course surveys these transformations in metropolitan America during the twentieth century. We will examine the history of the built environment; analyze changes in housing, business, work, and consumption; follow the movement of people, capital, and ideas; and assess how various institutions shaped the fate of urban and suburban communities.

HIST282501
Sports in U.S. History MOGAN, THOMAS
Spring 2021
Noted author and professor Gerald Early once wrote, "Sports may be among the most powerful human expressions in all history." The above statement lends credence to the notion that sport has become an integral part of the social, cultural, and political fabric of the United States. An examination of sport as an important social institution reveals a number of complex social and economic issues that warrant further discussion and evaluation. This course will examine how the institution of sport has reflected broader changes in American society from a historical perspective. Special focus will be placed on the relationship of sport to race, class, and gender; issues of economics, consumerism, urbanization and the media will also be considered. As such, we will be especially concerned with the experience of certain groups and individuals that have been associated with and affected by sports throughout the history of the United States.

HIST283701
Multiculturalism in the Roman Empire THATCHER, MARK R
Spring 2021
From its beginnings as a small city-state in central Italy, Rome built a vast multicultural empire stretching across the entire Mediterranean and much of Europe. We will travel through this empire, visiting such different peoples and provinces as the Germans and the Jews, Britain and Greece. How did those people remain loyal to their origins while also becoming Roman? How did the different cultures included within the empire transform who "the Romans" were and what it meant to be Roman? How did the emperors--those larger-than-life figures like Augustus and Nero--use the diversity of the empire to craft their public images as conquerors or as...Greek actors? We'll use a combination of written sources, archaeological evidence, and even visual art to investigate these questions and to explore the ever-expanding melting pot of the Roman world.

HIST285401
Colonial Korea and its Legacies HWANG, INGU
Spring 2021
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture.
The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

HIST285501
Human Rights in East Asia HWANG, INGU
Spring 2021
This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues.

HIST312001
Study and Writing: The Arabian Nights from Baghdad to Hollywood SAJDI, DANA
Spring 2021
The seminar will examine the history of the famous Arabic popular oral romance, A Thousand and One Nights (Arabic, alf layla wa layla), from its earliest Indian roots to its passage in Iran, to its incubation in medieval Baghdad, Damascus and Cairo, to its "discovery" by Victorian gentlemen, to its consumption all the way from Hawaii to Japan, to its adaptation to music, dance, film, and painting, to its production as a play here at BC this semester! Underlying the movement of the "Arabian Nights" from a regional Arabic popular romance to world literature is the colonial project. Thus, the history of The Arabian Nights from Baghdad to Hollywood touches on a wide range of important issues, including oral and written cultures, literary transitions to modernity, gender and sexuality, Orientalism, the colonial encounter, and the post-colonial condition. Students will learn how to treat different media of representation as sources for history and to discover in these cultural products clues, myths, and testaments relating to politics, society, and economy.

HIST348101
Study and Writing: The Segregated Metropolis GLASS, MICHAEL
Spring 2021
This course explores the fundamentals of the historian's craft through a close examination of race, real estate, and public policy in the twentieth-century United States. We will discuss the historical literature dealing with segregation and inequality in metropolitan America. For independent research, we will analyze the "redlining" maps created by federal officials during the 1930s, read testimony from people in the aftermath of urban uprisings in the 1960s, and examine newspapers, census data, and other primary sources. As the culminating assignment, students will write a research paper analyzing a city and topic of their choice.

HIST350201
Study and Writing: Jesuits and Indians STANWOOD, OWEN C
Spring 2021
This Study and Writing Course follows French Jesuit missionaries in their voyages around North America in the seventeenth and eighteenth centuries. Our topic will be less the Jesuits themselves than the world they encountered--and wrote about, in great detail, in a set of sources known as the Jesuit Relations. The Relations tell us not just about Jesuits, but about the Indians they attempted to convert, about French and English colonial societies, and about the North American environment. Students will use these rich sources to conduct their own original research.

HIST402101
Korean War: Conflict, Security, and Peace HWANG, INGU
Spring 2021
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace.

HIST404801
Modern Girls: The Woman Question in Twentieth Century China MO, YAJUN
Spring 2021
How have the Chinese defined what it means to be a proper "man" or a "woman"? How have these gender norms and ideologies shaped the life experiences and self-perceptions of individual men and women in modern China? How have they shaped Chinese social, political, economic, and cultural institutions? We will explore these questions by focusing primarily on Chinese women's lives--and the changes in shared social ideas about what women should do and be--from the mid-nineteenth century to the present. The central question animating the course is this: when we foreground gender as a category of analysis, how does history look different?

HIST412301
Gender, Sexuality, and Power in the Ottoman and British Empires SHLALA, ELIZABETH H
Spring 2021
In this course, we will utilize the concept of gender as an analytical tool within the history of empires. We will cover gender theory, the construction of gender identity (male and female), sexuality, power, politics, and culture. To understand how gender functioned within empire, we will undertake a comparative analysis of two of the greatest empires in the world--the Ottoman Empire and the British Empire. We will investigate the ways that race, religion, and class shape women's and gender imperial history.

HIST413001
Islam and Christendom: Renaissance to Revolution,1400-1800 BRAUDE, BENJAMIN
Spring 2021
Despite the assumption of an abiding abyss between Islam and the so-called West, the civilizations of Christendom and the Islamic world have developed paradoxically in close albeit, at times, conflicting parallel. This was particularly true in the Mediterranean world during the early modern period. This course demonstrates that the major historical developments from this period such as the Renaissance, Exploration, Expansion, Exploitation, the Reformations, state-building, and the Enlightenment can best be understood if they are set in the widest cultural context. It concentrates on how the intertwining of Christians, Muslims, and Jews shaped this era.

HIST413401
The Ottoman Empire, 1300-1924 BRAUDE, BENJAMIN
Spring 2021
The Ottoman Turks founded an empire spanning the three continents of the eastern hemisphere and enduring for nearly three-quarters of a millennium. Despite nomadic origins they established a stable political structure, which grafted the high traditions of Islamic culture onto an ethnically, linguistically, and religiously diverse society. This course explores the evolution of this remarkable enterprise from its origins on the frontiers of Byzantium and Islam through its heyday under Suleyman the Magnificent to its military decline and first steps toward reform.

HIST419001
Decolonization and the Cold War in Africa LAL, PRIYA
Spring 2021
After decades of organizing and protest, African colonies began to gain independence from imperial rule in the late 1950s. Newly sovereign nation-states were born into a turbulent Cold War world, which both provided unprecedented opportunities for political experimentation and posed significant threats to young Third World countries. Caught in the middle of geopolitical contests between Western and communist powers, Africans strove to navigate these complex global dynamics while forging nation-building programs and continuing to support ongoing liberation struggles. This course reflects upon this era of political upheaval and transformation, focusing on case studies from across sub-Saharan Africa.

HIST420201
The Culture of Athenian Democracy HOFFMAN, GAIL L
Spring 2021
A political and cultural history of Athens during the creation and height of its democracy (circa 480-400 B.C.E.). The course will consider the Persian Wars and their effect on political and constitutional developments in Athens, the workings of the Athenian Democracy under Pericles, and the eventual collapse following the Peloponnesian War. Readings in translation include Thucydides, Plutarch, Aristotle, Xenophon, Plato, and the Greek playwrights (Aeschylus, Sophocles, Euripides, and Aristophanes). Emphasis will be on integrating historical, literary, and archaeological evidence to provide as complete a picture as possible of this dynamic period of ancient history.

HIST422601
Protest and Revolt in the Early Modern World REINBURG, VIRGINIA
Spring 2021
This course explores forms of resistance to public authority in the early modern world (c. 1550- 1800), in Britain, France, and their American and Caribbean empires. State power in this era was authoritarian and anti-democratic. So protests and revolts were dialogues about power: how it was held, how it could be challenged, how it ought to be used. We will study religious riots, grain riots, tax revolts, anti-monarchical rebellions, and slave revolts, and try to understand how groups fought for their rights and tried to make ■ better world. Also included will be forms of everyday subversion under hierarchical and racist regimes.

HIST423301

Renaissance Women
ROSS, SARAH; LEONE, STEPHANIE
Spring 2021
This course examines the myriad forms of excellence women achieved during the Italian Renaissance (1400-1600). Even as Renaissance women labored as wives, mothers, nuns, and servants, they also created notable works of literature and art; patronized major projects; held jobs in the urban trades; shaped religious belief and practice; and even governed states. We will examine the work that Renaissance women did beyond "women's work," and analyze the conditions that shaped their professional no less than their personal lives. Our evidence encompasses both textual and material artifacts, including extraordinary objects housed at the MFA and other local repositories.

HIST426801
Socialist Techno-Utopias EATON, NICOLE M
Spring 2021
In the decades following the Russian Revolution, the Soviet state attempted to transform human society and the human species to bring about utopia. Soviet and other socialist scientists carried out numerous experiments in visionary biology, studying reproduction, immunity, and heredity in order to build proletarian new men and women; others sought to breed tame foxes, grow crops in winter, or explore the cosmos. This course explores socialist utopian visions through the social and cultural history of the experiments and their ideological and geopolitical underpinnings. The course focuses especially on their representations in film and fiction.

HIST427401
Eighteenth-Century Ireland O'NEILL, KEVIN
Spring 2021
Ireland experienced dramatic and often violent social, economic, and political changes as its place within the British political system and Atlantic culture emerged. These global changes coincided both with the emergence of a vibrant colonial culture represented by figures such as Jonathan Swift, Richard Brinsley Sheridan, and Edmund Burke, and a persistent indigenous culture, outside the view of Anglo culture. This course will explore the interaction of Anglo and Gaelic Irish and the major historical events of the period: the emergence of the Penal system, colonial nationalism, republicanism, the Revolution of 1798, and the Act of Union.

HIST428101
Film, Media, and Modern Ireland SAVAGE, ROBERT J
Spring 2021
This course will use a variety of sources, including feature and documentary film, to address the transformation of twentieth century Irish society. Students will work with an array of primary and secondary sources to consider how the development of an indigenous film industry and an electronic media challenged and ultimately undermined a conservative political, cultural, and religious consensus that dominated life in post-independence Ireland.

HIST429101
War Crimes Trials PENDAS, DEVIN O
Spring 2021
The twentieth century has proven to be one of the most murderous in human history. The massive and in many ways unprecedented use of systematic atrocities in this century have provoked an equally unprecedented response--so-called war crimes trials. In reality, this tem covers a broad range of legal responses to systematic mass atrocity international trials, domestic trials, and truth and reconciliation commissions. We will consider examples of all of these and the advantages and disadvantages of each approach before concluding with ■ general consideration of the limits and possibilities of the law in confronting such enormous crimes.

HIST429501
The End of History CRONIN, JAMES
Spring 2021
The ending of the Cold War and the collapse of socialism prompted a lively and intense debate about "the end of history." This course will investigate how such a strange notion could have arisen and attracted such serious attention, and whether this debate has any continuing effect on historical understanding and interpretation. More specifically, does it retain any useful meaning more than a decade after the end of the Cold War and in the aftermath of September 11? Major events that led to the idea will provide perspectives with which to assess its relevance to the post-Cold War world.

HIST437101
The Inquisition in Spain and Spanish America SELLERS-GARCIA, SYLVIA M
Spring 2021
This lecture and discussion course for advanced students will consider the development of the Spanish Inquisition from its medieval roots to its early nineteenth century demise. Divided roughly between Spain and the Americas, we will consider the following topics: the medieval co- existence of Jews, Muslims, and Christians in Spain; the "re-conquest" of the Iberian peninsula in the fifteenth century and the formation of the inquisition; the theological debates of the sixteenth century that determined the scope of heresy. Our focus will be on using the Inquisition as an insight into early modern culture in both Spain and the Americas.

HIST440601
When France Ruled the World STANWOOD, OWEN C
Spring 2021
This course will examine the French experience in the Atlantic world from the sixteenth century through the Age of Revolution. We will examine the first attempts to explore and colonize the Americas, both north and south, the establishment of colonies in Canada and Louisiana, and the development of the slave trade and plantation colonies in the Caribbean. We will end with an examination of the global consequences of the French Revolution, especially in the establishment of the Republic of Haiti, the second independent nation in the western hemisphere.

HIST444201
A Nation of Immigrants? U.S. Immigration History since 1924 OH, ARISSA H
Spring 2021
This is the second half of a two-semester lecture course on American immigration. The first half covers the period up to 1924 and the second from 1924 to the present. Each half can be taken independently of the other. This semester we examine the history of Irish, Italian, Jewish, Latino, and Asian Americans since the Immigration Restriction Act of 1924, with particular attention to the overseas origins of migration; patterns of settlement and mobility; questions of ethnicity, race, labor, and class; anti-immigrant sentiment; and government policy. Note: Registration not open to Freshmen

HIST448301
African American Life Stories MILLER, KAREN
Spring 2021
A recurring theme in African American life histories is the narration of the moment when the black subject or author first becomes aware of himself/herself as a racial being in a society in which blackness has meaning. This course examines how these kinds of moments shaped individual perspectives of personal and racial identity and uses narratives and autobiographies to analyze how meanings of blackness are shaped by region, class, gender, sexuality, and historical context.

HIST449401
Enemy Aliens, Alien Friends: Asian Americans and U.S. Wars OH, ARISSA H
Spring 2021
Wars have been central to the relationship between the United States and Asia and to the history of Asian Americans. This course explores the ways in which twentieth century American wars, in Asia and elsewhere, have transformed migrations between Asia and the U.S. as well as war's impact on Asian Americans, social, economic, political, and cultural life. Rather than emphasizing geopolitics, we will focus on themes of migration, citizenship and U.S. imperialism, nationalism, and transnationalism. The broad scope of this course will also allow us to examine such concepts as race, gender, national identity, power, and cultural representations.

HIST449701
Terrorism in America GALLAGHER, CHARLES R
Spring 2021
The aim of this course is to show how terror and violence have affected the United States from the late nineteenth century up to 9/11 and through the current U.S. military operations in Iraq and Afghanistan. It aims to show that while differing in scope and human loss, the latter events, including the so-called Global War on Terror, have certain antecedents in the U.S. experience. The course will concentrate on the theme of terror, both domestic and foreign, and examine the government response to terror and subversive groups aiming to overthrow the government or inflict harm upon its citizens.

HIST460101
Capstone: Boston College/Your Life BURNS, JOHN J
Spring 2021
This seminar will focus on the historical development of Boston College and the continually evolving interaction between its traditions and its students. Students will do archival research on some aspect of Boston College in which they have a personal interest and will record oral histories with faculty, administrators, and alumni who can describe the ambiance and personalities of different periods that have shaped the modern university. All students will write a series of reflective essays on their experience with Boston College traditions and the impact it has had on their own personal views of themselves, their pasts, and their futures.

HIST470201
Feast or Famine? Food and the Environment O'NEILL, KEVIN
Spring 2021
Through most of history the primary quest of humans has been to obtain sufficient food for survival. This course will explore the evolving relationships between that quest and the environment. Topics will include: climate change, the domestication of plants and animals, the development of settled agricultural societies, the Columbian exchange of biota, plantation and state sponsored agriculture, and the emergence of agro-business. We will explore the role of both individual crops/commodities such as sugar, chocolate, cod, corn, and the potato, and the environmental systems of which they were part.

HIST482301
Ireland at War in the Twentieth Century RAFFERTY, OLIVER P
Spring 2021
Twentieth-century Ireland seemed a country imbued with violence. This was not simply because of the Easter Rising of 1916 and the War of Independence, 1919-21. The warlike propensities of the Irish had already been demonstrated by Irish involvement in the Boer War 1899-1902. These events set the parameters of what happened in Ireland in the rest of the century and included such things as the Civil War 1922-23, the activity of the Irish Republican Army (IRA) in the 1930s, 40, and 50s. Ireland's participation in both world wars and the violence of The Troubles 1969-98 will also be examined.

HIST486701
Modernity and Tradition in Interwar Ireland MCGARRY, FEARGHAL
Spring 2021
This module explores Irish developments within an inter-war European context. Both Irish and European society were as characterized by cultural unease as the impact of the Great War, post- war revolutions, radical statist ideologies, and technological innovations were seen to undermine tradition. Focusing on topics such as gender, morality, sexuality, popular culture, and the role of the state, this course will investigate how Irish society was preoccupied by anxieties about modernity, and how these concerns shaped the Irish state's construction of Irish national identity at home and abroad.

HIST519301
Senior Colloquium: Hungry Planet PARTHASARATHI, PRASANNAN
Spring 2021
The history of food is a window into many dimensions of the human past and can tell us about economic life, social relations, and political power. This course will draw upon examples from around the world to understand how food systems have evolved in the modern period and the consequences of contemporary food practices. Topics to be covered will include the moral economy, famine, national cuisines, sugar, the green revolution, fast food, and climate change. Readings will be supplemented with films and eating challenges.
Credits: 03
Room and Schedule: M 3-5 25;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** Senior History Major Standing. **Corequisites:** None
Cross-listed with: None
Frequency: Periodically
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

HIST529001
Senior Colloquium: Reagan and Thatcher: Together Against the World CRONIN, JAMES
Spring 2021
Margaret Thatcher came to office in May, 1979; Ronald Reagan in January 1981. They each confronted serious crises at home and abroad. The two leaders shared a similar vision of the world: a strong belief in the market and an equally intense anti-communism. On both counts they represented a break with the prevailing consensus and had to fight hard for their ideas. Their alliance and friendship was a major resource in winning or losing the battles they chose. The course will provide an opportunity for students to examine the context in which these two leaders came to office, their ideas, and their relationship.

HIST546201
Senior Colloquium: Racism in U.S. History LYERLY, CYNTHIA L
Spring 2021
This course is an in-depth exploration of racism in U.S. history. It will examine books and readings that focus on events and policies of racial violence, oppression, and discrimination against people of color in the United States. Students will write final papers on a thematically related racist event or policy that is not covered in the class readings.

Status: CANCELLED

HIST549301
Senior Colloquium: Capitalism Around the World KENT, STACIE A
Spring 2021
In this colloquium we will survey histories of capitalism (roughly 1600 to the present) from a variety of geographical sites, focusing on issues of race, exploitation, desire, global-integration, time, and the environment. We will read monographs that exemplify a range of methodological approaches to understanding capitalism as a complex historical phenomenon with social, political, ecological, and subjective dimensions. This is not an economic history course, though we will at times attend to capitalism's internal dynamics. Students will develop a portfolio of written summaries that will provide the foundation for a final critical literature review.

HIST730301
Colloquium: Gender History and the Scholar's Craft Today ROSS, SARAH
Spring 2021
Familiarity with the issues and concepts of gender history constitutes essential preparation for graduate students entering the historical profession today. This course offers an introduction to the theories, methods and sources of gender history. Engaging scholarship from the 1980s to the present, we will examine gender history's divergence from social and women's history, convergence with post-structuralism and the linguistic turn and impact upon new lines of inquiry the history of sexuality, transnational and global history. The final component of the course is a tailored practicum: students will assess recent applications of gender analysis in their own research field.

HIST822101
Graduate Seminar: U.S. since 1900 SUMMERS, MARTIN A
Spring 2021
This seminar will explore selected topics in the political, social, and cultural history of the United States in the twentieth century. We will also investigate the types of sources, archives, and methodologies employed by twentieth century historians. Over the course of the semester, students will pursue in-depth research projects on a topic of their choosing using extensive primary and secondary source materials. The final product should be a substantial scholarly paper suitable for presentation at a professional conference or submission for publication in a scholarly journal.

Honors Program Courses: Fall 2020

HONR330401
Honors Seminar: Twentieth Century Traditions COHEN, MARTIN
Fall 2020
This is a continuation of the Western Cultural Tradition course into the twentieth century, and it is required of all Honors Program juniors. The course describes what happened to the tradition in the twentieth century, how it got criticized and rethought, and how it absorbed new forms of knowledge and new points of view. The first

semester deals with the period up to World War II and focuses on both the excitement engendered by the cultural movement called Modernism and the darker forces that accompanied it. The second semester of this course deals with the key cultural issues of the latter half of the century, especially those grouped under the heading of Postmodernity. Here the focus will be on the fundamental critique of the tradition posed by post-structuralist cultural theories, feminism, deconstructionism, the communications revolution, changing views of non-Western cultures, and new perspectives centering on race, ethnicity, and gender. The crucial question to be addressed is whether, and on what terms, it is possible to construct a reliable identity and an adequate basis for moral choice and political action.

HONR493301
Autobiographical Novel/Memoir
MICHALCZYK, SUSAN A
Fall 2020
This seminar will focus upon the genre of autobiography, its origins and evolution and the resulting variations that have emerged from the traditional concept, as established with Augustine's *Confessions*. Moving from the fundamentals of the genre, as defined in Gusdorf's essay on the pact between author and reader, our pattern will be a comparative study of texts such as Bronte's *Wuthering Heights*, Svevo's *The Conscience of Zeno*, Goethe's *Sorrows of Young Werther* and Akhmatova's *Requiem* as well as more contemporary texts including Dubus and Munro. In addition to careful analysis of selected texts, we will explore Olney's essays on autobiography.

HONR495401
Through the Mirror of the Western Cultural Tradition EPSTEIN, THOMAS
Fall 2020
This Senior Seminar will explore the challenge, problem, and opportunity presented by the Other in the modern Western Cultural Tradition. Beginning with Daniel Defoe's epochal self- affirmation of modern Western Man, Robinson Crusoe, we will follow with two masterpieces of contemporary fiction that treat the same 'myth' (Coetzee's "Foe" and Tournier's "Friday"). Next we'll sample Flannery O'Connor's work, itself imbued with questions of self and other, and essays by Emmanuel Levinas. Finally a series of brief novels on our theme (from Dostoevsky, Kerouac, Camus, and Daoud) before ending with Claudia Rankine's book of poems, An American Lyric.

HONR498001
The Cost of Free Speech BAYLES, MARTHA
Fall 2020
The course will focus on the challenge of preserving the Western ideal of free speech in a world where democratic governments seem paralyzed by political and cultural polarization; powerful tech companies have become unwilling content regulators; and authoritarian regimes deploy digital technology for surveillance, censorship, and propaganda. The goal is to help students situate the classic debate over free speech in both the contemporary landscape and the broader historical context.

HONR493201
Americans, Ugly and Beautiful BAYLES, MARTHA
Spring 2021
This course is not about "hard power," meaning coercive military or economic action. Instead, it is about "soft power," meaning attraction, persuasion, the power of example. Despite today's decline, America's image and influence still permeate the world, conveyed through every media platform and taking such different forms as news reports, entertainment, face-to-face interactions, and "public diplomacy" (government efforts to cultivate goodwill among overseas populations). How did these different modes of communication work in the past? How should they work today? What messages should the people of the United States be sending to the 95 percent of humanity who are not American? What messages are we in fact sending? These questions will be explored historically, thematically, and by region.

HONR493401
Dante: Reflecting on Our Journey MICHALCZYK, SUSAN A
Spring 2021
The primary text will be Dante's *Commedia: Inferno, Purgatorio, Paradiso*, translated by Hollander. With the understanding that most Honors Program students have had some experience reading Dante's epic poem as freshmen, the seminar will be based upon the text while addressing broader topics such as government, religion, poetry, history and the like. There may be greater exploration of politics, philosophy, psychology, science, social structure within the context of medieval Florence, supported by additional texts, such as the *Vita Nuova, De Monarchia* (Dante's works) and other works by various poets, religious figures from classical times through medieval including contemporary interpretations.

ITAL100307
Elementary Italian I O'CONNOR, BRIAN R
Fall 2020
The purpose of this course is to introduce the students to Italian language and culture. In the first semester students will learn the Italian sound system and the rudiments of vocabulary and grammar necessary for basic communication. While memorization and mechanical practice are required, the greater part of class time will be dedicated to practicing acquired knowledge in a conversational and contextualized atmosphere.

Elective for major and minor in Italian. Satisfies Foreign Language Proficiency core requirement.
Status: OPEN

ITAL337301
Love, Sexuality, and Gender MORMANDO, FRANCO A
Fall 2020
This course explores the modern conception of "romantic love" by examining its birth and development in prominent literary works (by men and women) of the Middle Ages and Renaissance. We will also investigate allied notions of sexuality, gender, and marriage, in both a heterosexual and same-sex ("homosexual") context. For contrast and comparison, the course begins with a study of the Bible and ancient Greek and Roman texts and ends with a look at the depiction of our themes in contemporary cinema as well as a discussion of the current debate in American society over the nature and purpose of marriage.
Credits: 03
Room and Schedule: T TH 12*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Literature
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: Conducted entirely in English. Elective for Italian major and minor.
Status: OPEN

ITAL551501
I Racconti delle Donne/Short Stories by Women SHEPARD, LAURIE
Fall 2020
How do women narrate the complexity of the lives they lead? Is the woman's voice distinctive in literature? We will read a series of short stories written in the twentieth and twenty-first centuries, almost all by Italian writers, and focus on common themes including women's identity, self-empowerment and the evolution of feminist ideas, and aesthetic questions like the author's distinctive use of language. The second objective of the course is to improve the Italian reading, writing, and speaking skills of all class members. Course conducted in Italian.
Credits: 03
Room and Schedule: T TH 10 30*;ONLINE;SYNCHRONOUS;

ITAL881001
Lyric Poetry from Giacomo da Lentini to Petrarca SHEPARD, LAURIE
Fall 2020
This seminar will survey Italian lyric poetry, the most dynamic and prestigious genre of the medieval period in which the literary language was being formulated. The course will cover the development of lyric poetry from the thirteenth-century Scuola Siciliana to the sixteenth-century petrarchisti, but the principal focus of the course is the *Canzoniere* of Francesco Petrarca.
Discussions will include orality and manuscript/print transmission of poetry, the complex
relation of the individual poet to the tradition, the theory of imitation, and literary Neoplatonism.

ITAL885501
Italian Authorial Cinema ACETOSO, MATTIA
Fall 2020
This course will offer graduate students the opportunity to explore directors, films, and movements of Italian cinema from Postwar to the New Millennium. A central focus will be the definition of authorship in the study of Italian cinema. From Neorealism to Comedy "Italian Style," from the art films of the 1960s to contemporary experimentation, Italian directors have shaped the Italian cinematic universe and consolidated its relevance worldwide. The ultimate goal is to provide graduate students with the critical tools to analyze cinema and acquire methods for both teaching and writing on this subject.

Italian Courses: Spring 2021

ITAL100401
Elementary Italian II HANDEN, RUMI C
Spring 2021
This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given this to the production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL232101
Parma as a Microcosm of European History DACCI, ELISABETTA
Spring 2021
The goal of this course is to introduce students to the main phases of the history of Parma in the general context of the Italian and European History. Main topics to be discussed in a chronological order: the features of Parma as typical Roman colony; the agricultural production of Roman Parma: what's typical of the Po Valley and what's distinctive of Parma; the role of the bishops in Parma and in the Italian and European cities after the collapse of the Western Roman Empire; the political evolution of the Communes in North/Central Italy and Central Europe: a model confirmed by the case of Parma; the warfare against the emperor: the defeat of Frederick II in Parma (1248); the struggle for the power between the noble families during the Middle Ages; the intervention of the famous Italian noble families in the political situation of Parma: the Visconti, the Sforza and the Farnese; the intervention of Charles V: the marriage between his daughter Margaret (Margherita) and the Duke Ottavio and the war of Parma; Italy and the Duchy of Parma as pawns on the international checkerboard: the Bourbons, Napoleon, and the Hapsburgs; the cultural improvements in Parma during the Bourbons; Europe and Italy after the Vienna congress: Maria Luigia of Hapsburgs: from Napoleon's wife to beloved Duchess. Course to be taught by Director of Boston College Italia, Prof. Elisabetta Dacci.

ITAL881701
Literature of Migration SHEPARD, LAURIE
Spring 2021
The course examines questions of identity in contemporary Italy through the lens of novels, short stories, and poems by first or second generation Italians. It focuses on the way in which patterns of migration have raised new questions about gender equality, and more generally on questions of the evolving Italian imaginary. The course also explores the importance of Italy's colonial past to the understanding contemporary migration. The reading list includes Cristina Ali Farah, Gabriella Ghermandi, Pap Khouma, Gabriella Kuruvilla, Amara Lakhous, Mihai Mircea Butcovan, Ingy Mubiayi, Igiaba Scego, Segen, Younis Tawfike, and Laila Wadia.

ITAL883001
Bernini and the Baroque MORMANDO, FRANCO A
Spring 2021
An interdisciplinary study of the art, literature and culture of the Baroque age (ca. 1600-1680), focusing on its epicenter, the city of Rome, and on the one artist who more than any other defined and disseminated that style, Gian Lorenzo Bernni. Against the backdrop of the political and institutional crises and social-religious metamorphoses of the period, we will explore the fertile and intimate inter-relationship between the arts (sculpture, architecture, theater, music) and the other forms of cultural expression.

Food, Power, and Politics NAKAZATO, HIROSHI
Summer 2020
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

International Studies Courses: Fall 2020

INTL122101
Reflections on Being Abroad GOZIK, NICK J
Fall 2020
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.
Credits: 02
Room and Schedule: BY ARRANGEMENT;ONLINE COURSE;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: Open to students studying abroad during the current semester.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified (students must be studying at a BC sponsored program). OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.

INTL220001
Where on Earth: Foundations in Global History SERAPHIM, FRANZISKA
Fall 2020
Where on Earth...? invites beginning International Studies majors to explore methodologies of thinking globally and historically. A critical geographical perspective on the spatial organization of the world at different scales is crucial to any understanding of what we refer to as "international" or "global." This means tracing the history of social and global inequalities as deeply embedded in processes of modernity, empire, and capitalism, with dire ecological consequences. The meaning of "place" as relationally constituted and therefore subject to change and contestation forms an important building block of our investigations.

The Global Internet: Politics, Power and Digital Communication SIENKIEWICZ, MATTHEW S
Fall 2020
This course offers a critical look at the history of the Internet and the ways in which online communication technologies are shaping our world. Merging conceptual approaches from the disciplines of cultural studies, globalization theory and international relations, the class will consider the role that new media is playing in shaping the art, entertainment, politics and economics of the new century. Case studies will include close looks at websites such Twitter, Facebook, World of Warcraft, Match.com and Alibaba.com, as well as considerations of social movements such as Occupy Wall St. and the Arab Spring.

Development Economics
JOGLEKAR, DEEPAK
Fall 2020
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.

INTL231001
The U.S. Intelligence Community in the Trump Era CARLE, GLENN L
Fall 2020
What has been the shape and mission of the U.S. Intelligence Community since 9/11, and what will it confront in the Trump era and beyond? Terrorism has defined the U.S. Intelligence Community for twenty years. Now, an irredentist Russia, the explosion of cyber threats, a rising China, and persisting concerns about nuclear proliferation will all challenge the U.S. Intelligence Community, as the Pax Americana recedes and as Donald Trump engages in an historic retreat of the United States from its role as driver of multilateral norms--and undermines the credibility of the Intelligence Community itself. This courses will examine how the U.S. Intelligence Community's mission and structures have changed to meet national security threats, and the challenges it will face during the Trump administration and beyond.

Transitions in Europe: The Comparative Politics of Identity, Populism, and Migration MOLLES, ELITSA V
Fall 2020
Have all European polities and societies become liberal after post-communist transitions? How have populist parties across the Continent transformed discourses, politics, and individual identities? How do race and exclusion of ethnic, religious, or other minorities figure into Europeans' everyday lives? How has migration uprooted social realities across Europe? The course will answer these questions and more through the lens of identity politics. It will trace and analyze the multiple transformations in Western and Eastern European politics and societies in the contemporary period, through a mix of theoretical texts, current case studies, and non-academic sources.

Comparative Constitutional Law: Latin America MACCLURE BRINTRUP, LUCAS
Fall 2020
This course explores how constitutions protect human rights and shape political power in Latin America. It examines the constitutional law and history of Brazil, Chile, Colombia, Mexico, and Venezuela while comparing them with the American constitutional system. Additional cases may be studied in light of student interest. Topics covered include (1) the making and amendment of constitutions, (2) elections, (3) authoritarianism and the rise of populist leaders, (4) executive power and its relationship to legislatures, (5) federalism, (6) the judiciary, and (7) constitutional rights, including freedom of speech, rights to life and sexual autonomy, data privacy, and socio- economic rights.

INTL262501
Religion and Contemporary Terrorism MCBRIDE, MEGAN K
Fall 2020
Since 9/11 there has been a radical increase in attention to what is casually referred to as religious terrorism. In most cases, the phrase is used to refer to the Islamist terrorism of non- state actors (e.g., Al Qaeda, ISIS, and Boko Haram), but there are other cases (e.g., Anders Breivik's counterjihad violence and Hezbollah's anti-Israeli violence) that might also fit the label. This course examines the relationship between religion and contemporary terrorism by looking at a wide variety of cases and asking: Why do we describe some terrorism as religious? How can we meaningfully separate religious terrorism from secular terrorism? Does it matter if we do so? How do stereotypes about religion and race influence our understanding of these movements and events? And do we even need to talk about religion in order to understand these cases?

Colonial Korea and its Legacies HWANG, INGU
Fall 2020
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture.
The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

Industrialization and Democratization in Korea HWANG, INGU
Fall 2020
This introductory course surveys the political and economic transformation of South Korea from decolonization through the high growth era to today's global neo-liberal age. It traces how a
war-ravaged country became a prosperous and industrialized nation. In exploring this transformation, it also examines the relationship between Korea's industrialization and its democratization: How did U.S. Cold War modernization impact the Korean state's economic strategy and it's political development? Why and how did Korean society campaign for social and political justice during the economic high growth era? The course also considers the reconfiguration of South Korea's political economy since the 1990s.

INTL287501
Development and Social Justice in Korea HWANG, INGU
Fall 2020
This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations.

Bodies Politic WILLARD, MARA E
Fall 2020
By approaching power politics through a series of studies of lived experience around the globe, this course for students in the international studies major resets modern renditions of international relations. We begin with close studies of specific human worlds, using historical fiction and films to gain textured appreciation of particularities of the demands of religions and cultures around the globe. From close studies of "private" worlds, and themes of coming-of-age, partnering, and parenting, students will consider how some lives are burdened more heavily by the weights of social, political, and economic governance. Students will learn to parse the ethical challenges and connections between ideals for human thriving and ethics of the rule of law, state sovereignty, international borders, and military intervention. Completion of Core requirements in philosophy and comfort with English-language reading and writing encouraged for enrollment.

International Law NAKAZATO, HIROSHI
Fall 2020
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

Research Methods in Political Science KRAUSE, PETER J
Fall 2020
Rigorous, systematic research methods are at the foundation of quality scholarship for undergraduates and professors alike. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in archival research, interviews, surveys, case studies, lab experiments, participant observation, and statistical analysis. The course will focus on applied methods using scholarship and examples from history, international studies, political science, psychology, and sociology. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills.

International Studies Courses: Spring 2021

INTL122101
Reflections on Being Abroad GOZIK, NICK J
Spring 2021
This on-line course is designed for students of all majors who are currently abroad and are committed to reflecting more deeply on their study abroad experience. The course permits students to consider where they are in life, what they hope to gain from their time abroad, and how their current experiences may shape their future personal, academic, and professional trajectories. The course also trains students to observe and document the culture(s) in which they are studying, and in turn to produce an interactive, mixed media presentation, which captures one aspect of their host setting. From the course, students will gain valuable insight and skills which will benefit them well beyond their study abroad experience.
Credits: 02
Room and Schedule: BY ARRANGEMENT;ONLINE COURSE;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: Open to students studying abroad during the current semester.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Students wishing to take this course should contact the Office of International Programs. OIP will register students later in the semester once abroad status has been verified (students must be studying at a BC sponsored program). OIP will keep a spreadsheet of students who wish to take this course. Once a student's abroad status has been verified, he or she will be notified if they have been granted a spot in the course.
Status: OPEN

INTL220801
Meaningful Maps: Making Sense of the World Map GRANT, ANDREW N
Spring 2021
This bi-weekly one-credit course would be offered every semester for juniors or seniors. It has the goal of increasing map literacy so that students can quickly frame global problems by referring to legacies of colonization, settlement, nationalism, language, religion, and environment insofar as they can be reflected in world regions. Prerequisites are Where on Earth OR Intro to IR, which together establish a strong and critical understanding of both the state system and border-spanning historical and geographic connectivities. They provide an excellent basis for approaching world regional maps. Restricted to Int'l Studies Juniors and Seniors.
Credits: 01
Room and Schedule: CARNEY HALL 005,TH 4 30-6 50;BIWEEKLY;
Satisfies Core Requirement: None
Prerequisites: INTL2200 AND INTL2501. Prerequisites are Where on Earth and Intro to IR.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT **Comments:** Restricted to IS juniors and seniors. **Status:** OPEN

INTL222001
Explorations in Peace and Security Studies NAKAZATO, HIROSHI
Spring 2021
This course reviews a wide range of theories exploring the causes of conflict, possibilities for the pursuit of peace, and the role of justice in both. Drawing on a wide range of disciplines, it offers an introduction to diverse approaches that can be used to understand peace and conflict.
Thematic topics include the ethics of violence and nonviolence; individuals and conflict; social groups and conflict; rationality and conflict; plus peace and justice in theory and practice.

Development Economics JOGLEKAR, DEEPAK
Spring 2021
This course considers what we know about developing countries, and applies economic theory to help us understand the constraints of poverty. We will describe the economies of less developed countries and the lives of the poor, focusing on changes in poverty, inequality, demography, and health. We will consider theories and evidence for why some countries are rich and others poor. We will examine how land, labor, and credit markets function in poor countries and communities, and the consequences for health, education, and child labor. We will consider migration and its consequences and will discuss aid and international institutions.
Credits: 03
Room and Schedule: DEVLIN HALL 008,T TH 1 30*; **Satisfies Core Requirement:** Cultural Diversity **Prerequisites:** ECON1131, ECON1132, and ECON1151 **Corequisites:** None

INTL253101
Politics of Energy and Climate in the U.S. and International Perspective DEESE, DAVID A
Spring 2021
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

INTL254001
Political Geography and Geopolitics GRANT, ANDREW N
Spring 2021
This course provides an understanding of the fields of political geography and geopolitics, which are the study of how politics organizes space and how space influence politics. We will discuss key political geographic concepts including territory, sovereignty, borders, and place, and their history and changing relevance in the face of capitalist globalization and the transition from empires to nation-states. We will also explore three major facets of geopolitics: classic geopolitics, critical geopolitics, and urban geopolitics and their relevance in the contemporary world. Finally, we will explore geographies of peace and conflict and the rise of non-state actors and non-state sovereignty.

INTL263001
Religion, Race, and Political Violence MCBRIDE, MEGAN K
Spring 2021
The terms religion, race, and political violence are largely understood to be constructed and contested. There is no single definition for any of them, and so there is no single relationship that binds them together. However, there is no question that the three can often be found together, as even a cursory review of the historical record brings countless examples to mind. This course will interrogate the relationship(s) between religion, race, and political violence by exploring the theoretical literature through the lens of mostly contemporary case studies. In exploring these cases, the course will ask: How are religion, race, and political violence related? How do stereotypes about religion and race (and perhaps also violence) influence our understanding of these relationships? What are the consequences of invoking religion and/or race in these conflicts? Who decides when political violence is religious or racial? Do we even need to talk about religion or race to understand this violence? And if so, how might we do so differently?

Colonial Pasts/Global Presents KENT, STACIE A
Spring 2021
While scholars of globalization often proclaim the novelty of the present, historians have become suspicious that deeper connections exist between global, networked presents, and colonial pasts. In this course we will study a variety of colonial histories form the eighteenth and nineteenth centuries and investigate whether and in what ways that history remains with us today. Our examples will come from Euroamerican colonial empires, and topics will include commodity production and circulation, work regimes, labor migrations, gender and sex, development, science, medicine, and racial epistemologies.

Global China and the Belt and Road Initiative GRANT, ANDREW N
Spring 2021
China is increasingly a global player in international development, geopolitics, and soft power influence. This course will explore the history of Global China and its contemporary geographical reach in Asia, Africa, Europe, and the Americas. Touching upon topics including the ancient Silk Road, steppe empires and the tribute system, the century of national humiliation, the Belt and Road Initiative, sensitive borderlands, and issues of security and censorship, the course explores how China is reorienting global geographies. It asks: What about Chinese development is new?
Does it pose a positive alternative to Western-led developmentalism? Why is China's rise so controversial?

Colonial Korea and its Legacies HWANG, INGU
Spring 2021
This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture.
The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations.

INTL286001
Human Rights in East Asia HWANG, INGU
Spring 2021
This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues.

INTL337501
Economic Growth and Development GUERRON, PABLO A
Spring 2021
This course introduces students to Economic Growth. Our starting point is the question of why societies did not experience economic growth for most of human history. Indeed, growth is a very recent economic concept dating back to the nineteenth century. We will then study what drives growth. Examples include the introduction of electricity, telephone, and airplanes. In general, we will study how technology, capital accumulation, human capital, and innovation helped humanity to increase its wellbeing. Finally we will cover the impact of growth on our lives. For example, how life expectancy has changed over the past century.

INTL337601
International Economic Relations ANDERSON, JAMES
Spring 2021
This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

INTL353001
Korean War: Conflict, Security, and Peace HWANG, INGU
Spring 2021
The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace.

INTL442901
Globalization and the Media BREEN, MARCUS J
Spring 2021
This class examines the cultural impact of globalization on the traditional centers and peripheries of media production. The course will cover topics such as the shifting definitions of cultural imperialism; the role of the United Nations in regulating cultural products; the latest transnational media mergers; the strategies of global television programmers such as CNN, MTV, or Discovery; the increasing commercialization of media systems around the world; and the role of media in relation to war and terrorism. This writing-intensive seminar is open to juniors and seniors.

Islamic Civilization and Societies Courses: Fall 2020

ICSP119901
Islamic Civilization DIPASQUALE, DAVID M
Fall 2020
This course introduces the varieties of Islamic civilization from the seventh century to the modern world. It explores not only the tenets of faith and practice, and political, social, theological, and economic history, but also considers Muslim cultural and intellectual contributions, including by women, from Indonesia to Morocco and in the Western world. Students will read primary sources, listen to recordings, and view films. The course will emphasize the variety of experiences of Muslims and their contributions to the world.

ICSP230901
Music and Culture in the Middle East LUCAS, ANN E
Fall 2020
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-a-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

ICSP261501
Islam and Liberal Democracy DIPASQUALE, DAVID M
Fall 2020
We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

ICSP332801
Islam and the Iberian Peninsula GOIZUETA, ELIZABETH T
Fall 2020
This course will examine the relationship between cultures in the Euro-Arab context from both historical and contemporary perspectives. It will begin with an examination of the historical influence of Islam in the Iberian Peninsula from the eighth to the fifteenth centuries. During that period, Spain presented an example of religious tolerance and the place where the followers of the three Abrahamic religions lived, arguably, in harmony with one another. Against this background, the course will explore the interactions and mutual influences between the Iberian and the Islamic cultures from the Middle Ages to the present.

ICSP263801
Islamic Political Philosophy DIPASQUALE, DAVID M
Spring 2021
What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought: the encounter of Islam with Greek philosophy in the classical period and its encounter with the modern secular west in late modernity.

ICSP331001
Women and Gender in Islam DELONG-BAS, NATANA J
Spring 2021
This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and women's issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on women's access to the public sphere, positions of leadership, and legal status.

ICSP399901
Politics of Modern Middle Eastern Art ALQASIMI, SULTAN S
Spring 2021
In this course, we shall survey the political underpinnings of Arab art in the twentieth century, and the socio-political conditions that shaped cultural production in the region. Whether it is under the Ba'athist regimes of Syria and Iraq or under Egypt' Pan-Arabism championed by Gamal Abdel Nasser, painting and sculpture in addition to film and performance have been employed by various governments as a tool of soft power to propagate their policies to the public not only in their respective states but throughout the region and beyond. Despite this widespread government patronage of the arts, many artists have chosen to challenge their authorities through subversive movements and practices, which we will address at different moments in the semester. This course, through its focus on creative practices and strategic use of the arts, will attempt to shed light on an often neglected dimension of the modern history of the Arab World and other parts of the Middle East.

ICSP433701
Silk Roads: Religions and Cultures ASHUROV, BARAKATULLO
Spring 2021
This course introduces the history of the Silk Road--a complex network of trade routes that connected China with the rest of the Eurasian continent over land and sea--and its role in fostering cultural and material exchanges between the people groups it connected. The chronology of the course covers the period between 500 BCE and 1500 CE, during which the Silk Road contributed to the forming and transforming the cultural, ethnic, and religious identities of different peoples inhabiting the vast area that came to be known as the Silk Road Corridors. The course moreover explores topics, including conspicuous consumption, cultural diversity, religious and linguistic pluralism by introducing art and archaeological and textual sources.

Jesuit Studies Courses: Summer 2020

JESU715701
In the Footsteps of Leaders BEAUMIER, CASEY
Summer 2020
This course considers the distinctive methods of Jesuit leadership by situating them in their historical and geographic context. The course begins with ten days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. The course continues at Boston College with lectures, discussions, and case-study analyses moderated by distinguished leaders of Jesuit apostolates. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher-education schools. Coursework features selected readings, workshops, and projects to be completed in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of leadership and of the ways that vision has both changed and remained constant.

Jesuit Studies Courses: Fall 2020

JESU713101
Social Justice in Jesuit Contexts CASALINI, CRISTIANO
Fall 2020
The Social Apostolate of the Society of Jesus has developed in a variety of ways over the centuries according the diverse contexts where Jesuits have operated as agents of "social justice." This class offers students both a broad and deep understanding of: (1) How the Society of Jesus developed its mission in support of creating a "preferential option for the poor"; (2) How the Society understood its role to promote liberation from oppression in diverse social environments; (3) What kind of services have been activated by the Society of Jesus in order to fulfill its core values of "the service of faith and promotion of justice"; and (4) How social justice is pursued through pedagogy and practices by Jesuit and Ignatian schools today, given the significant involvement of the Jesuits with formal education on a global scale. The course is designed to foster deep and meaningful conversation among students. It will include individual and collective readings and video-conferences with leaders and teachers of Jesuit schools around the world, deepening students' knowledge of current practices and stimulating dialogue.

JESU715901
A History of The Jesuits MEEHAN, SETH M
Fall 2020
For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

Jesuit Studies Courses: Spring 2021

JESU713201
Discernment and Prayer in the Spiritual Exercises of St. Ignatius GEGER, BARTON T
Spring 2021
A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

JESU715801
Jesuit Pedagogy
CASALINI, CRISTIANO
Spring 2021
This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects-the uniformity and the adaptability-were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Journalism Courses: Summer 2020

JOUR201601
Reporting Civil Rights ARDS, ANGELA
Summer 2020
This course explores first-hand accounts from the front lines of movements to advance social justice, from the abolitionist and anti-lynching campaigns of the nineteenth century and those that toppled Jim Crow, to broader issues such as prisons and poverty, immigration and education. Students will develop their knowledge of civil rights reporting history in the U.S, gain skills and practices, and learn how to apply all three in reporting and writing in core beat areas.

Journalism Courses: Fall 2020

JOUR200001
Introduction to Journalism MARCUS, JON P
Fall 2020
Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories.

Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

JOUR218401
Sports, Media, Culture SERAZIO, MICHAEL J
Fall 2020
Sports have long played a vital yet complex role in culture, and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance--and deconstruct the hype--that accompanies modern sports.

JOUR220001
The Underground Press ARDS, ANGELA
Fall 2020
The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

JOUR220201
Narrative Journalism in Peace and War WILSON, CHRISTOPHER P
Fall 2020
This course will engage with modern and contemporary examples of so-called "long form" journalistic narratives (essays, books, and perhaps an example of graphic journalism) that, by applying literary techniques to nonfiction, tell us a story about contemporary social life.
Discussing matters of literary form and technique as well as journalistic norms, we will cover nonfiction texts that address both social conditions on the home front (inequality, Wall Street adventurism, street crime, race relations, police culture) and international conflicts (including war and terrorism), generally (but not always) involving the U.S. Writers covered will include figures such as Michael Lewis, Joan Didion, George Packer, William Finnegan, Suki Kim, Isabel Wilkerson, Geraldine Brooks, Mike Davis, Alex Kotlowitz, John Hersey, Anne Fadiman and others. This is a CRITICAL course.

JOUR222501
Journalism and New Media JOHNSTON, MAURA K
Fall 2020
The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the twenty-first century. This one semester seminar will trace the history of new media's relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

JOUR222601
Writing About Popular Music JOHNSTON, MAURA K
Fall 2020
Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR223801
Food Writing O'CONNOR, JOHN
Fall 2020
This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the clichés and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works from early practitioners like A. J. Liebling and
M.F.K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

JOUR223901
Travel Writing O'CONNOR, JOHN
Fall 2020
Traveling can be one of life's more rewarding experiences, and for writers it can supply an inexhaustible trove of material. But the appeal of the genre--who wouldn't want to take an all- expenses-paid trip to Fiji's finest eco-resorts?--can also be its biggest crutch. With few exceptions, travel stories today merely recast the excruciating details of five-star hotels, hairy- chested masseurs, and the salutary effects of jalapeno margaritas. JOUR225201
News Media/Democracy SERAZIO, MICHAEL J
Fall 2020
The press plays an essential role in America and the world. This course aims to equip students to become critical news consumers with both a skilled understanding of how

journalism works and political literacy about the big issues of our time. Through classic scholarly reflections as well as contemporary punditry examples, we will tackle the news media critically across three dimensions: learning about its indispensable function in mediating politics and democracy throughout history and today; studying and practicing the craft of opining writing and social advocacy; and evaluating and critiquing the performance of the press across these fronts.

JOUR225401
The Role of Class in U.S. Journalism MURPHY, CARLA M
Fall 2020
In our era of expanded economic inequality, this course explores the role of 'class' in U.S. journalism. How does 'class' both shape and signal coverage "for" versus "about" a community-- and how does this affect journalism's function in our representative democracy? This writing- intensive course has two additional objectives: foster awareness of how our own class positions may shape and inform our reporting and promote craft discipline through the practice of revision. We will cover a range of texts (scholarship; literature; screenplays; videos; art) and journalistic writing, with occasional class visits by journalism practitioners.

Journalism Courses: Spring 2021

JOUR200001
Introduction to Journalism MARCUS, JON P
Spring 2021
Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories.
Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.
Credits: 03
Room and Schedule: GASSON HALL 205,M 6-8 20; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Course open to Freshman, Sophomores, and Juniors ONLY. Note to Journalism minors: This is a REQUIRED course. Students who have taken JOUR223301 "Advanced Journalism" CANNOT take this course.

JOUR221001
The Business of Journalism DAHL, DAVID K
Spring 2021
This course will help students to become literate in the business of journalism and the changes underway in the profession. Discussing the history of mainstream news organizations and new business models brought by the digital revolution, we consider how questions of audience, revenue, and platform shape the rapidly changing news business. We live in an age of new money, new platforms, and new ways of telling stories, but also an age in which many journalism jobs have disappeared. The opportunities unleashed by these changes are helping to create the most exciting period ever for journalism. We need to know how and why these changes have occurred.

JOUR222501
Journalism and New Media JOHNSTON, MAURA K
Spring 2021
The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the twenty-first century. This one semester seminar will trace the history of new media's relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

JOUR222601
Writing About Popular Music JOHNSTON, MAURA K
Spring 2021
Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

JOUR223701
The Art of Editing LESTER, JAMES T
Spring 2021
Writers get all the attention. But where would they be without discerning editors to recognize their talents, provide perspective on their ideas, help shape their work, and, ultimately, publish it? This discussion-based class will focus primarily on editing as it's practiced at magazines such as The New Yorker and The Atlantic. We'll think big and small, about whole publications, individual articles, and critical matters of style; we'll read and discuss published works; we'll invite top editors and writers in to share their secrets with us; and we'll write and edit our own articles.

JOUR223801
Food Writing O'CONNOR, JOHN
Spring 2021
This class takes a close look at the practice and tradition of food journalism, introducing students to narrative techniques, elements of reporting, and works that have shaped the genre. Students will learn how to avoid the clichés and traps of food writing and to develop original, persuasive, surprising ideas about food and the culture of eating. Issues of voice, scene, social observation, and dramatic structure are addressed, with additional attention paid to crafting and pitching articles. Readings will include works from early practitioners like A. J. Liebling and
M.F.K. Fisher and contemporary writings by Gabrielle Hamilton, Frank Bruni, David Foster Wallace, and others.

Summer 2020
In this course, we will explore several areas of advanced mathematics through lectures, classroom discussions, and labs. These include topics such as topology, projective geometry, transformation geometry, computational geometry, chaos, and coding, which are not normally taught in the high school curriculum. Through studying these exciting developments in modern mathematics, students can further develop their critical thinking and problem-solving skills. A good background in high school algebra and geometry is recommended. Instructor Bio: Chi-Keung Cheung received his Ph.D. from University of California-Berkeley, and has been a math professor at BC since 1993. His research interests are in geometric analysis and complex analysis. In recent years, he has also actively participated in training high school and elementary school math teachers.

MATH110001
Calculus I GERRAUGHTY, LORIN E
Summer 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core

level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: Mathematics
Prerequisites: Trigonometry.
Corequisites: MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901 **Frequency:** Annually **Student Level:** CORE
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Status: OPEN

MATH110002
Calculus I GERRAUGHTY, LORIN E
Summer 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. MATH110101
Calculus II DEPARTMENT
Summer 2020
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.
Credits: 03
Room and Schedule: JUN 29 - AUG 14; **Satisfies Core Requirement:** Mathematics **Prerequisites:** MATH1100.
Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.).
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall).
Status: CANCELLED

MATH221001
Linear Algebra
WOLF, JAMISON B
Summer 2020
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.
Credits: 03
Room and Schedule: JUN 29 - AUG 14; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None
Cross-listed with: ADMT2210

Mathematics Courses: Fall 2020

MATH100201
Functions and Differential Calculus GOLDSTEIN, ELLEN J
Fall 2020
This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

Fall 2020
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and

logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.
Credits: 04
Room and Schedule: M W F 2;M 6-7 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Mathematics
Prerequisites: Trigonometry.
Corequisites: MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901 **Frequency:** Annually **Student Level:** CORE
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Status: CLOSED

MATH119001
Fundamentals of Mathematics I ROGERS, CARSON S
Fall 2020
MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.
Credits: 03
Room and Schedule: CARNEY HALL 005,M W F 12;HYBRID; **Satisfies Core Requirement:** Mathematics **Prerequisites:** None
Corequisites: None
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: Restricted to Lynch School of Education students.
Status: OPEN

MATH220201
Multivariable Calculus CHEN, QILE; YEH, KEVIN
Fall 2020
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: GASSON HALL 202,M W F 2;HYBRID; **Satisfies Core Requirement:** Mathematics **Prerequisites:** Calculus II.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. **Status:** OPEN

MATH220202
Multivariable Calculus CHEN, QILE; YEH, KEVIN
Fall 2020
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: GASSON HALL 202,M W F 3;HYBRID; **Satisfies Core Requirement:** Mathematics **Prerequisites:** Calculus II.

MATH221001
Linear Algebra GRIGSBY, JULIA E
Fall 2020
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.
Credits: 03
Room and Schedule: CARNEY HALL 202,M W F 12; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None
Cross-listed with: ADMT2210
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

MATH331001
Introduction to Abstract Algebra LEHMANN, BRIAN T
Fall 2020
This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub- rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** MATH2210 AND MATH2216. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3310 and MATH3311.
Status: CLOSED

MATH331101
Algebra I
MADAPUSI PERA, KEERTHI S
Fall 2020
This course, with MATH3312, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.
Credits: 03
Room and Schedule: FULTON HALL 230,M W F 9; **Satisfies Core Requirement:** None **Prerequisites:** MATH2210 AND MATH2216.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3310 and MATH3311.
Status: OPEN

MATH332001
Introduction to Analysis LINDSEY, KATHRYN A
Fall 2020
This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3320 and MATH3321.
Status: OPEN

MATH332101
Analysis I
KEANE, WILLIAM J
Fall 2020
This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

MATH441001
Differential Equations JIN, XIN
Fall 2020
This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.
Credits: 03
Room and Schedule: GASSON HALL 202,M W F 9;HYBRID;

MATH442601
Probability GROSS, ROBERT
Fall 2020
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.

MATH444501
Combinatorics GREENE, JOSHUA E
Fall 2020
This course is an introduction to graph theory and combinatorics, with a strong emphasis on creative problem-solving techniques and connections with other branches of mathematics. Topics will center around enumeration, Hamiltonian and Eulerian cycles, extremal graph theory, planarity, matching, colorability, Ramsey theory, hypergraphs, combinatorial geometry, and applications of linear algebra, probability, polynomials, and topology to combinatorics.

MATH445301
Euclid's *Elements*
FARBER, ETHAN; MOSS, ERIC
Fall 2020
This course is a close reading of Euclid's *Elements* in seminar style, with careful attention to axiomatic reasoning and mathematical constructions that build on one another in a sequence of logical arguments. We will also emphasize clear and creative communication on mathematical ideas, with some attention to the cultural background of the *Elements* and its place in a modern education.

MATH446001
Complex Variables CHEUNG, CHI-KEUNG
Fall 2020
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well- prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.
Credits: 03
Room and Schedule: DEVLIN HALL 008,M W F 11; **Satisfies Core Requirement:** None **Prerequisites:** MATH2202 AND MATH2210.

MATH447001
Mathematical Modeling GARVEY, PAUL R
Fall 2020
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

MATH447501
History of Mathematics GROSS, ROBERT
Fall 2020
This course studies the development of mathematical thought, from ancient times to the twentieth century. Naturally, the subject is much too large for a single semester, so we will concentrate on the major themes and on the contributions of the greatest mathematicians. The emphasis in the course will be on the mathematics. Students will follow the historical arguments and work with the tools and techniques of the period being studied.

MATH100401
Finite Probability and Applications CLOTE, MARIE
Spring 2021
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.
Credits: 03
Room and Schedule: M W F 9;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Mathematics **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).
Status: CLOSED

MATH100402
Finite Probability and Applications CLOTE, MARIE
Spring 2021
This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.
Credits: 03
Room and Schedule: M W F 10;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Mathematics **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE

Comments: Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors
completing their second mathematics corequisite).

MATH110001
Calculus I PETIT, NICOLAS
Spring 2021
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.
Credits: 04
Room and Schedule: MCGUINN HALL 121,M W F 11; **Satisfies Core Requirement:** Mathematics **Prerequisites:** Trigonometry.
Corequisites: MATH1121. (Or MATH1122, etc., depending on which section of MATH1100 taken.).
Cross-listed with: ADMT1901 **Frequency:** Annually **Student Level:** CORE
Comments: MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. ADMT1901 section for BCE students only.
Status: CLOSED

MATH110002
Calculus I PETIT, NICOLAS
Spring 2021
MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. MATH110101
Calculus II GOLDSTEIN, ELLEN J
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.
Credits: 04
Room and Schedule: FULTON 110,M W F 12;HYBRID;
Satisfies Core Requirement: Mathematics
Prerequisites: MATH1100.
Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.).
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: MATH1101 is not open to students who have completed MATH1103 or MATH1105. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics or Physics should enroll in either MATH1103 (Spring) or MATH1105 (Fall).
Status: CLOSED

MATH110102
Calculus II BELDING, JULIANA V
Spring 2021
MATH1101 is a second course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include an overview of integration, basic techniques for integration, a variety of applications of integration, and an introduction to (systems of) differential equations.
Credits: 04
Room and Schedule: STOKES 101N,M W F 10;HYBRID; **Satisfies Core Requirement:** Mathematics **Prerequisites:** MATH1100.
Corequisites: MATH1141. (Or MATH1142, etc., depending on section of MATH1101 taken.).

MATH118001
Principles of Statistics for the Health Sciences BROOKS, ROBYN K
Spring 2021
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.
Credits: 03
Room and Schedule: FULTON HALL 245,M W F 12;HYBRID;
Satisfies Core Requirement: Mathematics
Prerequisites: Open to Connell School of Nursing students only.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

MATH118002
Principles of Statistics for the Health Sciences FARBER, ETHAN
Spring 2021
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.
Credits: 03
Room and Schedule: FULTON HALL 260,M W F 10;HYBRID;
Satisfies Core Requirement: Mathematics
Prerequisites: Open to Connell School of Nursing students only.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

MATH118003
Principles of Statistics for the Health Sciences REINOSO, BRAEDEN A
Spring 2021
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.
Credits: 03
Room and Schedule: FULTON HALL 260,M W F 1;
Satisfies Core Requirement: Mathematics
Prerequisites: Open to Connell School of Nursing students only.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

MATH118004
Principles of Statistics for the Health Sciences MOSS, ERIC
Spring 2021
This course introduces statistics as a liberal arts discipline and applies the principles of statistics to problems of interest for health sciences professionals. Students will gain an understanding of statistical ideas and methods, acquire the ability to deal critically with numerical arguments and gain an understanding of the impact of statistical ideas on the health sciences, public policy, and other areas of application.
Credits: 03
Room and Schedule: FULTON HALL 260,M W F 2;
Satisfies Core Requirement: Mathematics
Prerequisites: Open to Connell School of Nursing students only.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

MATH119101
Fundamentals of Mathematics II ROGERS, CARSON S
Spring 2021
As in MATH1190, this course emphasizes building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening the content knowledge. Topics drawn from geometry and measurement, data analysis, statistics, and probability will be developed.
Problem solving and reasoning, applications, and making connections will be featured.
Credits: 03
Room and Schedule: CAMPION HALL 300,M W F 11; **Satisfies Core Requirement:** Mathematics **Prerequisites:** MATH1190.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Restricted to Lynch School of Education students.
Status: CLOSED

MATH220201
Multivariable Calculus LI, TAO
Spring 2021
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: GASSON HALL 210,M W F 9;HYBRID; **Satisfies Core Requirement:** Mathematics **Prerequisites:** Calculus II.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. **Status:** OPEN

Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. **Status:** OPEN

MATH220203
Multivariable Calculus CHAMBERS, DANIEL W
Spring 2021
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Mathematics **Prerequisites:** Calculus II.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. **Status:** OPEN

MATH220204
Multivariable Calculus CHAMBERS, DANIEL W
Spring 2021
Topics in this course include vectors in two and three dimensions, analytic geometry of three dimensions, parametric curves, partial derivatives, the gradient, optimization in several variables, multiple integration with change of variables across different coordinate systems, line integrals, and Green's Theorem.
Credits: 04
Room and Schedule: M W F 2;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Mathematics
Prerequisites: Calculus II. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: This course is for students majoring in Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics and Physics, as well as other students who have completed Calculus II. **Status:** OPEN

MATH221001
Linear Algebra ROGERS, CARSON S
Spring 2021
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.
Credits: 03
Room and Schedule: STOKES HALL 295S,M W F 1; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None
Cross-listed with: ADMT2210
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: OPEN

MATH221002
Linear Algebra ROGERS, CARSON S
Spring 2021
This course is an introduction to the techniques of linear algebra in Euclidean space. Topics covered include matrices, determinants, systems of linear equations, vectors in n-dimensional space, complex numbers, and eigenvalues. The course is required of mathematics majors and is also suitable for students in the social sciences, natural sciences, and management.
Credits: 03
Room and Schedule: STOKES HALL 295S,M W F 2; **Satisfies Core Requirement:** None **Prerequisites:** None

MATH221101
Linear Algebra (Honors) HOWARD, BENJAMIN V
Spring 2021
This honors course in Linear Algebra is intended for students with strong preparation and high motivation. Topics covered include matrices, linear equations, determinants, eigenvectors and eigenvalues, vector spaces and linear transformations, inner products, and canonical forms. The course will include significant work with proofs.
Credits: 03
Room and Schedule: FULTON HALL 145,M W F 1; **Satisfies Core Requirement:** None **Prerequisites:** MATH2203.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS

MATH229001
Number Theory for Teachers DEPT
Spring 2021
This course is intended to focus on the wealth of topics that relate specifically to the natural numbers. These will be treated as motivational problems to be used in an activity-oriented approach to mathematics in grades K-9. The course will demonstrate effective ways to use the calculator and computer in mathematics education. Topics include prime number facts and conjectures, magic squares, Pascal's triangle, Fibonacci numbers, modular arithmetic, and mathematical art.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: None **Prerequisites:** MATH1190 AND MATH1191. **Corequisites:** None
Cross-listed with: EDUC2290 **Frequency:** Biennially **Student Level:** CORE **Comments:** None
Status: CANCELLED

MATH229101
Geometry for Teachers BELDING, JULIANA V
Spring 2021
This course is intended for teachers of grades K-9. Geometry now occupies a significant role in the elementary mathematics curriculum. The course will develop ideas for presenting geometry as an activity-based program. Topics include the geoboard and other key manipulatives, elements of motion and Euclidean geometry and suggestions for using Logo as a tool to enhance teaching geometry.
Credits: 03
Room and Schedule: GASSON HALL 205,M W F 12; **Satisfies Core Requirement:** Mathematics **Prerequisites:** MATH1191 AND MATH1190.
Corequisites: None
Cross-listed with: EDUC2291 **Frequency:** Biennially **Student Level:** CORE **Comments:** None
Status: OPEN

MATH331001
Introduction to Abstract Algebra CORNISH, JAMES
Spring 2021
This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub- rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.
Credits: 03
Room and Schedule: M W F 2;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** MATH2210 AND MATH2216. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3310 and MATH3311.
Status: OPEN

MATH331201
Algebra II
MADAPUSI PERA, KEERTHI S
Spring 2021
This course, with MATH3311, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.
Credits: 03
Room and Schedule: FULTON HALL 250,M W F 9;
Satisfies Core Requirement: None
Prerequisites: MATH3311. With the permission of the Assistant Chair for Undergraduates, students who have taken MATH3310 may be allowed to take MATH3312. However, they may need to do additional work on their own in order to make that transition.
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS

MATH332001
Introduction to Analysis CHEN, DAWEI
Spring 2021
This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** MATH2216 AND MATH2202. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: Students may not take both MATH3320 and MATH3321.
Status: OPEN

MATH332201
Analysis II KEANE, WILLIAM J
Spring 2021
This course, with MATH3321, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: MATH3321. With the permission of the Assistant Chair for Undergraduate Programs, students who have taken MATH3320 may be allowed to take MATH3322. However, they may need to do additional work on their own in order to make that transition.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

MATH442601
Probability WOLF, JAMISON B
Spring 2021
This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed and we will use the computer to explore many concepts.
Credits: 03
Room and Schedule: GASSON 210,M W F 11;HYBRID;
Satisfies Core Requirement: None
Prerequisites: MATH2202.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually

MATH444001
Dynamical Systems MIROLLO, RENATO
Spring 2021
This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None **Prerequisites:** MATH2202 AND MATH2210. **Corequisites:** None
Cross-listed with: None
Frequency: Annually

Comments: None
Status: CLOSED

MATH445501
Mathematical Problem Solving CHEUNG, CHI-KEUNG
Spring 2021
This course is designed to deepen students' mathematical knowledge through solving, explaining and extending challenging and interesting problems. Students will work both individually and in groups on problems chosen from polynomials, trigonometry, analytic geometry, pre-calculus, one-variable calculus, probability and numerical algorithms. The course will emphasize explanations and generalizations rather than formal proofs and abstract properties. Some pedagogical issues, such as composing good problems and expected points of confusion in explaining various topics, will come up, but the primary goal is mathematical insight. The course will be of particular use to future secondary math teachers.
Credits: 03
Room and Schedule: GASSON HALL 302,M W 4 30*;
Satisfies Core Requirement: None
Prerequisites: MATH2202 AND MATH2210 AND MATH2216. Permission of the instructor required for students outside the Lynch School of Education.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

MATH446001
Complex Variables CHEN, QILE
Spring 2021
This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well- prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.
Credits: 03
Room and Schedule: STOKES HALL 295S,M W F 10; **Satisfies Core Requirement:** None **Prerequisites:** MATH2202 AND MATH2210.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

MATH446201
Topology
MEYERHOFF, G ROBERT
Spring 2021
This course is an introduction to point-set topology. Topics include topological spaces, continuous functions, connectedness, compactness, metric spaces, the Urysohn Metrization Theorem, manifolds, the fundamental group and the classification of surfaces. We will also discuss applications of these concepts to problems in science and engineering.
Credits: 03
Room and Schedule: MERKERT CENTER 130,M W F 10;
Satisfies Core Requirement: None
Prerequisites: MATH2216.
Corequisites: MATH3320 or MATH3321 is recommended as a pre/corequisite.
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

MATH447001
Mathematical Modeling GARVEY, PAUL R
Spring 2021
This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

Music Academic Courses: Summer 2020

MUSA110001
Fundamentals of Music Theory GAWLICK, BARBARA S
Summer 2020
An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper level study in music theory and will begin to question broader issues concerning the meaning and use of music.
Credits: 03
Room and Schedule: ONLINE COURSE;ASYNCHRONOUS;MAY 13 - JUN 26; **Satisfies Core Requirement:** Arts **Prerequisites:** None **Corequisites:** MUSA1080. **Cross-listed with:** ADMU1100
Frequency: Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

MUSA120001
Introduction to Music CARPENTIER, RACHEL O
Summer 2020
This course will attempt to develop essential and critical listening faculties by employing a chronological survey of the elements, forms, and various types of music that the serious listener is exposed to today. The principal emphasis of the course will be on traditional Western art music from medieval Gregorian Chant to twentieth-century electronic music, but certain excursions into the world of non-Western musics, jazz, and American popular song will be included to diversify and enrich the experience of listening critically to music.
Credits: 03

MUSA130001
History of Popular Music MCCOOL, JASON
Summer 2020
From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in

America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

MUSA132001
Introduction to Musics of the World DINEEN, DOUGLASS
Summer 2020
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindusthani; Karnatak; Javanese; and Japanese musics.
Musical training and background are not required and are not presumed.

MUSA109001
Ear Training/Sight-Singing Lab BURGO, MICHAEL
Fall 2020
In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.

MUSA170101
Aesthetic Exercises: Engagement, Empathy, Ethics CALLAHAN, DANIEL
Fall 2020
In this course you will hone your perceptual and critical faculties on a range of artworks and performances traversing media and frames, from ancient sculpture to contemporary sports. You will explore how differences between media and art forms affect representation, meaning, and reception. You will define and redefine "art." You will read aesthetic theorists from Plato to YouTube users. Most importantly, you will lavish attention on your own embodied experience to understand what constitutes aesthetic engagement, with whom or what you empathize in aesthetic experience, and how, if at all, aesthetic exercises better your life and the lives of others.

MUSA230701
Musics of Asia DINEEN, DOUGLASS
Fall 2020
This course offers an approach to Asian culture focusing on music and the performing arts. Case studies from India, Tibet, China, Japan, Korea, and Indonesia highlight the profound richness of musical experience seen throughout Asia while providing the foundation for a broader analysis of music-as-culture. Examining how music is deployed--in religious expression, political and social strategies, identity formation, and entertainment--reveals both continuities in musical uses/meanings and diversity in its cultural, social, and personal dimensions. This course locates contemporary Asian performing arts in their historical contexts, considers the transformations that take place as music flows across borders, and examines the interplay between global information networks and local forms and representations.

MUSA230901
Music and Culture in the Middle East LUCAS, ANN E
Fall 2020
This course explores the relationship between different music traditions of the Middle East and their respective cultural contexts. It addresses issues of music's structure and content vis-a-vis its role in social, political, and religious situations in the region; the ways that these forces influence musical aesthetics, while also addressing the role of music in the Middle East historically. The cultural areas covered in this class include the Arab World, Iran, Turkey, and Afghanistan.

History of Jazz MANGIN, TIMOTHY R
Fall 2020
A history of America's music from its origins in African traditions through the contemporary scene. The course will explore its African roots; its consolidation in New Orleans and its spread into the cultural mainstream in the Jazz Age; its transformation into bebop, cool, third stream, funk, and avant-garde trends; and the return to traditionalism. Key figures covered will be Armstrong, Ellington, Parker, and Marsalis, among others.

MUSA241001
The Music Industry JAMES, DONALD J
Fall 2020
This course examines the music industry--broadly considered--from song publishing in the eighteenth century through the streaming era today. Taking a historical approach, we will place special emphasis on creative and cultural labor and the ways in which those who create and produce music have negotiated transformation in media, technology, and business. While our focus will be primarily on the U.S. popular music industry, we'll periodically consider industry in the Western classical tradition and world musics. Topics will include song publishing, copyright, performance rights, labor unions, the record industry, social networks, and streaming platforms.

MUSA310601
Counterpoint I PARK, BENJAMIN M
Fall 2020
In this course we will study the fundamentals of two- and three- part polyphonic styles. Using the principles of species counterpoint, we will acquire a dependable contrapuntal technique to write short compositions, first in two parts and eventually in three. Assignments will include short works in free imitation, strict canon, and invertible counterpoint. Our studies will include a brief survey of the historical origins of Western polyphony and analysis of contrapuntal compositions of the Baroque period.

MUSA311401
Jazz Harmony, Improvisation, and Arranging LEE, THOMAS O
Fall 2020
This music theory course will focus on the study of chord structures, chord substitutions, chord scales, composition, and improvisation as they have been codified by contemporary jazz musicians. The technical innovations in the music of Sonny Rollins, Thelonius Monk, Charlie Parker, and Miles Davis will be analyzed and discussed. Special attention will be placed on learning how to improvise on the great standards of the jazz repertory. Additional studies will include the following: piano lead sheet arrangements; ii-V-I keyboard harmony, re- harmonization, and composing original tunes based on chord structures of standards by Berlin, Kern, Gershwin; rhythm changes; and the blues.

Seminar in Composition GAWLICK, RALF Y
Fall 2020
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

MUSA322101
Chamber Music HEBERT, SANDRA
Fall 2020
This course will focus on the repertoire of chamber music, defined as small instrumental ensembles from two to nine players with one player per part. Chamber music has been an important genre from the late medieval/early renaissance period through the present day. The course will proceed primarily chronologically beginning with string instrument consorts, then moving to Baroque chamber and church sonatas, string quartets and numerous other ensembles during the Classical period, and finally development of similar ensembles as well as new instrumental combinations through the Romantic period into the modern era. While most of the music studied will be instrumental, a few important works that also include voice will be presented as well.

MUSA327201
Liszt at the Heart of Romanticism MCGRANN, JEREMIAH W
Fall 2020
Charlatan, heir of Beethoven, prophet of music of the future, the still controversial Franz Liszt (1811-1886) spans the development of music in the nineteenth-century. He was reportedly blessed by Beethoven (a myth) and lived long enough to write atonal music. Virtuoso pianist, composer, teacher, author, through his music we will look at the world of the pop-star virtuoso, his links to the French authors Lamartine and Saint-Simon, his attempts to translate works of Romantic literature into music, his place within the grand classical tradition, his influence on his son-in-law Richard Wagner, his links to Hungarian nationalism, his little known sacred choral works and his enigmatic late pieces.

MUSA109001
Ear Training/Sight-Singing Lab BURGO, MICHAEL
Spring 2021
In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors and minors. Usually taken concurrently with MUSA2100 Harmony or MUSA3100 Chromatic Harmony.

Spring 2021
This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindusthani; Karnatak; Javanese; and Japanese musics.
Musical training and background are not required and are not presumed.

MUSA140001
Music in the Holocaust and the Third Reich LUDWIG, MARK
Spring 2021
This course surveys the inspiring legacy of music by composers persecuted by the Nazis. We will study jazz, classical music, and cabaret from 1900-1944 targeted by the Nazi regime. Special focus is placed on the art and music created in Nazi concentration camps. Students will have the opportunity to experience live performances and archival materials and will meet Holocaust survivors, who will share their incredible testimonies with the class. Themes explored: socio- political impact on the arts in climates of intolerance and persecution; music and art as resistance; connections to contemporary forms of music such as rock, rap, reggae, etc.

MUSA220101
Medieval/Renaissance CARPENTIER, RACHEL O
Spring 2021
A study of the development of Western music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the sixteenth century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included.

MUSA230401
Musics of India DINEEN, DOUGLASS
Spring 2021
This course will introduce students to the rich and varied musical arts of India. Students will delve into the ubiquitous songs of Bollywood and Tamil film, karnatak and hindustani art musics, temple musics, as well as the music (and dance) of bharatanatyam, bhangra, and other regional genres. Lectures will focus on situating Indian musics in their cultural and historic contexts while exploring issues of identity formation, regional and transnational movements, and the changing meanings of music and the arts in India. Students will also study performance practices--including basic exercises for South Indian melody (raga), rhythm (tala), and dance-- which will provide engaged (and embodied) learning supplements to the lectures. There are no academic or music-skills prerequisites for this course.

MUSA232001
Music and America JAMES, DONALD J
Spring 2021
A survey of the musical heritage of the United States in the broadest historical and stylistic terms possible: from before the Puritans past punk. Included are religious and secular music as well as popular and elite genres, such as Native American pow-wow music, Puritan hymnody and colonial singing schools, minstrelsy and parlor music, the rise of nationalism and its rejection in art music, music in the theater and in films, jazz and gospel, popular music as social enforcer and as social critic. Important figures

include William Billings, Stephen Foster, Charles Ives, Louis Armstrong, Aaron Copland, Elvis Presley, and Jimi Hendrix.

MUSA311001
Form and Analysis: Methodological Approaches to the Study of Music from Bach to Webern
LEE, THOMAS O
Spring 2021
The focus of this course is in two parts. In part one, we will look at large forms in the Romantic music repertory. We will study Robert Schumann's song cycle "Dichterliebe," and Frederic Chopin's "Preludes, opus 28." In part two, we will study the techniques and methods behind some of the music of the twentieth century. For instance, the music of Arnold Schoenberg, Anton Webern, Milton Babbitt, Steve Reich, and others.

MUSA312001
Seminar in Composition LEE, THOMAS O
Spring 2021
The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

MUSA322001
Opera
CALLAHAN, DANIEL
Spring 2021
In this course we will look at how text and music combine to relate a drama, concentrating on five representative masters of the seventeenth through nineteenth centuries--Monteverdi, Handel, Mozart, Verdi, and Wagner. This course will take excursions into other works--the operas created for the court of Louis XIV, the vocal pyrotechnics of the Italian golden age of singing, the spectacle of French grand opera, and the operatic qualities of the modern Broadway musical.

Beethoven
MCGRANN, JEREMIAH W
Spring 2021
An introduction to Ludwig van Beethoven (1770-1827), tracing his intellectual development within the culture and society of the Rhenish Enlightenment, his musical enrichment of the High Classicism of Mozart and Haydn (among others), and the heroic style of his best known works to his feelings and expressions of musical and social isolation in his last years, and his problematic identity with the burgeoning romantic movement in Germany. Emphasis will be on the music itself, concentrating on compositions from three genres: piano sonata, string quartet, and symphony. Also covered will be the concerto, his opera *Fidelio,* and the *Missa Solemnis.*

MUSA335001
The Beatles: From "Yesterday" to "Tomorrow Never Knows" JAMES, DONALD J
Spring 2021
Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political, and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums, and films, which we will supplement with secondary articles, reviews, and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

Music Performance Courses: Fall 2020

MUSP161501
Irish Fiddle/Experienced Beginner FALLS KEOHANE, SHEILA E
Fall 2020
For students who have taken a full semester of Beginner Irish Fiddle (MUSP1600) or have at least one year's experience playing the violin. This class will help students continue in the development of violin technique. Students will learn more advanced Irish dance tunes with some beginning ornamentation (bowing and fingering). Students may take the experienced beginner class for more than one semester until they feel ready to move to the Intermediate level. Violin rentals are possible. A small portable recorder is required. Fall participants may continue in spring semester, but new students may not enroll in spring semester.

MUSP167001
African Music Ensemble
MANGIN, TIMOTHY R; TOURE, AMADOU L
Fall 2020
This ensemble is a hands-on introduction to Senegalese drumming and dancing. Students will learn to play different drums and rhythms from a Senegalese master drummer. Since dance is an integral part of Senegalese drumming, students will also learn basic dance moves and gestures. The instructor is a descendent from a long line of griots (hereditary musicians, dancers, drummers, and praise singers) and will teach the class musical and cultural traditions passed down to him and his family over the centuries. Students will also have the opportunity to learn new compositions by Senegalese drummers. This ensemble requires regular attendance and participation. There are no pre-requisites.

MUSP176001
Introduction to Improvisation KNIFFIN, ERIC L
Fall 2020
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues, and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

Music Performance Courses: Spring 2021

MUSP161501
Irish Fiddle/Experienced Beginner FALLS KEOHANE, SHEILA E
Spring 2021
For students who have taken a full semester of Beginner Irish Fiddle (MUSP1600) or have at least one year's experience playing the violin. This class will help students continue in the development of violin technique. Students will learn more advanced Irish dance tunes with some beginning ornamentation (bowing and fingering). Students may take the experienced beginner class for more than one semester until they feel ready to move to the Intermediate level. Violin rentals are possible. A small portable recorder is required. Fall participants may continue in spring semester, but new students may not enroll in spring semester.

MUSP162001
Traditional Irish Dance HAGGAN, CAITLIN M
Spring 2021
This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and ceili dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

MUSP167001
African Music Ensemble
MANGIN, TIMOTHY R; TOURE, AMADOU L
Spring 2021
This ensemble is a hands-on introduction to Senegalese drumming and dancing. Students will learn to play different drums and rhythms from a Senegalese master drummer. Since dance is an integral part of Senegalese drumming, students will also learn basic dance moves and gestures. The instructor is a descendent from a long line of griots (hereditary musicians, dancers, drummers, and praise singers) and will teach the class musical and cultural traditions passed down to him and his family over the centuries. Students will also have the opportunity to learn new compositions by Senegalese drummers. This ensemble requires regular attendance and participation. There are no pre-requisites.

MUSP176001
Introduction to Improvisation KNIFFIN, ERIC L
Spring 2021
Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues, and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

MUSP177001
Gospel Workshop JACOB, SHANNON D
Spring 2021
This course is a study and performance of the religious music of the Black Experience known as Spirituals and Gospels. One major performance is given each semester. Concerts and performances at local Black churches are also presented with the Voice of Imani Gospel Choir. The Gospel Workshop will provide the lab experience for MUSA2331 (AADS2266) and MUSA2332 (AADS2285). Members of these classes will be required to attend a number of rehearsals and performances of the Gospel Workshop. Members of the classes may sing in the choir but it is not required for the course.

NELC335201
Silk Roads: Religions and Cultures ASHUROV, BARAKATULLO
Spring 2021

This course introduces the history of the Silk Road--a complex network of trade routes that connected China with the rest of the Eurasian continent over land and sea--and its role in fostering cultural and material exchanges between the people groups it connected. The chronology of the course covers the period between 500 BCE and 1500 CE, during which the Silk Road contributed to the forming and transforming the cultural, ethnic, and religious identities of different peoples inhabiting the vast area that came to be known as the Silk Road Corridors. The course moreover explores topics, including conspicuous consumption, cultural diversity, religious and linguistic pluralism by introducing art and archaeological and textual sources.

PHIL125201
Practical Logic CLEMENTE, MATTHEW J
Summer 2020
A course not in the "new logic" (symbolic, or mathematical, logic) but in the "old logic" (ordinary language logic) invented by Aristotle and used for 2300 years in all the humanities. Includes such topics as definition, contradiction, syllogisms, implied premises, induction, and analogy. The course includes the commonsensical philosophical bases for this logic and also many practical applications to reading, interpreting, evaluating, and inventing arguments, especially in dialogs. Weekly quizzes, extra credit opportunities, and a take-home final exam. Texts: (1) SOCRATIC LOGIC, (2) THE BEST THINGS IN LIFE, (3) SUMMA PHILOSOPHICA (all 3 titles by Peter Kreeft)
Credits: 03

PHIL151001
Introduction to Ethics SEVERSON, ERIC
Summer 2020
What does it mean to be good, virtuous, or just? To what extent are we responsible or not responsible for our actions? How have our ethical values been established by society in the past? On what basis should our ethical values be established in the future? What are reasonable moral expectations we can have of other people? These are a few of the issues that will be discussed as students are introduced to some of the main schools of ethical thought in the Western philosophical tradition. We will examine works by Plato, Aristotle, Augustine, Kant, Nietzsche, Rawls, and Martin Luther King, Jr.. We will also use a few works of literature to reflect further on ethical ideas raised in the course.

PHIL217501
Modernity and Modernism in Paris CONSTAS, CHRISTOPHER
Summer 2020
A three-credit elective on the cultural history of Paris from the Belle Epoque to the collapse of the Third Republic and the Nazi Occupation. This was a period in which Parisian artists, writers, and philosophers undertook a radical re-evaluation of accepted ideas of art, morality, and truth. We will study Existentialist philosophers and Modernist painters, Symbolist poets and Brutalist architects, and in doing so reflect on the triumphs and the traumas of the modern age. The course includes visits to multiple museums (Louvre, Orsay, Pompidou) and significant works of architecture (Gothic, Modern, and Postmodern), as well as concerts and other performances.

PHIL220901
Introduction to Formal Logic POPE, MICHAEL L
Summer 2020
Logic is the careful study of reasoning. It investigates how critical thinking is successful and, when it's not, what goes wrong. Understanding logic enables one to recognize and craft good arguments in every area of life, from science and technology to political debates and everything in between. This course introduces the composition of arguments and fallacious reasoning, honing students' ability to identify and formulate problems and evaluate solutions. Our goal is to analyze and understand the formal tools that allow us to represent the most salient features of reasoning in the most precise terms.

PHIL327501
Movilidad Humana: Ethics of Migration LOTT, MICAH
Summer 2020
The course deals with migration as a topic for philosophical and theological reflection. We will consider key concepts related to migration--e.g., citizen, migrant, human rights, nation. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context--including both Mexican history and present realities--as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.- Mexico border is an issue of intense debate in both the U.S. and Mexico. Thus Mexico provides an excellent context for thinking about: (1) the big picture of migration as a human phenomenon, (2) the historical forces that have shaped, and continue to shape, patterns of migration, and (3) the contemporary situation of migrants and contemporary policies toward migration. Our goal is to combine philosophical/theological reflection with cultural immersion in a mutually illuminating way. The Mexican context will help make our philosophical/theological discussions of migration more vivid, nuanced, and realistic.

PHIL107038
Philosophy of the Person I OLDFIELD, JAMES P
Fall 2020
This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts.
Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.
Credits: 03
Room and Schedule: STOKES HALL 403N,M W F 3;HYBRID;
Satisfies Core Requirement: Philosophy
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE

The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering, and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Perspectives on Western Culture I/Perspectives I COHEN, MARTIN
Fall 2020
The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

PHIL116001

The Challenge of Justice POPE, STEPHEN J
Fall 2020
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL221501
Telling Truths III: The Narratives that Shape Our Lives HIRSCH, KATHLEEN A
Fall 2020
As we encounter injustice, conflicting visions of "the good," and different moral scales of behavior, rights and responsibilities, it is essential that we become aware of our own foundational narratives. What "wisdom stories" shape the way you think about yourself in relation to others? What narratives do you carry into encounters with conditions, attitudes and beliefs that are different from yours? In this course, students will have a rare opportunity to bring their weekly experience of service into a time of reflection, and into relation to some of the core narratives of the great spiritual traditions. We will read modern mystics, parables, and creative theologians, including: Anne Lamott, Etty Hillesum, Kendrick Lamar, and Parker Palmer. The conversation will continue as we write in and read from our journals, sharing stories and questions. Several short writing assignments will occur through the course of the term; a final, longer piece of substantive "spiritual reflection" will give students the chance to synthesize the fruits of observation, reading, and reflection. The aim of the course is to expand students' familiarity with the great narratives of grace and forgiveness, suffering and hope, as they engage in service, and to provide a setting in which they can become intentional about adopting narratives that will shape their lives.

PHIL228801
Philosophy as a Way of Life: East and West STOREY, DAVID E
Fall 2020
The word philosophy means "the love of wisdom," and one way to define wisdom is the knowledge of how to live well. According to French scholar Pierre Hadot, for the ancient Greeks philosophy was not merely an academic exercise, but an inherently practical discipline designed to help people flourish. The ancients laid down different pathways to the good life, and devised "spiritual exercises," reflective practices to foster our intellectual and moral development. They sought to answer ethical and existential questions we all face: What is happiness, and how should we best pursue it? What qualities constitute good character, and how can we acquire them? How should we manage difficult emotions like fear, anger, and anxiety? How can we come to terms with our mortality? What does a meaningful life require? In this course, you will not just study philosophy, you will do it. In addition to examining and evaluating philosophical texts, you will experiment with various contemplative practices to get a sense for what it might be like to live like a philosopher. In other words, the course is an opportunity to study philosophy to figure out what kind of life you want to live. Traditions and thinkers studied include: Plato, Aristotle, Epicurus, Stoicism, Buddhism, Confucianism, and Existentialism. Note: this course will ask you to step outside of your comfort zone, and it assumes an interest and a willingness on your part to engage in regular and serious introspection and to experiment.

PHIL229101
Philosophy and Theology of Community I
SWEENEY, MEGHAN T
Fall 2020
This seminar explores the nature of community, with particular focus on community in the American context. Some of the central historical, cultural, political and religious forces that have shaped both American community and the American understanding of community are examined. These questions are initially approached from an historical perspective with an assessment of philosophical ideas which were dominant in the political thinking of the American founders. The seminar then considers the historical development of those ideas in light of the way they are concretized in political practice, arriving at an assessment of contemporary American thinking on community.

PHIL231001
The City of Dreadful Night: Film Noir and the Displacement of the Subject
BRAMAN, BRIAN J
Fall 2020
Film noir is pervaded by a longing for older urban forms that enabled one to "feel at home on the earth and under the sky." This longing, however, is combined with a fear that new urban forms are at root the source of our alienation from ourselves and others. In other words, "the loss of public space, the homogenization of everyday life, the intensification of surveillance, and the eradication of older neighborhoods by urban renewal and redevelopment projects" create an environment in which the protagonists in film noir are cursed by an inability to dwell comfortably, that is to live authentically on the earth and under the sky. The purpose of this course will be to show how the urban environment, as depicted in film noir, reinforces the modern experience of alienation and despair where "men are they who haunt these fatal glooms, And fill their living mouths with dust of death, And make their habitations in the tombs."

PHIL324001
Towards Deep Subjectivity: Architecture, Ethics, and the Personhood of Place BRAMAN, BRIAN J
Fall 2020
In *Genius Loci: A Phenomenology of Architecture* Christian Norberg-Schultz argues that if human beings are to dwell authentically under the sky and on the earth, the architecture's role is to provide an "existential foothold," which grounds people's relationship to their environment. "Man dwells when he can orientate himself with his environment and experiences it as meaningful" and thus ethical; to have an existential foothold allows one to "be" at home. To dwell means that human beings achieve an individual and communal identity--a personhood in a given place. The purpose of this course will be to explore the relationship between subjectivity, architecture, ethics, and the notion of personhood as authentic dwelling on the earth and under the sky.

PHIL400101
Feminisms and Philosophies of Difference MCGILL, CHERIE
Fall 2020
What does it mean to call oneself (or someone else) a 'feminist'? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss ■ variety of feminisms-- liberal, existential, radical--and their differing approaches to such 'feminist' issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL440201
How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History NEWMARK, KEVIN
Fall 2020
"Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatisms." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

PHIL441901
Friendship GURTLER, GARY
Fall 2020
The renewed interest among philosophers about friendship indicates a break from the suspicion of the last several centuries. The lack of interest can be traced to an understanding of human nature where each individual is a self-contained unit. Ethical reflection emphasized equality so much that friendship appeared hard to justify, as based on preferring one individual over another. This has not always been the case, since Greek and Medieval thinkers regarded friendship rather highly as indicating what is best in human nature and essential to happiness. We will try to understand why different cultural perspectives evaluate friendship in different ways.

PHIL444201
German Romanticism and Idealism RUMBLE, VANESSA P
Fall 2020
Kant's transcendental idealism has been charged with divorcing the subject of understanding from the subject of moral experience. We shall examine the basis of this claim as well as the attempts by Romantic writers and German Idealists to provide a fresh account of the integrity of human experience. We begin examining Kant's attempt, in *The Critique of Judgment*, to bridge the moral and natural realms through aesthetics. We then trace the progressive emancipation of the imagination in the later development of German Idealism and Romanticism.

PHIL444301
What is Democracy?
LOTT, MICAH
Fall 2020
Etymologically, "democracy" means rule by the people, or people power. But what does it mean for the people to rule, or to have power? And what is so valuable about the people ruling, if anything? This course examines these questions, with a focus on contemporary political philosophy. We will look at issues like: deliberation, participation, political voice, and the relationship between capitalism and democracy. Throughout, we will consider democracy's connection to the social ideal of ■ "society of equals."

PHIL519901
Global Justice and Cosmopolitanism HUDSON, STEPHEN A
Fall 2020
In this course, we will analyze how virtue can be applied to the local and global community for the creation of global justice. We will first briefly look at the ancient world and how virtue appears in the political community as civic solidarity. We will then analyze various theories of cosmopolitanism. Finally, we will spend significant time on the theme of global justice. We will apply the previous themes of the course to issues such as global poverty, the environment, global peace, human rights, gender, immigration, global health, and forms of global governance.

PHIL524701
Aquinas and the Classics BYERS, SARAH C
Fall 2020
While it is commonly known that Aquinas was a product of the twelfth-century renaissance of classical thought when it comes to Aristotle, less attention is typically given to his use of Roman Hellenistic philosophy and Greek Neoplatonism. This course is devoted to analysis of how Aquinas developed key elements of his ethics and philosophical psychology, as well as some of his metaphysics, from Roman and Greek authors including Cicero, Seneca, Augustine, and Ps- Dionysius in addition to Aristotle.

PHIL541901
Capstone: A Life Well Lived DECHIARA-QUENZER, DEBORAH
Fall 2020
This course engages students in serious reflection on what it means to have "a life well lived." It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction--dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

PHIL550001
Philosophy of Law VAN ROOY, PAUL A
Fall 2020
This course aims to provide an overview of a number of core debates in contemporary philosophy of law. The primary concern will be to examine the relation between legal validity and the moral normativity of the law, that is, answers to the questions 'What is the law?' and 'Is there a (moral) duty to obey the law?' In addition to these more general questions, we will focus on several more specific questions pertaining to constitutionalism, including 'What is the relationship between constitution and the rule of law?', 'What is the ground of judicial review?' and 'What connection, if any, is there between questions of legal theory and broader debates in contemporary political philosophy?'

PHIL550101
Politics of the Soul: Nietzsche, Leo Strauss, Carl Schmitt, the Good Life, and the Quest for Order
BRAMAN, BRIAN J
Fall 2020
There seems to be a permanent conflict between culture and politics. Should the organization of society serve the ends of politics (justice) or those of culture? Which type of polity is best able to promote culture and political life, that is the cultivation of greatness and true human excellence. In short, the political cannot be understood as one among other domains of culture. This course will explore this conflict between culture and politics by examining and close reading of the works of Nietzsche, Leo Strauss, and Carl Schmitt. In order to help structure our investigation of this conflict, we will read the above authors in light of the following questions: What does it mean to be human? What really is the good life? And what is the best regime?

PHIL552401
Ethics: An Introduction FENN, MARGARITA L
Fall 2020
Ethics, properly understood, is a practical discipline, i.e., an intellectually rigorous study with implications for personal and social life. This course will introduce students to the standard issues of contemporary Anglo-American ethics, but also to a broader selection of issues addressed in classical and contemporary philosophy. The goal is to develop a more adequate understanding of what it means to be practically reasonable and of how practical reasonableness can be embodied in personal and social life.

PHIL552801
Skepticism, Stoicism, and Neo-Platonism BYERS, SARAH C
Fall 2020
Ancient philosophy is the period following Aristotle and stretching into the third century A.D., Hellenistic and Roman Philosophy. A number of philosophical schools flourished: Stoicism, Epicureanism, Skepticism, Middle-Platonism, Neo-Platonism. Some had sophisticated answers to questions in epistemology, ethics, and metaphysics: Does the human mind use mental language? Are we responsible for our thoughts? Is pleasure the goal of life? What kinds of emotions does the wise person have? Can Plato's account of the Forms be enriched by Aristotle's account of God? What is the metaphysical status of Socrates' "daimon"? The primary emphases of the course are Stoicism and the Platonisms.

PHIL553401
Environmental Ethics: Value of Nature/Nature of Value BYRNE, PATRICK
Fall 2020
This course has theoretical and practical sides. Theoretically, it is an inquiry into value theory in general, and the value of (nonhuman) nature in particular. We will examine positions on the moral standing of nonhumans, such as anthropocentrism, animal rights and welfare, biocentrism, and ecocentrism. Practically, we will explore the social, political, economic, and ethical dimensions of environmental issues such as food, consumerism, climate change, energy, and sustainability. Our animating questions are: What are our duties to the natural world? How would our civilization have to change to meet these duties?

PHIL559301
Philosophy of Science STAN, MARIUS C
Fall 2020
An introduction to the central themes of twentieth century history and philosophy of science. Topics to be discussed include the classic and contemporary problems of demarcation, explanation, confirmation, laws of nature, inter-theoretic reduction, social and historical critiques of neo-positivism, and the realism-antirealism debate. We will examine some philosophical perspectives sometimes thought to be closely associated with science including empiricism, pragmatism, naturalism, and physicalism. We will also discuss a number of other issues, including questions about objectivity and the role of values in science, about the methods, scope, and limits of science, and about whether science provides anything like a worldview.

PHIL565001
Law and Interpretation FRIED, C GREGORY
Fall 2020
This course will examine theories of interpretation (hermeneutics) and the practice of interpretation in law. We will address interpretation as a fundamental feature of human understanding, using religious and literary texts, and then specific schools of legal interpretation, including originalism, strict construction, and the so-called living constitutional approach, using both American constitutional cases (Second Amendment, same-sex marriage, and others) and disputes in scriptural interpretation, such as the debate over the ordination of women. A particular focus will be the question of law at the limit, such as instances of executive law-breaking. Authors will include Aristotle, Aquinas, Gadamer, and Schmitt, as well as Dworkin, Scalia, and Breyer.

PHIL635001
Kant on the Arguments for God's Existence BASILE, GIAMPIERO
Fall 2020
The demonstration of God's existence is the main topic of the most relevant among Kant's pre- critical writings: The Only Possible Argument in Support of a Demonstration of the Existence of God. In this work, Kant examines first the possibility of a deduction a priori, then the possibility of arguments a posteriori. Finally, he discusses what he considers the only possible basis or condition for every proof of God's existence, a priori as well as a posteriori. The Only Possible Argument offers an original contribution to the debate on this issue in modern philosophy, from Descartes to Christian Wolff. It also works out in a systematic way some of the theses exposed in earlier works like Universal Natural History and the dissertation Nova dilucidatio, and prepares the later developments in the Transcendental Dialectic of the Critique of Pure Reason. A selected numbers of studies on Kant's Only Possible Argument will be taken into account.

PHIL665401
Contemporary Aristotelian Ethics LOTT, MICAH
Fall 2020
This course examine some of the most interesting recent work in moral philosophy done from a broadly Aristotelian perspective. Our course will be divided into two mains section. In the first section, we will consider accounts of fundamental normative notions like: goodness, the good of, good as, and good for. We will pay special attention to possible connections between goodness and nature. In the second section we will look at Aristotelian accounts of practical reasoning and practical wisdom. As part of this, we will

consider the eudaimonistic structure of Aristotelian ethics, and challenges to eudaimonism.

PHIL667001
Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL750001
Hegel's Philosophy of Spirit MAGRI, ELISA
Fall 2020
This course is dedicated to Hegel's philosophy of Geist, which is often translated in English as "spirit," "mind," or "collective cultural mindset." However, the full meaning of Geist in Hegel's philosophy comprises a more fine-grained and richer development of affective, psychological, and practical elements. Drawing on Hegel's Phenomenology of Spirit as well as on the sections on the Philosophy of Spirit of Hegel's Encyclopaedia, this course will explore the main philosophical questions that surround the dimension of Geist in both Hegel's philosophy and contemporary debates, including Hegel's departure from transcendental philosophy and the nature-spirit relation, the novelty of Hegel's philosophical anthropology, the problem of recognition, and the quest for absolute knowledge.

PHIL755001
Seminar in Comparative Phenomenology JOHNSON, DAVID W
Fall 2020
This course addresses the problem of how to understand the nature and significance of the relation between self and other in phenomenology. We will examine Heidegger on co-existence (Mitsein) and Merleau-Ponty's understanding of intersubjective relations as a primordial, pre- subjective field. We can compare these views with similar ideas found in the work of the Japanese phenomenologists Watsuji and Kimura and the new Confucian thinker Tu Wei-Ming, and contrast these notions with the thought of Sartre and Levinas, which disrupts the continuity between self and other. We will also consider what Hermann Schmitz's and Eugene Gendlin's discussion of embodiment and affectivity can add to our investigations. The conception of intersubjective experience that emerges from these comparisons reframes our sense of how social relations function in the constitution of the self and how they serve as a primary source of existential meaning. These considerations also call for a shift in our self-understanding and opens the way to a renewed focus on life as a primary theme for phenomenology.

PHIL770301
Aristotle and Plotinus: Ethics GURTLER, GARY
Fall 2020
The purpose of this course will be twofold: (1) An analysis of the moral and intellectual virtues in relation to happiness as the goal of ethics. Aristotle understands human nature as social, so how do individuals attain virtue, especially as member of society and as friends? (2) Plotinus reacts to Aristotelian eudaimonism, which he finds deficient in relation to the Platonic goal of the ascent of the soul. Despite Plotinus' critique, he incorporates ideas from both Plato and Aristotle into a more complex understanding of human nature that includes, among other things, the first explicit theory of the unconscious.

PHIL116001
The Challenge of Justice SNYDER, JOSHUA R
Spring 2021
This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.
Credits: 03
Room and Schedule: STOKES HALL 101N,T TH 3*; **Satisfies Core Requirement:** Cultural Diversity **Prerequisites:** None
Corequisites: None
Cross-listed with: THEO2160
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: This course satisfies the introductory requirement for students taking the minor in Faith, Peace, and Justice Studies. Other students interested in examining the problems of building a just society are welcome.
Status: OPEN

PHIL116002

PHIL171101
The American Divide: The Philosophy of Inequality MCGILL, CHERIE
Spring 2021
Concern over inequality in the U.S. has shown itself in movements like Occupy Wall Street, the Fight for a Fifteen Dollar Minimum Wage, and Black Lives Matter. These courses will examine the meaning, causes, and consequences of inequality from the perspectives of Philosophy and Economics. Providing a broad picture of the current state of the U.S. economy, and analyzing the role of economic policy in determining opportunities and outcomes, the courses will prepare students to develop their own views about how past economic choices shaped current economic realities, and how we might create a more equitable future.
Credits: 03
Room and Schedule: M W F 1;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Philosophy **Prerequisites:** None
Corequisites: None
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: This is an Enduring Questions course and is open to Freshman only.
Status: CLOSED

PHIL172001
Animals in the Moral Imagination: Beyond Human Justice FITZPATRICK, MELISSA A
Spring 2021
This course will provide students with an introduction to the work of philosophy by probing our understanding of the relation between humans and non-humans, and examining the moral implications of that relation. This will involve analyzing how we have imagined our relationship with non-humans in the past (and why), and evaluating human decision-making in relation to animal welfare. Some of the questions that we will probe throughout the course include: how are the boundaries between humans and animals constructed? Why do they matter? And what values inform them? How does our understanding of non-humans influence our understanding of ourselves? What is the relation between social hierarchies within human society and our understanding of non-humans? Is there a relation between our treatment of animals and our treatment of marginalized groups? In the wake of the ecological crisis, should we recast our relation with animals? And if so, how?

How do we change what we value? Is this something that we can voluntarily will? Though we will primarily focus on the ethical and existential dimensions of these questions, we will explore the metaphysical, epistemological, and political dimensions of them as well.

PHIL215101
Philosophical Perspectives on Science II STAN, MARIUS C
Spring 2021
Continued Course. Part II. This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include the structure of a scientific theory, evidence and knowledge in science, the nature of scientific explanations, and the role of values in science. As paradigmatic examples, we will explore major breakthroughs by Archimedes, Newton, Darwin, and Einstein. Open to science and pre-med majors.

PHIL221601
Boston: An Urban Analysis MANZO, DAVID W
Spring 2021
This course is intended for PULSE students who are willing to investigate, analyze, and understand the history, problems, and prospects of Boston's neighborhoods. With the exception of the fourth session, class meetings in the first half of the semester will meet on campus. Class number four will meet in the Skywalk Observation Deck at the Prudential Center. For the second half of the semester, as snow banks give way to slush and sun and blossoms, we will meet in the South End of Boston for a case study of a most intriguing and changing inner- city neighborhood.

Mass Incarceration: Philosophical and Theological Perspectives LOTT, MICAH
Spring 2021
This course will explore problems of justice in relation to incarceration in the United States with particular attention to attention to race, social class, gender, and immigration status. Students will read authors writing on the philosophy of race, gender, and class in relation to incarceration, the phenomenology of solitary confinement and the concept of "social death," church documents and theological works on incarceration, and works on restorative justice and other models of justice that serves the common good. Catholic Social Justice teachings and discussion will also be a part of the course. The course will also address interconnections between immigration and incarceration. This course will be offered as a PULSE elective, in which students undertake four hours per week of service in the City of Boston at institutions such as Suffolk County Jail and non-profits that provide transitional services for returning residents or formerly incarcerated individuals or that advocate for prison reform. The PULSE office will vet and coordinate students' placements and serve as a liaison with community partners.

PHIL226201
Telling Truths II: Depth Writing as Service RIZZUTO, ALEXIS A
Spring 2021
This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own "solutions." We will explore the benefits and liabilities of social media in emerging change movements.
Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings.

PHIL244401
The Vegetative Soul: The Hidden Life of Plants VANDEWALL, HOLLY R
Spring 2021
By weight, more than 80% percent of the living things on the earth are plants, and without them the earth's animals, including humans, would perish within weeks. But philosophy has spent a vanishingly small part of its efforts in considering this form of life, generally relegating plants to the status of minimally alive, but essentially uninteresting. As Michael Pollan notes, "plants are so unlike people that it's very difficult for us to appreciate fully their complexity and sophistication. Yet plants have been evolving much, much longer than we have, have been inventing new strategies for survival and perfecting their designs for so long that to say that one of us is the more 'advanced' really depends on how you define that term, and what 'advances' you value'." This class will consider how humans have historically regarded the plant kingdom, what we can learn from the challenging imaginary exercise of attempting to understand how they live, and how we might reconsider the world if we came to regard the plant kingdom not as passive subjects of human actions, but as powerful and vital actors in their own right.

PHIL326001
Existentialism and Philosophy of Existence: Sartre, Heidegger, Arendt, and Jaspers BASILE, GIAMPIERO
Spring 2021
The course focuses on two fundamental questions concerning Existentialism and the Philosophy of Existence. The first question is about the relationship between existence as freedom and transcendence. According to every account of the philosophy of existence, existence is a synonym for freedom. This freedom can be understood, on one side, as an original structure of the human condition and self-determination, so that human being transcends itself through its own project, becoming, by its own decision, what it is not yet. On the other side, human freedom can be conceived as the answer to a call, so that existence does not mean the self- positing of human being, but has its own source in some form of transcendence. The second question concerns the idea of the philosophy of existence as, at the same time, a philosophia perennis and a specific historical event. Throughout the history of philosophy, there have been philosophers who deal with existential questions and criticize a merely speculative idea of existence. Both questions will be treated with reference to Sartre, Heidegger, Hannah Arendt, and Jaspers.

PHIL421101
Hegel, Kierkegaard, Nietzsche: Art, Religion, and the Question of Meaning RUMBLE, VANESSA P
Spring 2021
In the aftermath of the French Revolution, Hegel, Kierkegaard, and Nietzsche rushed to define the larger significance of the French Revolution, witnessing in so doing to the definitive arrival of modernity in Europe. The philosophers propose three quite compelling presentations of the role of art and religion in the modern world. While Hegel stages a dialectic which calls for the repeated crucifixion and resurrection of reason, Kierkegaard offers a consequential reinterpretation of the notion of original sin as anxiety, and Nietzsche points us "beyond the law." We will look at the development of their thinking through key works, turning ultimately to the critiques offered by Heine, Marx, and Weber.

PHIL438701
Epistemology ATKINS, RICHARD
Spring 2021
Philosophy is full of wonderfully perplexing arguments aimed at undermining our claims to knowledge. Like this one: If I know I have two hands, then I know I'm not just a brain in a vat. But, I don't know I'm not just a brain in a vat. So, I don't know I have two hands. Or this one: A claim is known only if it is justified. Claims cannot rest on themselves for justification, cannot depend on nothing for justification, and cannot be justified by an infinite series of propositions. But as those are the only options, we must not know anything. Or this one: I believe that God exists, but many of my epistemic peers and superiors believe that God does not exist.
Therefore, I have a strong countervailing reason to believe God does not exist such that my belief is not justified. This course will examine these and other puzzling arguments about knowledge, justification, and disagreement.

PHIL440501
Greek Philosophy BYERS, SARAH C
Spring 2021
This course is organized around the central philosophical questions asked and answered by philosophers in the ancient Greek-speaking world. Topics include theories of material bodies, change and time, elemental physics, and entities and their predicates; whether anything immaterial or immutable exists and, if so, its relation to the changing cosmos; the existence and nature of God or gods; the existence and nature of the human soul and its relation to the human body; the criterion of truth and the nature of language; the criterion of ethics; theories of animal and human cognition and motivation. We will consider Plato, Aristotle, and, more briefly, some pre-Socratic and post-Aristotelian authors such as Plutarch, Epictetus, and Plotinus.

PHIL440701
Medieval Philosophy KREEFT, PETER J
Spring 2021
Far from being monolithic and repetitive, the Middle Ages were a creative period during which multiple solutions were proposed to make sense of the world and of human life. The legacy of Antiquity, the philosophic and scientific knowledge of the time, and religious views were combined in original syntheses. The aim of the course is to provide a precise picture of this diversity, through a study of the main problems that a wide range of authors (Christian thinkers from St. Augustine to Ockham, but also Islamic and Jewish philosophers) faced. Syllabus on www2.bc.edu/jeanluc-solere/pl407.html.

PHIL442901
Freud and Philosophy RUMBLE, VANESSA P
Spring 2021
This introductory course for the interdisciplinary minor in psychoanalysis (open to all interested) is designed to acquaint students with the scope and evolution of Freud's thinking and with significant developments in psychoanalysis since his time. Students will study and assess Freud's and Breuer's first formulation of the nature and etiology of hysteria; Freud's groundbreaking work in dream interpretation and the nature of unconscious processes; Freud's attempt to apply his novel theory of unconscious mechanisms to cultural anthropology as well as individual psychology; and the implications of the ongoing revisions in Freud's classification of the drives.

PHIL444501
The Greeks and Their Gods DECHIARA-QUENZER, DEBORAH
Spring 2021
How did the Greeks view their gods? In this course, we will use Greek literature and philosophy to answer that question. We will read some of the more traditional mythological accounts in Greek literature presented in Hesiod's Theogony, Homer's Iliad and Odyssey, Euripides' Bacchae, and Aeschylus' Eumenides. We will then turn to the distinctive philosophical accounts of the gods given by Plato in works such as Republic II, the Myth of the Charioteer in the Phaedrus, the Demiurge in the Timaeus, and by Aristotle on their nature and contemplation in Metaphysics XII and Nicomachean Ethics X.

PHIL524901
British Empiricists DAVENPORT, ANNE A
Spring 2021
Why are the British Empiricists both perplexing and indispensable? Do they deserve the odium that they often receive? How fundamental are they to our American identity? This course conducts an in-depth examination of John Locke, George Berkeley, and David Hume. We look at the entire spectrum of their concerns, from theories of the self to political science, ethics, and aesthetics. We tease out and discuss their views of the "good life." We probe their arguments critically and look at some of their followers and opponents in order to understand more fully the impact of their positions. We end with Rousseau's critique of British Empiricism.

PHIL541801
Capstone: Working, Playing, Being STOREY, DAVID E
Spring 2021
The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

PHIL551801
Philosophy of Imagination KEARNEY, RICHARD
Spring 2021
Readings in the philosophy of imagination from ancient myth to post-modernity. Beginning with Biblical and Greek accounts of images and image-making, this course will explore three main paradigm shifts in the Western history of imagination: (1) the ancient paradigm of the Mirror (Plato to Augustine); (2) the modern paradigm of the Lamp (Kant to Sartre); and (3) the postmodern paradigm of the circular Looking Glass (Lacan to Derrida). The course will conclude with a critical evaluation of the political and ethical functions of imagination in our contemporary civilization of cyber fantasy, simulation, and spectacle.

PHIL552901
Metaphysics GURTLER, GARY
Spring 2021
The course begins with classical modern philosophers. Their problems concern the relation of mind and body, the possibility of objective knowledge, and cause and effect. Their method is that of science, combining both empirical and logical elements. After these modern thinkers, giving our cultural assumptions, we turn to Ancient and Medieval philosophers. Their problems concern the relation of spirit and matter, the analogy of being and truth, and causal explanation. Their method is one of dialogue. With this different set of problems and method, we will be able to evaluate the relative strengths of these different philosophical positions.

PHIL554901
Selected Readings in Phenomenology MORAN, DERMOT
Spring 2021
This course offers a critical introduction to phenomenology, one of the most important movements of twentieth-century European philosophy, including its French existentialist development, and its critics. The major themes and movements in phenomenology and existentialism will be studied through several key thinkers: Franz Brentano, Edmund Husserl, Martin Heidegger, Edith Stein, Maurice Merleau-Ponty, Jean-Paul Sartre, Emmanuel Levinas. Themes that will be critically considered include: intentionality, phenomenological description, perception and embodiment, moods and emotions, self-consciousness, the nature of the self, sociality, and the surrounding lifeworld. The course will have both a historical and a critical orientation with an emphasis on reading selected primary-source texts in English translation. At least one year of Philosophy required.

PHIL555301
Capstone: Poets, Philosophers, and Mapmakers MCNELLIS, PAUL W
Spring 2021
We go through life with mental maps of reality in various degrees, implicit or explicit. A liberal arts education presupposes such a map of the intelligible world. Is it accurate? What does your map of reality look like? How has it changed since freshman year? The goal of the seminar is to help you see what kind of map you implicitly have now and to begin to ask what you want the map to look like ten years after graduation. How do you develop an open rather than closed map?
Credits: 03
Room and Schedule: STOKES HALL 209S,TH 4 30-6 50;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. Completion of Philosophy and Theology core.

PHIL556201
Virtue Ethics GARCIA, JORGE L
Spring 2021
This course chiefly examines recent work on the nature, structure, types, of moral virtues, their relation to impersonal values, and their place within ethical theory, situating these discussions relative to Aristotelian accounts. Readings will be drawn from texts by Robert Adams, Robert Audi, Philippa Foot, Thomas Hurka, Michael Slote, Nancy Snow, Christine Swanton, Judith Thomson, Linda Zagzebski, and others.

PHIL557701
Symbolic Logic: Theory and Practices ATKINS, RICHARD
Spring 2021
An introduction to the powerful ways the logical forms woven into deductive reasoning and language can be analyzed using abstract symbolic structures. The study of these structures is not only relevant for understanding effective reasoning, but also for exploring the Anglo- American analytic philosophical tradition and foundations of mathematics, computer science, and linguistics. Philosophically interesting properties about logical systems will be explored, including the task of proving whether a logical system is complete and consistent. A number of interesting topics of twentieth-century logic will be briefly considered, such as set theory, Russell's paradox, and Goedel's theorems.

PHIL566001
Good and Evil LOTT, MICAH
Spring 2021
This class examines two areas in our moral thinking. First, we will look at various conceptions of "extreme" moral goodness: the saint, the sage, the hero, and other moral exemplars. Second, we will look at the notion of "extreme" badness, i.e., evil or wickedness. We will consider evil both as an ordinary phenomenon and an exceptional one. The guiding question of our reflections will be: what can we learn about morality by thinking about moral extremes? We will approach our topic mainly through philosophical texts, but also through works of film and literature.

PHIL660501
Augustine BYERS, SARAH C
Spring 2021
In this course we examine questions in epistemology, ethics and metaphysics using major works of Augustine (354-430 AD/CE), supplemented by works of contemporary philosophers on related themes (Kretzmann, Matthews, MacDonald, VanInwagen). We will aim at depth of understanding and breadth of knowledge, contextualizing Augustine as a philosopher of late antiquity in dialogue with the Hellenistic schools (Stoicism, Skepticism, Neo-Platonism) whose philosophy is still of interest today. Topics include the nature of faith, skepticism, the problem of evil, the nature of God, moral development and

conversion, the origin and characteristics of the natural world, including the human soul and body.

PHIL667001
Technology and Culture GRIFFITH, WILLIAM
Spring 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL771501
Science in Ancient and Medieval Thought SWEENEY, EILEEN C
Spring 2021
What counts as 'science,' and are the sciences different from the liberal arts? Where did the notion that these two realms of thinking are fundamentally different with different standards of evidence and truth, and different levels of certainty and reliability? This seminar will be an attempt to consider these questions through an exploration of the idea of science and the definitions and methods of the sciences beginning with Aristotle and Augustine and moving through the Middle Ages in such thinkers as Hugh of St. Victor and Roger Bacon, Thomas Aquinas, Bonaventure Scotus and Ockham, Al-Farabi and Al-Ghazali.

PHIL782501
Concepts of God in 20th Century Jewish Thought NISENBAUM, KARIN
Spring 2021
God stands as the central pillar of all monotheistic religions. What kind of being is God(if a being at all)?Jewish philosophers/theologians in the 20th century have offered wide-ranging answers to this question; their different answers have shaped their different approaches to religious life/thought as a whole. We will investigate the different conceptions of God that have been proposed by Jewish philosophers/theologians in the 20th century. These conceptions will range from God conceived as transcendent/ineffable (negative theology), to God conceived as an unlimited whole encompassing everything (pantheism);from God conceived as the unique/perfect being (ethical monotheism),to God conceived as the Eternal Thou or face of the other(Jewish existentialism) and many more. We will consider how these conceptions of God relate to and emerge in response to previous conceptions, and will broach the question whether political, cultural, or economic conditions pose special challenges for the formation of conceptions of God. We will draw on works by philosophers such as: Hermann Cohen, Franz Rosenzweig, Emil Fackenheim, Martin Buber, Emmanuel Levinas, Hans Jonas, and more. For each of the conceptions of God we will ask: What is its content? What is its rationale? What kind of life does it call forth? What is its religious/spiritual significance? By broaching one of the most fundamental issues in the phil of religion, this course introduces some of the key figures in 20th century Jewish Philosophy.

PHIL786501
Aristotle's Physics and Metaphysics WIANS, WILLIAM R
Spring 2021
Aristotle consistently distinguishes between physics and metaphysics--between what he calls second and first philosophy. Physics studies natural things--things that change in any of several ways according to an inner principle governing the changes. First Philosophy studies substances that are immovable and unchanging, including primarily but not exclusively Aristotle's god. But though he separates the two sciences in principle, the works we know as the Physics and the Metaphysics each contribute frequently and meaningfully to the study of the other--to such an extent that commentators often neglect the crucial differences between them, and thus fail to understand Aristotle's full philosophy of nature in relation to the knowledge of what lies beyond it. The course will explore Aristotle's central division between Second and First Philosophy. Its first half will begin with a close reading of the opening books of the Physics, then move on to a consideration of the Unmoved Mover as presented in Physics 7 and 8. The second part of the course will turn to the Metaphysics, particularly its first book and books 7 and 12. By the end of the course, students should grasp how the two disciplines are separated by a fundamental difference in principles, which in turn implies a difference in the degree of knowledge to which each may aspire of its proper objects, but yet not only allows but may even require the intertextual references and resonances in the Physics and Metaphysics.

PHYS210001
Introduction to Physics I (Calculus) ENGELBRECHT, JAN
Summer 2020
First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Doctoral Continuation BEDELL, KEVIN
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS991102
Doctoral Continuation
DI BARTOLO, BALDASSARE
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS991104
Doctoral Continuation DEPT IHUA
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS991105
Doctoral Continuation BAKSHI, PRADIP M
Summer 2020
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation
Credits: 00
Room and Schedule: BY ARRANGEMENT;MAY 13 - AUG 20;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

Physics Courses: Fall 2020

PHYS110001
Structure of the Universe I BEDELL, KEVIN
Fall 2020
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: CORE **Comments:** None **Status:** OPEN

PHYS150001
Foundations of Physics I KEMPA, KRZYSZTOF
Fall 2020
First semester of a two-semester algebra-based introductory physics course sequence, primarily for non-science majors, that covers the basic principles of physics. Emphasis is placed on problem-solving to demonstrate the implications of these principles, and to develop analytical skills. This course is similar to PHYS2100 in pace and content but with less emphasis on mathematical technique. First semester covers classical mechanics, including Newton's laws, energy, rotational motion, fluids, thermal physics, oscillations, waves, and gravitation.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Recommended laboratory (optional): PHYS2050-2051.
Status: OPEN

PHYS160001
Special Projects None
Fall 2020
Individual programs of study and research under the direction of physics faculty members.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: Credits and requirements by arrangement with the approval of the Chairperson.
Status: OPEN

PHYS205001
Introductory Physics Laboratory I HERCZYNSKI, ANDRZEJ
Fall 2020
A laboratory course that provides an opportunity to perform experiments on topics in mechanics and acoustics. This lab is intended for students in PHYS2100-2101 or PHYS2200- 2201.
Credits: 01
Room and Schedule: HIGGINS HALL 253,M 12-2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT **Comments:** Lab fee required **Status:** OPEN

PHYS205003
Introductory Physics Laboratory I HERCZYNSKI, ANDRZEJ
Fall 2020
A laboratory course that provides an opportunity to perform experiments on topics in mechanics and acoustics. This lab is intended for students in PHYS2100-2101 or PHYS2200- 2201.
Credits: 01
Room and Schedule: HIGGINS HALL 253,M 3-5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT **Comments:** Lab fee required **Status:** OPEN

PHYS205004
Introductory Physics Laboratory I HERCZYNSKI, ANDRZEJ
Fall 2020
A laboratory course that provides an opportunity to perform experiments on topics in mechanics and acoustics. This lab is intended for students in PHYS2100-2101 or PHYS2200- 2201.
Credits: 01
Room and Schedule: HIGGINS HALL 255,M 3-5; **Satisfies Core Requirement:** None **Prerequisites:** None

PHYS210001
Introduction to Physics I (Calculus) GOCHAN, MATTHEW
Fall 2020
First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-

solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.
Credits: 04
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** MATH1100. (May be taken concurrently). **Corequisites:** PHYS2110.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: PHYS2050 is the laboratory course to supplement the lecture course material.
Status: OPEN

PHYS310001

Vibrations and Waves BURCH, KENNETH S
Fall 2020
This course is an introduction to the phenomena of vibrations and waves that span most of the areas in physics. The basic subject matter includes the following: mechanical vibrations and waves, free and forced vibrations and resonances, coupled oscillations and normal modes, vibration of continuous systems, propagation of mechanical and electromagnetic waves, phase and group velocity, interference and diffraction. The course also covers the basic concepts in first and second order differential equations, matrices, eigenvalues and eigenvectors and Fourier series.

PHYS351001
Contemporary Electronics Laboratory ZHOU, BRIAN B
Fall 2020
A laboratory course, with lecture component, providing hands-on experience, including a brief review of fundamentals of electronics followed by a study of analog devices, including diodes, transistors, operational amplifiers, resonant circuits, and digital devices, including Boolean algebra, digital Gates, Timers, Counters, and practical combinations of Gates and other digital elements.
Credits: 02
Room and Schedule: HIGGINS HALL 140,M 12-1;HIGGINS HALL 140,TH 3-5 50;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required
Status: CLOSED

PHYS410001
Classical Mechanics RAN, YING
Fall 2020
This course studies classical mechanics at the intermediate level and develops analytical skills for later physics courses. It includes: single particle dynamics and oscillations; conservative forces and conservation laws; gravitation and central force motion; Lagrangian and Hamiltonian dynamics; system of particles and rigid body dynamics.
Credits: 04
Room and Schedule: T TH 12*;F 3;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None

PHYS440001
Quantum Physics I ENGELBRECHT, JAN
Fall 2020
First of a two-semester sequence providing a comprehensive treatment of the principles and applications of non-relativistic quantum mechanics. This semester focuses on basic principles. Topics covered include: historical development of quantum mechanics; the uncertainty principle; the Schrodinger equation and its solution for simple one-dimensional potentials, including constant potentials and the harmonic oscillator; formal presentation of the postulates of quantum mechanics using Dirac notation; commutation relations; basic scattering theory; formulation of Schrodinger equation in three-dimensions, central potentials, orbital angular momentum, and the hydrogen atom; spin angular momentum and the addition of angular momenta.

PHYS454501
Condensed Matter Physics ZELJKOVIC, ILIJA
Fall 2020
Condensed matter physics concerns all aspects of the physics of "condensed" materials, that is, solids, liquids, gels, and plasma. It is the science behind many technologically-relevant applied and integrated science and engineering fields. This course primarily covers the solid state, starting with crystal lattices and their vibrations (phonons), and descriptions of crystalline metals, semiconductors, insulators, and superconductors. It covers in some detail the electrical, magnetic, optical, and thermal properties of materials, and introduces the student to noncrystalline solids and so-called "soft condensed matter."
Credits: 03
Room and Schedule: M W F 2;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually

PHYS460001
Statistical Mechanics and Thermodynamics BROIDO, DAVID
Fall 2020
The results of classical thermodynamics are deduced from a statistical basis, including the concepts of temperature and entropy, and the three laws of thermodynamics. Applications to ideal and real gases. Basic elements of statistical mechanics, including the canonical ensemble, partition function, equipartition theorem and Maxwell velocity distribution. Simple application of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac Statistic.
Credits: 04
Room and Schedule: T TH 10 30*;W 3;ONLINE;SYNCHRONOUS;

PHYS700001
Physics Colloquium ENGELBRECHT, JAN
Fall 2020
This is a weekly discussion of current topics in physics. No academic credit. No fee.
Credits: 00
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS771101
Classical Mechanics RUBIN, RON S
Fall 2020
Kinematics and dynamics, variational principles, Lagrangian and Hamiltonian formulations, canonical transformations, Hamilton-Jacobi theory, small oscillations, rigid body motion, relativistic mechanics.
Credits: 03
Room and Schedule: HIGGINS HALL 260,M W F 11; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS772201
Statistical Physics II CHEN, XIAO
Fall 2020
Fluctuation-dissipation theorem, Kubo formalism, electron gas, of phase transitions and critical phenomena, Landau theory of phase transitions, critical exponents, scaling and an introduction to renormalization group methods.
Credits: 03
Room and Schedule: HIGGINS HALL 260,M W F 10; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

Status: OPEN

PHYS774101
Quantum Mechanics I WANG, ZIQIANG
Fall 2020
Introduction includes elements of the linear algebra in Dirac notation. Topics include postulates of quantum theory, simple problems in one dimension, classical limit, harmonic oscillator, Heisenberg uncertainty relations, systems with N-degree of freedom, symmetries, rotational invariance and angular momentum, hydrogen atom, and an introduction to spin. Also included is the path integration formulation of quantum theory.
Credits: 03
Room and Schedule: HIGGINS HALL 263,M W 9-10 50;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS783501
Mathematical Physics I BAKSHI, PRADIP M
Fall 2020

Matrix algebra, linear vector spaces, orthogonal functions and expansions, boundary value problems, introduction to Green's functions, complex variable theory, and applications.
Credits: 03
Room and Schedule: HIGGINS HALL 260,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE

Status: OPEN

PHYS872201
Quantum Computation: Software and Hardware None
Fall 2020
The course will be a graduate-level course covering quantum computation and quantum information. Topics include a review of classical and quantum methods, quantum gates, classical and quantum algorithms and quantum supremacy, quantum key distribution, entanglement-as-a-resource, and the physical realization of quantum computers. Prerequisites include undergraduate quantum mechanics and linear algebra.
Credits: 03
Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: GRADUATE
Comments: None
Status: CANCELLED

PHYS876101
Solid State Physics I TAFTI, FAZEL
Fall 2020
Introduction to the basic concepts of the quantum theory of solids. Drude and Sommerfeld theory, crystal structure and bonding, theory of crystal diffraction, and the reciprocal lattice, Bloch theorem and electronic band structure, nearly free electron approximation and tight binding method, metals, semiconductors and insulators, dynamics of crystal lattice, phonons in metals, semiclassical theory of electrical and thermal transport, introduction to magnetism and superconductivity.
Credits: 03
Room and Schedule: HIGGINS HALL 263,T TH 9*; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PHYS877101
Topology in Condensed Matter FLEBUS, BENEDETTA
Fall 2020
A seminar course on topology in condensed matter given in accordance with current research interests or needs of the students and faculty of the department.
Credits: 03
Room and Schedule: HIGGINS HALL 275,T TH 10 30*;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Periodically

Physics Courses: Spring 2021

PHYS110101
Structure of the Universe II BAKSHI, PRADIP M
Spring 2021
An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.
Credits: 03
Room and Schedule: M W F 12;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** CLOSED

Foundations of Physics II GRAF, MICHAEL J
Spring 2021
Second semester of the two-semester algebra-based introductory physics course sequence primarily for non-science majors. This course is similar to PHYS2101 in pace and content but with less emphasis on mathematical technique. Topics to be covered are fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism, electromagnetic oscillations and waves, physical optics, and, if time allows, basic concepts and applications of special relativity and quantum physics.
Credits: 03
Room and Schedule: T TH 1 30*;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Recommended laboratory (optional): PHYS2050-2051.
Status: OPEN

PHYS160001
Special Projects None
Spring 2021
Individual programs of study and research under the direction of physics faculty members.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Credits and requirements by arrangement with the approval of the Chairperson.
Status: OPEN

PHYS205101
Introductory Physics Laboratory II HERCZYNSKI, ANDRZEJ
Spring 2021
A laboratory course that provides an opportunity to perform experiments on topics in electricity and magnetism and physical optics. This lab is intended for students in PHYS2200-2201 or PHYS2100-2101.
Credits: 01
Room and Schedule: HIGGINS 253,M 12-2; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.

Status: CLOSED

PHYS205103
Introductory Physics Laboratory II HERCZYNSKI, ANDRZEJ
Spring 2021
A laboratory course that provides an opportunity to perform experiments on topics in electricity and magnetism and physical optics. This lab is intended for students in PHYS2200-2201 or PHYS2100-2101.
Credits: 01
Room and Schedule: HIGGINS HALL 253,M 3-5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.

Status: CLOSED

PHYS205104
Introductory Physics Laboratory II HERCZYNSKI, ANDRZEJ
Spring 2021

A laboratory course that provides an opportunity to perform experiments on topics in electricity and magnetism and physical optics. This lab is intended for students in PHYS2200-2201 or PHYS2100-2101.
Credits: 01
Room and Schedule: HIGGINS 255,M 3-5; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: Lab fee required.

PHYS210101
Introduction to Physics II (Calculus) GOCHAN, MATTHEW
Spring 2021
Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.
Credits: 04
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** MATH1101. (May be taken concurrently). **Corequisites:** PHYS2111.
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: PHYS2051 is the laboratory course to supplement the lecture course material. No class on 07/04/2017, make-up class is scheduled on 07/05/2017.
Status: OPEN

PHYS220101
Introductory Physics II (Calculus) ZELJKOVIC, ILIJA
Spring 2021
Second semester of a calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences, and limitations of the classical principles of physics; similar to PHYS2101 in pace and content but at a greater depth appropriate for physical science majors. Class size is limited to promote classroom discussion. Topics include fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism and electromagnetic oscillations and waves, and selected topics in physical optics.
Credits: 04
Room and Schedule: M W F 9;TH 3;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Natural Science **Prerequisites:** MATH1103. (May be taken concurrently). **Corequisites:** None
Cross-listed with: None **Frequency:** Annually **Student Level:** CORE
Comments: PHYS2051 is the laboratory course to supplement the lecture course material.

PHYS330001
Introduction to Modern Physics WANG, ZIQIANG
Spring 2021
This course is a transition between introductory and advanced physics courses for science majors. The basic subject matter includes the two principal physical theories of the twentieth century--relativity and quantum mechanics. Included are the following: the Lorentz transformation, kinematic consequences of relativity, origin of the quantum theory, one- dimensional quantum mechanics, quantum mechanics of a particle in three dimensions, applications to the hydrogen atom and to more complex atoms, molecules, crystals, metals, and semiconductors.

PHYS420001
Electricity and Magnetism ZHOU, BRIAN B
Spring 2021
To provide students with the background in electricity and magnetism necessary to deal with experimental problems in electromagnetism. Part 1 will present the mathematical foundations for the entire treatment of electromagnetism. Part 2 deals with Coulomb's law and the electrostatics based on this law. Part 3 addresses stationary currents and magnetostatics. Part 4 deals with induction and quasi-stationary phenomena, self- and mutual-induction. Part 5 presents a treatment of Maxwell equations and the consequences of these equations, e.g., energy and momentum conservation, Plane waves, reflection, and refraction. Time permitting, we will discuss radiation from moving charges.

PHYS430001
Numerical Methods and Scientific Computing ENGELBRECHT, JAN
Spring 2021
This course introduces students to a variety of numerical methods and then applies these methods to solve a broad range of scientific problems. These problems include examples from physics as well as several other disciplines, including chemistry, mathematics, economics, and finance. Numerical techniques for solving problems expressed in terms of matrix, differential and integral equations will be developed. Other topics will include statistical sampling and Fourier and Laplace transforms.
Credits: 04
Room and Schedule: HIGGINS HALL 260,T TH 9-11 45;
Satisfies Core Requirement: None
Prerequisites: MATH2202. With permission of the Instructor.
Corequisites: None
Cross-listed with: ECON2215
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: This course is intended for students who plan to minor in Scientific Computation. It is also an elective for Physics majors.
Status: OPEN

PHYS435001
Experiments in Physics I OPEIL, CYRIL P
Spring 2021
The course includes experiments in optics, solid state physics, nuclear physics, spectroscopy, x- ray, and electron diffraction. Students will carry out independent projects aimed at acquiring a sound understanding of both the physical principles involved in each subject area and of the principles and problems of modern experimental physics.

Credits: 03
Room and Schedule: HIGGINS HALL 250,T TH 1 30-4;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: Lab fee required.

PHYS440101
Quantum Physics II TAFTI, FAZEL
Spring 2021
Second semester of the PHYS4407-4408 sequence, focusing on applications. Topics covered include: treatment of the many-particle systems, including effects of spin and symmetry of the wave function; many-electron atoms and the periodic table; basic elements of quantum statistics; approximation techniques, including non-degenerate and degenerate perturbation theory and the variational principle; time-dependent perturbation theory and the interaction of electromagnetic radiation with matter.

PHYS459501
Introduction to Quantum Computing RUBIN, RON S
Spring 2021
This course is an introduction to the new field of quantum computation. What is a quantum computer? How does it work? What can it do? The course will explore the mathematics, physics, and computer science associated with these questions. The course will be taught at the senior undergraduate/graduate level, and prior courses in quantum mechanics and linear algebra will be essential. Senior undergraduate and graduate students in mathematics, computer science, and chemistry with this background are encouraged to enroll. Topics: Thermodynamics of Computation, Axioms of Quantum Mechanics, Composite Systems, Qubits, Intrinsic Spin of Electrons and Photons, Density Matrix Theory, Bloch Sphere, Entanglement, Schmidt Number and Entanglement Entropy, Entanglement of Space with Spin, Bell Inequalities, EPR, Dense Coding, Quantum Key Distribution, Circuit Model of Computation, Quantum Circuits, Deutsch Algorithm, Bernstein-Vazirani Algorithm, Simon's Problem, Quantum Search, Quantum Period Finding, Quantum Fourier Transform, Factoring Prime, RSA Encryption.

PHYS876001
Introduction to Quantum Computing RUBIN, RON S
Spring 2021
This course is an introduction to the new field of quantum computation. What is a quantum computer? How does it work? What can it do? The course will explore the mathematics, physics, and computer science associated with these questions. The course will be taught at the senior undergraduate/graduate level, and prior courses in quantum mechanics and linear algebra will be essential. Senior undergraduate and graduate students in mathematics, computer science, and chemistry with this background are encouraged to enroll. Topics: Thermodynamics of Computation, Axioms of Quantum Mechanics, Composite Systems, Qubits, Intrinsic Spin of Electrons and Photons, Density Matrix Theory, Bloch Sphere, Entanglement, Schmidt Number and Entanglement Entropy, Entanglement of Space with Spin, Bell Inequalities, EPR, Dense Coding, Quantum Key Distribution, Circuit Model of Computation, Quantum Circuits, Deutsch Algorithm, Bernstein-Vazirani Algorithm, Simon's Problem, Quantum Search, Quantum Period Finding, Quantum Fourier Transform, Factoring Prime, RSA Encryption.
Credits: 03
Room and Schedule: T TH 10 30*;ONLINE;SYNCRONOUS;
Satisfies Core Requirement: None
Prerequisites: None
Corequisites: None
Cross-listed with: PHYS4595 **Frequency:** Periodically **Student Level:** GRADUATE **Comments:** None

PHYS897501
Many Body Physics BEDELL, KEVIN
Spring 2021
Many Body Physics is the study of matter when interactions matter. This is a very rich subject area and it is impossible to cover all of them. The goal of this Many Body Physics course is to focus on a few theoretical techniques including, e.g., Greens Functions and Feynman Diagrams that provide a unified view of these areas. These techniques can be used to derive some of the more familiar theoretical results for many body systems, the Hartree-Fock approximation, the random phase approximation (RPA), the kinetic equation, and response functions to name a few. These techniques will be applied to a number of interacting systems that could include, Quantum Fluids (Fermi and Bose Fluids), Graphene, Superconductors/Superfluids, and Ferromagnetic metals.

Political Science Courses: Summer 2020

POLI120601
The Politics of Self-Rule: Ireland, Northern Ireland, and Scotland HARTNEY, MICHAEL T; MAURO, ROBERT M
Summer 2020
A century ago, Ireland, Northern Ireland, and Scotland were integral parts of Great Britain and the United Kingdom and were governed by the British Parliament. Now each has its own parliament, although only Ireland is fully independent of the UK. We will consider the development of self-rule in these three places, how self-rule operates today and the major challenges that each administrative unit faces. We will also examine the key political questions that each parliament is currently debating. Our understanding of these matters will be greatly enhanced by the visits we will pay to each of the three parliaments and to other sites that are particularly important for understanding the political development of the three places. Students will also benefit from interacting with a variety of political leaders, policy analysts, journalists, civil servants, and citizen activists in Ireland, Northern Ireland, and Scotland.

POLI225101
Food, Power, and Politics NAKAZATO, HIROSHI
Summer 2020
This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

POLI243801
Comparative Politics of Human Rights PURNELL, JENNIE
Summer 2020
Every day, we seem to hear and read about horrific violations of human rights, from chemical warfare in Syria, to the plight of Rohingya refugees fleeing Myanmar, to the forced separation of migrant families in the United States, to violence against women and LGBT persons nearly everywhere. Since the end of World War II, countless human rights laws have been promulgated, institutions created, and advocacy campaigns launched. Have they made a difference? If so, under what conditions? Is respect for human rights greater or worse than it was more than half a century ago? We'll explore these issues and questions over the course of the semester. This course fulfills the Comparative Politics subfield requirement of the Political Science major.

POLI262501
Islam, the Muslim World, and Democratic Politics DIPASQUALE, DAVID M
Summer 2020
What is the relationship between Islam and democracy? Are human rights located in the Koran or some other, more human, source? Are the appeals to an Islamic government or "State" based on fact or fiction? How might we appeal to the sacred sources of Islam to promote attitudes of toleration, inclusion, and respect? These and similar questions will be considered throughout the semester. The purpose of this course will be to use the events related to the Arab Winter and continuing instability throughout the Muslim world as a springboard for a critical evaluation of the respective merits of the two forms of regime. No prior acquaintance with Islam or the Arabic language is necessary or required.

POLI352701
Sem: Terrorism, Insurgency, and Political Violence KRAUSE, PETER J
Summer 2020
Terrorism and insurgency dominate the headlines today, but how much do we really know about these forms of political violence? Are they inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

Political Sciences Courses: Fall 2020

POLI102101
How to Rule the World: Introduction to Political Theory BARTLETT, ROBERT C
Fall 2020
This introductory course in political theory will be devoted to exploring what may well be the highest political theme: the requirements of great political rule. What must we do in order to govern well? Even more important, what must we know? With these and related questions in mind, you will be asked to read, reflect on, and write carefully about a handful of foundational texts that all deal, in very different ways, with the question of the requirements of great political leadership.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: POLI1022. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: For majors and non-majors. This course may be used to fulfill the field requirement in Political Theory, or it may be used to fulfill one of the elective requirements in the major. It cannot satisfy more than one of these requirements.

POLI104201
Introduction to Modern Politics DIPASQUALE, DAVID M
Fall 2020
This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself--the most typical modern political arrangement--as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI105101
Flawed Founders: George Washington and the Mythology of a Heroic President LANDY, MARC
Fall 2020
This course focuses on the accomplishments and flaws of a great founder: George Washington. It seeks to illumine his character and also to understand his role in the formation of the new American polity, regarding both its virtues and flaws. As the country's first president he led the effort to forge an enduring national government. How did he succeed so brilliantly in those efforts? Yet even as he was fighting for and presiding over a republic ostensibly dedicated to liberty and equality he abetted a system that perpetuated bondage and inequality. By the end of his life he controlled over 500 slaves. He bought, sold, and rented them. He was a full participant in a culture that subordinated women. This course will scrutinize Washington's public life--as general and politician; his private life--as slaveholder, husband and friend; and the complex interplay between his public and private personas. To better understand his thought processes and his presentation of self it will make extensive use of his speeches and letters as well as contemporary descriptions and assessments of him. The details of his life are most richly captured in Ron Chernow's biography of him, from which students will read. This scrutiny will also help to explain Washington's own role in creating the mythical status he has come to enjoy.

POLI107101
Value of Freedom: Politics and Economics HETZNER, CANDACE
Fall 2020
Who is free? What does it mean to be free? In what ways do individuals and societies show that they value freedom? In these paired courses, we will approach these enduring questions from the perspectives of Political Science, Economics, and History. During the colonial and post- colonial eras, ideas about political and economic freedom closely aligned with the development of liberal democracy and capitalism. Our courses will evaluate the contradictions of liberal ideas and structures within their greater historical context through case studies across the globe. In this way, students may begin to understand what it means to be free for themselves today.

POLI108101
Introduction to International Politics CRAWFORD, TIMOTHY W
Fall 2020
This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.
Credits: 03

POLI128001
The Cost of Free Speech BAYLES, MARTHA
Fall 2020
The course will focus on the challenge of preserving the Western ideal of free speech in a world where democratic governments seem paralyzed by political and cultural polarization; powerful tech companies have become unwilling content regulators; and authoritarian regimes deploy digital technology for surveillance, censorship, and propaganda. The goal is to help students situate the classic debate over free speech in both the contemporary landscape and the broader historical context.

Introduction to Data Science KRUPENKIN, MARIA T
Fall 2020
Do YOU want to be the next Nate Silver? Data science has transformed many of the ways we engage with politics, from sophisticated voter turnout operations to the ubiquity of data journalism. This course will introduce students to the basic techniques of data science including data visualization, hypothesis testing, and simple linear regression. Students will learn how to use the R statistical software to analyze political data. This is an introductory class; no math or statistics background is necessary.

Policy and Politics in the U.S. MELNICK, ROWELL S
Fall 2020
This course is designed to acquaint students with the major features of American policymaking at the national level by engaging in primary research and extensive memo-writing on selected policy issues. Each student will be expected to become familiar with at least three policy areas, understanding existing government policies and underlying tradeoffs and paradoxes; proposing intellectually defensible and politically feasible reforms; and suggesting political strategies for enacting these reforms. Possible topics include social security, environmental regulations, federal aid and mandates for education, affirmative action, welfare, and the use of public lands.

POLI230201
Dilemmas of Unity and Diversity in American Politics and Society MELNICK, ROWELL S
Fall 2020
Both politicians and professors speak of diversity as an unqualified good that Americans must continually strive to achieve. Yet what exactly do we mean by "diversity"? Along what dimensions--racial, social class, cultural, phenotypical, religious, ideological--do we define diversity? More to the point, are there any limits such that the merits of diversity (or presumed merits) diminish once certain levels of diversity are achieved.

Parties and Elections in America SCHLOZMAN, KAY L
Fall 2020
A general survey of American political parties and elections. Investigation of such topics as how voters make choices, the conduct of campaigns, the role of media in political campaigns, the importance of money in politics, and changing political commitments and party alignments will entail consideration of the issues, personalities, and campaign tactics involved in recent elections. Emphasis will be placed on the role of parties in structuring political conflict and the role of elections in enhancing citizen control of political leaders. We will follow the progress of the 2020 elections as they unfold.

The U.S. Congress HOPKINS, DAVID A
Fall 2020
Americans are habitually fierce critics of Congress even as they like (and usually reelect) their own representatives. In this course, we try to explain this paradox by investigating the ways in which the structure and organization of Congress allows members to cultivate personal popularity despite rampant disapproval of the institution in which they serve. Among other topics, the course addresses the nomination and election of congressional candidates, the roles of congressional parties and leaders, and the influence over the legislative process of the committee system, rules and procedures, lobbyists and interest groups, and other branches of government.

POLI240701
Introduction to South Asian Politics MARCESSE, THIBAUD
Fall 2020
South Asia is not just home to the world's fastest growing economy (India), it is also a region that continues to face significant security and development challenges, with some of the longest running interstate conflicts (between India and Pakistan for instance), and severe poverty and inequality across countries such as India, Pakistan, Bangladesh, or Sri Lanka. What accounts for the variation in security and development outcomes across and within these countries? Why are some of them better able to ensure peace and security and basic service delivery than others?
This course proposes an overview of the politics of South Asia as a regional security complex, starting with the colonial legacies of state building in the region, but also looking at the impact of economic reforms and the changing international environment since the end of the Cold War and the rise of India and China as a global powers.

Latin American Politics PURNELL, JENNIE
Fall 2020
This course is an introduction to politics in Latin America. We'll look at efforts of Latin Americans to create more inclusive, equitable, and rights-respecting democracies in a region long characterized by political instability, authoritarianism, and great inequalities in the distribution of wealth and power. While we'll examine the region as a whole, our focus will be on Argentina, Bolivia, Brazil, Chile, and El Salvador, with a brief excursion to Mexico. No prior knowledge of Latin America is required for the course, which is open to sophomores, juniors, and seniors.

Political Institutions in the Age of Populism: Parties, Voters, and Elections MARCESSE, THIBAUD
Fall 2020
This course offers an overview of political institutions such as political parties and elections as democracies face a populist challenge in areas as diverse as Western Europe, Latin America, and Asia. After reviewing the theoretical and historical foundations for party politics, the course will examine the ways in which political parties reach out to voters in countries with different institutional legacies, in industrialized countries as well as in post-colonial democracies in the Global South, whether through programmatic platforms or through the distribution of patronage and vote-buying. The course will look at the roots of contemporary populist politics and how this brand of politics challenges traditional party-voter linkages and contributes to the erosion of democratic norms.

Radical Political Economy: From Marx to Anti-Globalization CHRISTENSEN, PAUL T
Fall 2020
This course examines the work of radical thinkers from Marx to contemporary critics of globalization. The course examines Marx's theory of history and his writings on capitalist economics and politics. It explores the evolution of radical thinking on issues such as the state; the role of class in contemporary societies, particularly in relation to issues of gender, ethnicity, and religion as bases for identity and power; and prospects for progressive social transformation. We conclude with a critical examination of theories imperialism and globalization, and what they imply for the future of societies at different stages of development.

POLI243801
Comparative Politics of Human Rights PURNELL, JENNIE
Fall 2020
Every day, we seem to hear and read about horrific violations of human rights, from chemical warfare in Syria, to the plight of Rohingya refugees fleeing Myanmar, to the forced separation of migrant families in the United States, to violence against women and LGBT persons nearly everywhere. Since the end of World War II, countless human rights laws have been promulgated, institutions created, and advocacy campaigns launched. Have they made a difference? If so, under what conditions? Is respect for human rights greater or worse than it was more than half a century ago? We'll explore these issues and questions over the course of the semester. This course fulfills the Comparative Politics subfield requirement of the Political Science major.

A Continent on the Move: Immigration in Contemporary Europe MOLLES, ELITSA V
Fall 2020
Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic, and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g., Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI244101
Comparative Politics of Development HONIG, LAUREN
Fall 2020
This is a course about power, politics, and global development. Why are some countries rich and others poor? Why do some communities have few resources while their neighbors have plenty? How does inequality affect politics and vice versa? To answer these questions, we will start by critically examining what development is and how it can be measured. Then we will move on to examine theories linking politics to development. We will explore the effects of colonialism, geography, conflict, natural resource wealth, and foreign aid, among others. The readings from this course draw from political science, economics, anthropology, and history. During this semester we will examine both the deep roots of global inequality and engage with active policy debates about development.

Ideas, Values, and American Foreign Policy DEESE, DAVID A
Fall 2020
What are the historical roots and contemporary implications of liberalism and nation-building in American foreign policy? In what ways have liberalism and nation-building shaped presidential foreign policy doctrines and priorities? How have U.S. foreign policy leaders attempted to spread core ideas and institutions to other countries? In particular, how have key American officials understood the relationship between markets and democracy? To what extent might U.S. policies and decisions be expected to spread liberalism to countries in the Middle East? Finally, what can be learned from the continuing cases of Afghanistan and Iraq?

POLI340601
Irish Politics 1916 to Present: Modernization and Evolving Relations with the Church, Northern Ireland, the European Union
MCGRAW, SEAN D
Fall 2020
Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland's distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

POLI350501
The Future of War ERICKSON, JENNIFER L
Fall 2020
What is the future of war? This question has persistently occupied scholars, policymakers, and military analysts. Yet, as new technologies emerge, politics shift, and security threats expand, it takes on increasing relevance and urgency in contemporary international politics. This course will explore historical and contemporary questions about the future of war related to why states fight wars, how they fight wars, and how they seek to regulate the conduct of war in light of new technologies.

POLI351001
Globalization CHRISTENSEN, PAUL T
Fall 2020
This course examines the political, economic, social, and cultural implications of the increasingly integrated world system. The course focuses on conflicting assessments of international institutions (IMF, World Bank, WTO) and political governance; the impact of economic integration; and the effects of globalization on state sovereignty, democracy, and social cohesion. Specific case studies will include: globalization and the environment; globalization, gender, and work; globalization and immigration/migration; globalization and the illicit economy, and anti-globalization social movements and activism.

POLI351701
Rising Powers and Power Transitions in Theory and History ROSS, ROBERT S
Fall 2020
This seminar offers multiple analytical perspectives on rising powers/power transitions as a cause of war among the great powers in international politics. It considers the role of power transitions/rising powers as a particular source of great power war, as well as other sources of war that may affect the likelihood of a power transition war. It examines these issues from both theoretical perspectives and through analysis of significant cases studies of power transitions. It concludes with an effort to understand the implications of the rise of China and the U.S.-China power transition from both theoretical and historical perspectives.

POLI352101
International Law NAKAZATO, HIROSHI
Fall 2020
This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about

the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

POLI354101
Research Methods in Political Science KRAUSE, PETER J
Fall 2020
Rigorous, systematic research methods are at the foundation of quality scholarship for undergraduates and professors alike. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in archival research, interviews, surveys, case studies, lab experiments, participant observation, and statistical analysis. The course will focus on applied methods using scholarship and examples from history, international studies, political science, psychology, and sociology. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills.

POLI439001
Immigration: Processes, Politics, and Policies SKERRY, PETER N
Fall 2020
This course will examine immigration as a social as well as an economic process, with particular attention to its political and policy dimensions. Special attention will be paid to the interaction between immigrants and contemporary American institutions, and to how the contemporary context differs from earlier periods in our history. The various dimensions (social, cultural, economic, and political) of assimilation will be examined. Particular emphasis will be placed on undocumented immigration as well as the group competition and conflict engendered by immigration generally. The course will culminate in an examination of policy responses to the continuing controversy over immigration.

Domestic Politics of Post-1945 Europe LAURENCE, JONATHAN
Fall 2020
This course examines civil society and parliamentary democracy in Western Europe since World War II. What are the distinctive features of European political systems? How have the major political cleavages developed and changed in the last sixty years? Material will cover institutions and political participation in several countries, from prime ministers and presidents to political parties and social movements. We will consider the influence of Europeanization and regional movements on domestic politics. The course will also pay particular attention to the political impact of mass labor migration, including the emergence of right wing parties and contemporary politics of cultural diversity.

POLI459001
East Asian Security ROSS, ROBERT S
Fall 2020
This class offers an analytical perspective on the strategic conditions of post-Cold War East Asia. It examines the regional political structure, the strategic characteristics of the region's great power relationship--U.S.-China relations and the rise of China--and the implications of great power relations for the conflicts on the Korean peninsula, in the Taiwan Strait, and in the South China Sea, and the role of alliance relationships in regional diplomacy. From these different perspectives, the class seeks an understanding of the sources of state behavior in East Asia and the prospects for regional stability and instability.

Honors Seminar: Terrorism, Insurgency, and Political Violence KRAUSE, PETER J
Fall 2020
Terrorism and insurgency dominate the headlines today, but how much do we really know about these forms of political violence? Are they inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence.

POLI723101
Research Methods in Political Science HOPKINS, DAVID A
Fall 2020
This course provides an introduction to the practice of empirical research in political science. It addresses a variety of prominent methodological approaches, including experimental and quasi-experimental designs, field studies, interviews, content analysis, survey research, and aggregate data analysis. We will also consider relative strengths, tradeoffs, and syntheses of qualitative and quantitative methods. The course aims to equip students both to conduct original research and to evaluate the work of others.
Credits: 03
Room and Schedule: DEVLIN HALL 112,W 4 30-7; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: GRADUATE
Comments: This graduate course is a non-subfield elective course.
Status: OPEN

POLI772901
American Political Development II LANDY, MARC
Fall 2020
This seminar is look at the course of American history from the Progressive Era through to the present day. Its axiom is that contemporary politics cannot be adequately understand without understanding its philosophical and historical underpinnings nor without examining the critical political conflicts and institutional developments that have occurred. Readings consist of original documents and secondary works by historians and political scientists.
Credits: 03

POLI793501
Heidegger's Progeny WILFORD, PAUL T
Fall 2020
The course will treat works by Martin Heidegger and several of his students or followers, such as Karl Lowith, Georg Gadamer, Alexander Kojeve, Leo Strauss, Hannah Arendt, Jacob Klein, and Hans Jonas. The class will begin with a brief consideration of Heidegger's radical critique of the philosophic tradition before turning to examine a variety of ways in which Heidegger's students appropriated, elaborated, criticized, rejected, or otherwise engaged with what they all recognized as the groundbreaking significance of Heidegger's work. The class will investigate questions concerning the challenge of Heidegger's historicism to political philosophy, rival theories of interpretation, communication, and hermeneutics, the relation between human historicity and revelation, problems of technological innovation and the ecological crisis, and the idea of "the end of history."
Credits: 03
Room and Schedule: CARNEY HALL 302,TH 4 30-7; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically

POLI104201
Introduction to Modern Politics BEHNEGAR, ALICE P
Spring 2021
This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself--the most typical modern political arrangement--as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

Americans, Ugly and Beautiful BAYLES, MARTHA
Spring 2021
This course is not about "hard power," meaning coercive military or economic action. Instead, it is about "soft power," meaning attraction, persuasion, the power of example. Despite today's decline, America's image and influence still permeate the world, conveyed through every media platform and taking such different forms as news reports, entertainment, face-to-face interactions, and "public diplomacy" (government efforts to cultivate goodwill among overseas populations). How did these different modes of communication work in the past? How should they work today? What messages should the people of the United States be sending to the 95 percent of humanity who are not American? What messages are we in fact sending? These questions will be explored historically, thematically, and by region.

POLI230501
American Federalism LANDY, MARC
Spring 2021
This course will examine the constitutional foundation, the historical development, and the contemporary character of American Federalism. It will explore the tension between centralization and decentralization as an independent factor influencing the course of American politics and governance and contemporary policy debate. It will also explore federalism in a comparative light by looking at current debates about European federalism.

POLI233401
Political Behavior and Participation HOPKINS, DAVID A
Spring 2021
How do citizens form opinions about politics, and how do these attitudes influence their participation in political life? This course addresses these questions by surveying the most prominent sources of influence on the political orientations of individuals, including personality effects, socialization, interpersonal dynamics, cognitive biases, and the news media. We then apply these findings to the most common forms of political behavior, including party affiliation, electoral participation, activism, and protest, aiming to explain why different citizens support different political candidates and causes-as well as why some members of the public engage extensively in political activity while others remain uninvolved.

POLI233501
Conflict and Polarization in American Politics HOPKINS, DAVID A
Spring 2021
It was once common for observers to note--and sometimes bemoan--the relative lack of partisan and ideological polarization in American politics, yet many now believe that Americans have become too politically divided. This course examines the nature of political differences in the public, explaining how distinctions of race, sex, social class, religion, ideology, and issue positions are associated with differing choices at the ballot box. We will consider whether the strong ideological conflict now evident in elite institutions reflects similar divisions among citizens, and investigate whether the United States has in fact split into "red" and "blue" partisan territory.

POLI240501
Comparative Politics of the Middle East BAILEY, KATHLEEN T
Spring 2021
The course explores origins of Muslim majority societies and political systems in the Middle East. It covers the formative era of Islamic civilization, and traces the diffusion of the Middle Eastern Islamic paradigm, culminating in the Ottoman system, and explores the social and political disruptions caused by the breakup of Muslim empires and establishment of European economic, political and cultural domination. It addresses how these forces led to the creation of national states and changes in class structure, and explores how the failure of Western forms of modernization and political organization led to demands for the formation of new political communities based on the revival of Islamic principles. Discussions will center Islam's compatibility with liberalism, secularization, modernity, democracy, and terrorism. Recent developments surrounding the "Arab Spring" and its aftermath will be explored. The course includes a crisis simulation exercise.

The New Worlds of Welfare Capitalism: Economic Reform, Redistribution, and Social Policy
MARCESSE, THIBAUD
Spring 2021
Under what conditions do states decide to redistribute and fund a welfare state? This course builds on scholarship in institutional economics and political economy to consider the evolution of welfare states in both industrialized economies and emerging economies in the global south. It will not only consider the impact of economic reforms such as market and trade liberalization on welfare regimes, but also look at the evolution of the structure of taxation and its impact on social policies. The course will discuss some of the challenges faced by emerging economies in the implementation of welfare policies in the absence of large-scale redistribution.

A Continent on the Move: Immigration in Contemporary Europe MOLLES, ELITSA V
Spring 2021
Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic, and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g., Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

Politics of Energy and Climate in the U.S. and International Perspective DEESE, DAVID A
Spring 2021
Why is energy and climate policy fundamentally political, deeply entwined with human, national, and international security, and critical to global stability and well-being? Major course units assess the main actors and institutions in energy; including OPEC and international markets; contrast the primary challenges confronting energy policy in the exporting and importing states; evaluate the implications of climate disruption and the solutions across the sixty largest greenhouse gas emitting states; and analyze how energy and climate politics shapes global security and sustainability. Class members will also conduct a global climate negotiation and study in depth the regional security and political economy of the (Persian) Gulf states.

The World Wars: Causes, Conduct, and Unintended Consequences O'ROURKE, LINDSEY A
Spring 2021
This course examines the origins, military conduct, and societal consequences of World War I and World War II. We will look at each war from the perspective of state leaders designing their state's military strategy and the soldiers fighting for them. What caused the outbreak of each war? What was each state's military strategy and how did it interact with the strategies of other states? Why were so many soldiers willing to risk their lives and kill others on an unprecedented scale of destructiveness? Topics covered include: the social, political, and technological developments necessary to fight wars of this scale; domestic, accidental and interstate explanations for WWI; the military strategies of the major combatants in both wars; the Versailles Treaty and Post-WWI order; individual, economic, and interstate explanations for WWII; the European and Pacific theaters; German mass killings; and Japan's surrender.

Nuclear Weapons and International Relations O'ROURKE, LINDSEY A
Spring 2021
How have nuclear weapons influenced international relations? This course is divided into two main sections. The first section analyzes competing IR theories regarding nuclear strategy and the causes of proliferation: Under what conditions will nuclear weapons act as an effective deterrent? Can nuclear weapons be used to coerce or blackmail? Does nuclear acquisition embolden states to pursue more aggressive foreign policies? How and why do states acquire nuclear weapons? The second portion of the course focuses on a variety of current issues relating to nuclear weapons including: strategic missile defense, nuclear terrorism, global zero, the Iranian nuclear deal, and the North Korean nuclear program.

POLI340601
Irish Politics 1916 to Present: Modernization and Evolving Relations with the Church, Northern Ireland, the European Union
MCGRAW, SEAN D
Spring 2021
Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland's distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

Capitalism and Socialism HANLEY, RYAN P
Spring 2021
For the past two centuries, capitalism and socialism have been taken to represent the two fundamental alternatives available to us with regard to the organization of the economy. But what exactly do we mean when we invoke these concepts, and what exactly are the fault lines that render them distinct? Through an intensive study of the foundational philosophical texts that gave rise to these traditions, our course will seek to gain clarity about what we mean when we invoke these today. Authors to be examined will include Rousseau, Adam Smith, Marx, and Hayek, as well as key writings in the tradition of Catholic Social Thought.

POLI449701
The Politics of Contemporary India: Democracy and Identity MARCESSE, THIBAUD
Spring 2021
This course examines the challenges and opportunities of democracy in post-Independence India. How does democracy persist in a society divided along multiple ethnic, religious, and regional cleavages? While India's 1950 constitution made the country officially secular, the rise of majoritarian politics in recent years represents a significant challenge to established norms and institutions. It also comes in the wake of a democratic deepening, with the rise of new parties and a push towards decentralization. To what extent does Hindu nationalism respond to voter demands and ideological preferences? What does the evolution of Indian politics tell us about broader trends in the Global South and beyond?

POLI469001
The Political Philosophy of Alfarabi DIPASQUALE, DAVID M
Spring 2021
In the Muslim world today, more than ever there is an effort to locate the key figures of Islamic civilization and to situate them in a contemporary context. Alfarabi (d. 950) founded the main tradition of philosophy in the Islamic world. Regarded by his successors such as Avicenna (Ibn Sina), Averroes (Ibn Rushd) and Maimonides as the "Second Teacher" or greatest philosophical figure following the death of Aristotle, Alfarabi was understood to have been the leading authority in two fields of study, namely, logic and political science. This course will involve a close reading of The Philosophy of Plato and Aristotle. No prior acquaintance with the Arabic language or Islamic philosophy is necessary.

POLI770601
The American Founding HALE, DENNIS B
Spring 2021
This seminar will examine the political debates associated with the American Founding. We will read some of the more important pre-Founding texts; examine the debate between and among the Federalists and Anti-Federalists; and study some of the immediate post-Founding discussions over such contested matters as: the nature of the Union, the powers of states, the status of slavery, the role of political parties, and

the appropriate way to understand the presidency, the Congress, and the federal courts.

POLI771901
American Politics From the Ground Up SKERRY, PETER N
Spring 2021
The populist wave in American politics highlights the limitations of approaches focusing on formal organizations and government bureaucracies, particularly at the national level. As "political realists" such as Galston, Yack, and Honig note, informal and emergent social bonds and cultural forces also demand attention. Others emphasize the causal priority of ideas. This debate will be engaged by examining the social and cultural dimensions of politics. Topics to be considered will include: informal, pre-political social formations such as families and neighborhoods; non-economic aspects of corruption; community institutions such as churches, synagogues, and mosques; labor unions; and Alinsky community organizations. So will social and political movements such as the Tea Party and other manifestations of populism. These will be examined in the context of a regime improbably characterized by both identity politics and expertise.

POLI772001
American National Institutions in a Mature Welfare State MELNICK, ROWELL S
Spring 2021
This seminar focuses on (1) how our peculiar political institutions have shaped the American welfare state, and (2) how the expansion and maturation of the welfare state has changed American politics. Topics include partisan polarization and the persistence of divided government; the centralization of power within Congress and its preoccupation with budget matters; the paradox of growing administrative power and vulnerability; the entrenchment of "adversarial legalism"; the incentives for presidents to go around rather than through Congress; mobilization and counter-mobilization by interest groups; and efforts by state governments to create national policies.

Advanced Directed Study EASTER, GERALD M
Spring 2021
Advanced Directed Study is a final paper project for eligible second year Master's students. It is a focused and substantial paper, written under the guidance and approval of a supervising faculty member. The project is intended to cultivate expertise in a subject in which the student has formed an interest and has already done some work in. Examples include: further development of a paper from a previous seminar with a case study, primary sources or original research; an extended critical literature review; or, a delegated project in cooperation with a supervising professor's own research.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: GRADUATE
Comments: MA students who are interested in enrolling for the Advanced Directed Study are advised to contact Professor Gerald Easter early on in the fall semester of their second year of the MA program. Professor Easter will make the final decision as to which professor will supervise the Advanced Directed Study for each individual student.

POLI781801
Global Public Goods and Cooperation in International Politics DEESE, DAVID A
Spring 2021
Some of our most urgent challenges, from global warming and international financial crises to nuclear proliferation, global epidemics or disruption of the internet, can be understood as "global public goods." These require international actors to bargain, coordinate, and collaborate in reaching effective responses. This seminar investigates the nature of public goods and collective action in order to help understand these pressing challenges, possible responses to them, and how politics both limits and opens opportunities for policy formation. It begins with prevalent theories about the production of public goods, from the local to transnational and global, and analysis of their governance. It then studies in depth three case studies, providing international financial stability, slowing the spread of nuclear weapons worldwide, and mitigating global climate disruption. It concludes by examining the implications of rising socio-economic inequality in major countries worldwide.

Security Studies CRAWFORD, TIMOTHY W
Spring 2021
This seminar covers major concepts, theories, and research programs in the field of security studies: the concepts of national security and interests, strategy, and grand strategy; morality and war; civil-military relations; the security dilemma and offense-defense theory; alliance politics and collective security; arms races and arms control; nuclear strategy; coercive diplomacy; proliferation and counter-proliferation; and terrorism and counter-terrorism. In additional to reviewing key theoretical works on these subjects, we will examine important empirical cases from the Cold War and recent international crises.

POLI786301
Institutions in International Politics DEESE, DAVID A
Spring 2021
This graduate seminar probes the nature and limits of cooperation in world politics. It begins by examining the fundamentals of power, conflict, and cooperation at international and global levels. It focuses on the sources, evolution, and prospects for cooperation, including competing theoretical understandings. Key questions include the importance of regions and regionalism, the effects of democracies and democratization, and the role of both balancing and leadership at the global level. Weekly papers, oral presentations, and a major research project are required.

Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: This course is a continuation of POLI7996: Dissertation Seminar I. Only students who have passed their doctoral comprehensives should take this course.
Status: OPEN

POLI810101
Master's Interim Study DEPT
Spring 2021
Required for Master's candidates who have completed all course requirements but have not taken comprehensive examinations. Also for Master's students (only) who have taken up to six credits of Thesis Seminar but have not yet finished writing their thesis. Interim Study requires a commitment of at least 20 hours per week working on the thesis.
Credits: 00
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

POLI990101
Doctoral Comprehensive KELLY, CHRISTOPHER J
Spring 2021
For students who have not yet passed the Doctoral Comprehensive but prefer not to assume the status of a non-matriculating student for the one or two semesters used for preparation for the comprehensive.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

POLI991101
Doctoral Continuation
KELLY, CHRISTOPHER J
Spring 2021
All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee for doctoral continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None

Psychology and Neuroscience Courses: Summer 2020

PSYC111001
Introduction to Brain, Mind, and Behavior LAMOUREUX, JEFFREY A
Summer 2020
The course focuses on basic brain function (how neurons work, brain plasticity, and drug effects) and genetic influences on psychological functions (including attitudes), and introduces students to fundamental features of learning, motivation, appetite, memory, and perception, along with their biological underpinnings. This course will help students to understand the neuroscientific bases of psychological phenomena.
Credits: 03
Room and Schedule: ONLINE COURSE;ASYNCHRONOUS;MUST LOGIN WEEKLY;JUN 29 - AUG 14;
Satisfies Core Requirement: Natural Science
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Counts for Social Science core for classes of 2020, 2021, 2022, 2023; counts for Natural Science core for classes 2024 and beyond
Status: OPEN

PSYC112001
Introduction to Behavioral Statistics and Research I MACEVOY, SEAN P
Summer 2020
This course is the first in a two-semester sequence surveying research methodologies and statistical procedures. In this first semester the emphasis is on statistics. Students will be introduced to the most common topics and procedures in descriptive and inferential statistics. PSYC1120 is a large lecture course with a smaller breakout section (corequisite PSYC1122).
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** PYSC1122. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

PSYC223402
Abnormal Psychology OGREN, MARILEE
Summer 2020
This course provides an introduction to the field of abnormal psychology. Major topics include theoretical and empirical approaches to the study of psychopathology; assessment and diagnosis of abnormality; and psychological, behavioral, biological, and sociocultural characteristics of the major syndromes of psychopathology. Legal and ethical issues and current approaches to the treatment and prevention of psychological disorders will also be discussed.
Credits: 03
Room and Schedule: ONLINE COURSE;;ASYNCHRONOUS;JUN 29 - AUG 04;
Satisfies Core Requirement: None
Prerequisites: PSYC1110.
Corequisites: None
Cross-listed with: ADPS2234

PSYC224201
Personality Theories CANAVAN, DONNAH
Summer 2020
Does personality make us who we are? Whether selecting a mate, voting for a president, or understanding ourselves, we want and need to know about personality. In this course we consider how personality can be measured, how well it predicts behavior, what shapes our personality, and whether personality can be changed.
Credits: 03

Room and Schedule: JUN 29 - AUG 14; **Satisfies Core Requirement:** None **Prerequisites:** PSYC1111.
Corequisites: None
Cross-listed with: ADPS2242
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: None

PSYC227101
Memory and the Brain SPETS, DYLAN S
Summer 2020
Memory enables you to have skills, to communicate with other people, to make intelligent decisions, to remember your loved ones, and to know who you are. Without memory, you would not be you. Although human memory has been studied for over two thousand years, the neuroscience of human memory has only been studied for the last two decades. In this course, following an introduction on the types of memory and brain regions of interest, we will discuss the following key topics on the neuroscience of human memory: the tools of cognitive neuroscience, brain regions associated with long-term memory, brain timing associated with long-term memory, long-term memory failure, working memory, implicit memory, memory and other cognitive processes, explicit memory and disease, long-term memory in animals, and the future of memory research.
Credits: 03
Room and Schedule: JUN 29 - AUG 14; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CANCELLED

PSYC227201
Cognitive Psychology: Mental Processes and their Neural Substrates MACEVOY, SEAN P
Summer 2020
This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior. Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.
Credits: 03
Room and Schedule: ONLINE COURSE;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: None
Prerequisites: PSYC1110. **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT

PSYC332201
Religion and the Brain: An Introduction to Neurotheology BLACK, JESSICA M
Summer 2020
The brain is an organ of adaptation and such plasticity allows humans the capacity to build and draw upon faith and reason throughout times of stress and the building of resilience. Brain development throughout all life stages will be examined as we consider the following primary question: What does the field neuroscience help us to understand about faith throughout the life span, and what does it leave out? Contexts that confer stress or build resilience are examined throughout the course as students discover how neuroscience and faith converge or diverge in their contributions to understanding of the human experience and its development throughout life's unique pathways. To engage in this exciting dialogue about larger questions that may integrate these seemingly disparate and often siloed modern and ancient disciplines, students will be exposed to key concepts, definitions and vocabulary in neuroscience and recent advancements in related biological fields such epigenetics. We will then be able to engage in investigating and returning to important questions that may thematically bridge these fields.
Through extensive writing, reflection and dialogue students will have the opportunity to deepen their understanding of the relationships among faith, religion, spirituality, and modern science.

Psychology and Neuroscience Courses: Fall 2020

PSYC109101
Thinking about Feelings: The Psychology of Emotion HEBERLEIN, ANDREA S
Fall 2020
How does the language that we speak shape our emotional concepts? Is our emotional experience different than that of someone from a different culture? How do we recognize others' emotions? Does emotion get in the way of making good decisions, or does it help? We will discuss these and other questions from the perspective of psychological science, focusing on the ways that questions are formulated into experiments and answered using scientific methods. Through this course, students will learn about both classic and current research on emotion, gain experience with designing an experiment, and develop skills in reading scientific research articles.

PSYC220001
Introduction to Social Work RYAN, SARAH E
Fall 2020
Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

PSYC223401
Abnormal Psychology OGREN, MARILEE
Fall 2020
This course provides an introduction to the field of abnormal psychology. Major topics include theoretical and empirical approaches to the study of psychopathology; assessment and diagnosis of abnormality; and psychological, behavioral, biological, and sociocultural characteristics of the major syndromes of psychopathology. Legal and ethical issues and current approaches to the treatment and prevention of psychological disorders will also be discussed.
Credits: 03

PSYC227401
Sensation and Perception MACEVOY, SEAN P
Fall 2020
How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.
Credits: 03
Room and Schedule: GASSON HALL 310,T TH 9*;HYBRID;

PSYC332701
The Psychology of Prejudice and Discrimination ZIMBLER, MATTITIYAHU
Fall 2020
This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.
Credits: 03
Room and Schedule: DEVLIN HALL 112,T TH 4 30*;HYBRID;
Satisfies Core Requirement: None

PSYC334201
Sport and Exercise Psychology MOORE, KRISTINA
Fall 2020
This course will provide a broad introduction to sport and exercise psychology as both a science and a practice. Content will include major theories, seminal and current empirical research, and practical considerations concerning the cognitive processes, emotional states, social influences, and developmental systems involved in sport and exercise participation and performance.
Topics will span across individual, group, and context and may include personality, motivation, anxiety, team cohesion, group dynamics, as well as psychological skills training areas such as confidence, imagery, arousal regulation, goal-setting, and concentration. Students will synthesize material and design appropriate applications to sport and exercise settings.

PSYC334501
Social Motivation CANAVAN, DONNAH
Fall 2020
How do other people affect our motivation to act? Psychology has given too much emphasis to extrinsic rewards and too little to the ways in which our relationships with others determine our choices, feelings, and thoughts. Many of our behaviors are motivated primarily by our relationships with others. In this course we will explore the influence of others on our behavior. Topics to be considered include kindness and cruelty, cooperation and competition, and conformity and rebellion.

PSYC336201
Mind of a Dog: How Canine Cognition Informs Human Psychology JOHNSTON, ANGELA M
Fall 2020
This course will provide an overview of recent research in canine cognition. Students will become familiar with the full range of tools and techniques used to get a glimpse inside the mind of a dog, learn about recent findings in canine cognition, ranging from how dogs interpret human eye contact to what they understand about human language, and develop the ability to think critically about what work in canine cognition can tell us about human psychology. We will take on big-picture questions regarding social learning, theory of mind, emotion, social evaluation, third-party learning, collaboration, communication, and language.

PSYC338101
Psychobiology of Emotional Learning COLE, SINDY
Fall 2020
This course will introduce students to research and theory in regards to the psychobiology of emotional learning and behavior. Behavioral experiments demonstrating basic concepts in emotional learning will be described, as well as experiments aimed at determining the neural circuits which govern this learning and behavior. Additional coursework will explore the role of both developmental factors and sex differences in emotional learning. Most of the findings presented will be from non-human animal research, but some human studies will be highlighted.
Credits: 03
Room and Schedule: GASSON HALL 203,T TH 9*;HYBRID;
Satisfies Core Requirement: None
Prerequisites: PSYC2285. or similar introduction to neuroscience course.

PSYC338601
Psychopharmacology: Behavior, Performance, and Brain Function LAMOUREUX, JEFFREY A
Fall 2020

This course explores psychopharmacology, the science of drugs and behavior. We will discuss synaptic neurochemistry as associated with a number of specific mechanisms of drug action and outline brain circuits which mediate drug actions such as reward. Major classes of psychotropic drugs will be introduced, including both drugs of abuse and psychotherapeutic agents used in the treatment of mood disorders and psychosis.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: PSYC2285. Or an equivalent neuroscience course.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: OPEN

PSYC338801
Neurobiology of Eating and Eating Disorders PETROVICH, GORICA D
Fall 2020
This course will review the neural mechanisms controlling food intake, and body weight regulation under normal circumstances and in eating disorders. Eating is not only controlled by metabolic signals (e.g., hormones, peptides), but also by extrinsic or environmental factors that are not directly related to energy balance (e.g., stress, emotion, social/cultural factors). Likewise the brain systems regulating hunger are associated with networks mediating stress, reward, emotion, and learning and memory. The course will explore the current neuroscience findings from animal models, and human studies relevant to appetite, regulation of eating, and eating disorders.
Credits: 03
Room and Schedule: DEVLIN HALL 008,M W F 12; **Satisfies Core Requirement:** None **Prerequisites:** (PSYC2285 OR PSYC3384).

PSYC339001
Neurobiology of Psychiatric Disorders MCDANNALD, MICHAEL A
Fall 2020
All people are directly or indirectly impacted by psychiatric disorders. It is now clear that virtually all psychiatric disorders have their basis in the brain. This course will explore the neurobiology of psychiatric disorders. We will focus particularly on clinical studies examining brain function in people with psychiatric disorders and animal models aiming to better understand these disorders. Students are expected to have a strong background in neuroscience prior to entering this course.
Credits: 03
Room and Schedule: None **Satisfies Core Requirement:** None **Prerequisites:** PSYC2285.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD ELECT
Comments: None
Status: CANCELLED

PSYC339101
Ethical Controversies in Psychology and Neuroscience WEIDMAN, NADINE
Fall 2020
Can fMRI machines really "see" your thoughts? Should our brains or our free will be held responsible for our behavior? Should psychotropic drugs be used for neural enhancement, or only to treat illness? Psychology and neuroscience raise a host of ethical controversies--from claims to peer into the privacy of the mind, to applications in the courtroom, to treatment of experimental subjects. Rather than determining the "right" answers, this course explores the scientific, political, social, moral, and religious values these debates involve. Readings include works by scientists, philosophers, historians, theologians, and ethicists. Students enact the roles of stakeholders in in-class debates.
Credits: 03
Room and Schedule: M 3-5 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: With permission of the Instructor. A 2000-level Psychology elective or permission of the instructor.

PSYC440101
Research Practicum in Computational Methods ANZELLOTTI, STEFANO
Fall 2020
This course is a practical introduction to the convergence between psychology, neuroscience, and artificial intelligence. Ideas from psychology and neuroscience have inspired the development of artificial neural networks. Their current instantiations, deep neural networks, are having a profound impact on computer science and society, but also on the study of the brain and cognition. This course starts with a brief introduction to the roots of artificial intelligence in psychology and neuroscience, followed by a brief, accessible introduction to the mathematical foundations of deep neural networks. In the remainder of the course, students will learn to use python and pytorch and will work in groups to implement and train deep neural networks to build models of behavior or of the brain. Prior experience with computer programming is highly recommended; students with no experience in programming are encouraged to meet the instructor before enrolling.
Credits: 03
Room and Schedule: GASSON HALL 307,T TH 1 30*;

PSYC443501
Images of Mental Illness in Film and Literature SCHNEIDER, BARRY H
Fall 2020
This course is devoted to the representations of mental illness in film and literature, which are often more complex and more personal than the descriptions of psychological disorders in scientific writings. Students deepen their understanding of abnormal psychology as they criticize material from selected books and films containing depictions of disorders. These creative works will be examined in terms of the possible motivation of the authors and filmmakers and the potential for the creative works to decrease or increase stigma. The messages conveyed about the nature of abnormality are emphasized throughout the course. The course concludes with consideration of the ways in which psychologists and other mental-health professionals are depicted in these media.

PSYC443601
Clinical Fieldwork in Psychology ROSEN, KAREN
Fall 2020
This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

PSYC447001
Research Practicum in Cognitive Psychology BROWNELL, HIRAM H
Fall 2020
This course introduces students to the research process in cognitive psychology and cognitive neuroscience. The semester starts with a review of experimental design, common paradigms, statistical analysis, critical reading of journal articles, and ethics. Then, students work individually or in small groups to carry out a research project in an area of language or cognition that relates to cognitive neuroscience. Possible research topics are discussed in class. The research project entails reviewing the psychological and neuroscientific literature, identifying an appropriate research topic, designing and carrying out an empirical study, and evaluating and communicating the results.

Research Practicum in Experimental Psychology HEYMAN, GENE M
Fall 2020
Students will conduct experiments on cognition and decision making, evaluate social and psychological aspects of opiate use as measured by mortality and social-economic measures, and learn how write APA-style research reports. Class readings provide the conceptual background for our studies. Class discussion focuses on the readings and methods for analyzing and presenting our research results.

PSYC449509
Senior Honors Thesis I PETROVICH, GORICA D
Fall 2020
For students in the Honors Program writing a thesis. All Honors Program students write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Honors students are encouraged to take an Independent Study with a prospective thesis advisor during the junior year, to develop a thesis proposal. The designation "Graduated with Departmental Honors" will be granted by the Honors Program Committee upon successful completion of the Honors Program requirements and the final evaluation of the thesis. Registration requires a syllabus/contract form, which is found on the Psychology Department's website; go to Undergraduate, then Academic Opportunities, then Independent Courses: Research, Honors Program, and Senior Thesis.

PSYC550101
Experimental Design and Statistics MAGNUS, BROOKE E
Fall 2020
This course focuses on experimental design and related statistical methods. It covers between- subject, within-subject, and mixed designs with one and two factors. Statistical topics include the relevant statistical model and model assumptions, omnibus test, test of contrasts, multiple comparison, effect size, and power calculations. One and two sample t tests will also be revisited. If time permits, advanced topics such as designs with nested factors or random factors, mixed model approach, and nonparametric approach may also be covered.

PSYC554201
Theories of Human Emotion RUSSELL, JAMES
Fall 2020
This seminar covers the major psychological theories of human emotion, beginning with the classic writings of William James and continuing to contemporary controversies about the nature of emotion. Some of the questions to be considered are whether or not there are basic emotions, the relation of emotion to cognition and action, and whether emotions are innate or learned through our particular culture. The focus is on biological, social, and cultural subdisciplines of psychology, but contributions of anthropology, philosophy, and other disciplines will be discussed as well.

PSYC556501
Origins of Virtue MCAULIFFE, KATHERINE J
Fall 2020
Drawing on experimental work with adults, children, and animals, this graduate seminar will explore the origins of virtue. This course is discussion-based and reading/writing intensive. Each meeting will focus on the origins of a different virtue such as justice, honesty, trustworthiness, and loyalty. Students will gain familiarity with evolutionary and developmental perspectives on virtue, will have a chance to develop their own empirical approaches to the study of virtue, and will have a chance to lead class discussions.

PSYC557301
Advanced Topics in the Neuroscience of Memory RITCHEY, MAUREEN
Fall 2020
When we remember a past event, we form a mental representation of its specific details, including the people, places, and time associated with the event. Understanding the nature of these memory representations is an important challenge for neuroscientists. This seminar will focus on theoretical and experimental approaches to characterizing memory representations in the brain, targeting questions such as: Where are memories stored? Can we identify and manipulate individual memory representations? How do memory representations change over time? And what aspects of memory are reactivated versus reconstructed? The course will integrate research from the cognitive and behavioral neurosciences, incorporating both human and rodent studies of memory. Class meetings will typically include student-led discussions of journal articles related to each week's topic.

PSYC650101
Graduate Programming Lab FRITCH, HALEY A
Fall 2020
The course provides an introduction to MATLAB. Students will learn how to program in MATLAB, and how to use MATLAB for research in psychology. Students will develop a programming mindset by learning and exercising programming tasks, e.g., manage the data, manipulate the variables, plot the data, make graphs and tables, and conduct statistical analysis.

PSYC650201
Introduction to Multilevel Modeling RYU, EHRI
Fall 2020
The course introduces multilevel analysis and commonly used statistical models. The course begins by providing overall background including what are multilevel data, why multilevel modeling is needed, and how to properly report descriptive statistics for multilevel data. The remainder of the course presents commonly used multilevel models with illustrations using empirical data. R packages will be used. The course will focus on models with linear effects. Students are expected to be familiar with general linear models or multiple regression analysis.

Doctoral Continuation SLOTNICK, SCOTT
Fall 2020
All students who have been admitted into Doctoral Candidacy must register and pay the fee for Doctoral Continuation during each semester of their candidacy. Doctoral Continuation requires a commitment of at least 20 hours per week on the dissertation.
Credits: 01
Room and Schedule: BY ARRANGEMENT; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

Psychology and Neuroscience Courses: Spring 2021

PSYC103201
Science of Emotion HEBERLEIN, ANDREA S
Spring 2021
This course examines the scientific study of emotion for undergraduate students with no background in psychology. Topics include such questions as: What are the functions of emotion, interpersonally, and intrapersonally? What are some ways that emotions can be dysfunctional? Are emotions the same across cultures? How do we know what someone else is feeling? How does emotion interact with decision-making? In addressing these questions, we will incorporate discussions of how psychological experiments are constructed, performed, and interpreted.
Credits: 03
Room and Schedule: M W F 11;ONLINE;SYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Does not provide credit toward completion of the Psychology major.
Status: CLOSED

PSYC111001
Introduction to Brain, Mind, and Behavior HEYMAN, GENE M
Spring 2021
The course focuses on basic brain function (how neurons work, brain plasticity, and drug effects) and genetic influences on psychological functions (including attitudes), and introduces students to fundamental features of learning, motivation, appetite, memory, and perception, along with their biological underpinnings. This course will help students to understand the neuroscientific bases of psychological phenomena.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Natural Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Counts for Social Science core for classes of 2020, 2021, 2022, 2023; counts for Natural Science core for classes 2024 and beyond
Status: CLOSED

PSYC111002
Introduction to Brain, Mind, and Behavior KNOEPFLER, CAROLYN
Spring 2021
The course focuses on basic brain function (how neurons work, brain plasticity, and drug effects) and genetic influences on psychological functions (including attitudes), and introduces students to fundamental features of learning, motivation, appetite, memory, and perception, along with their biological underpinnings. This course will help students to understand the neuroscientific bases of psychological phenomena.

Comments: Counts for Social Science core for classes of 2020, 2021, 2022, 2023; counts for Natural Science core for classes 2024 and beyond
Status: CLOSED

PSYC111101
Introduction to Psychology as a Social Science MOORE, MICHAEL J
Spring 2021
This course is one of two introductory courses required for Psychology majors, along with PS1110. This course introduces students to the basic questions, perspectives, and methods that characterize the fields of developmental, social, cultural, personality, and clinical psychology.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: PSYC1110 and PSYC1111 can be taken in any order.
Status: OPEN

PSYC111102
Introduction to Psychology as a Social Science MOORE, KRISTINA
Spring 2021
This course is one of two introductory courses required for Psychology majors, along with PS1110. This course introduces students to the basic questions, perspectives, and methods that characterize the fields of developmental, social, cultural, personality, and clinical psychology.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** Social Science **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: PSYC1110 and PSYC1111 can be taken in any order.
Status: OPEN

PSYC112001
Introduction to Behavioral Statistics and Research I MACEVOY, SEAN P
Spring 2021
This course is the first in a two-semester sequence surveying research methodologies and statistical procedures. In this first semester the emphasis is on statistics. Students will be introduced to the most common topics and procedures in descriptive and inferential statistics. PSYC1120 is a large lecture course with a smaller breakout section (corequisite PSYC1122).
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: PYSC1122. **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD-MAJORS
Comments: None
Status: CLOSED

PSYC112002
Introduction to Behavioral Statistics and Research I BROWNELL, HIRAM H
Spring 2021
This course is the first in a two-semester sequence surveying research methodologies and statistical procedures. In this first semester the emphasis is on statistics. Students will be introduced to the most common topics and procedures in descriptive and inferential statistics. PSYC1120 is a large lecture course with a smaller breakout section (corequisite PSYC1122).

PSYC224501
Psychology of Motivation MOORE, KRISTINA
Spring 2021
Understanding human motivation extends beyond instincts, drives, needs, and rewards. This course explores motivation from multiple lenses including biological, cognitive, social, and developmental approaches. Students will examine psychological theories and principles of motivation from biological motives like hunger, thirst, and pleasure to more contemporary social-cognitive views involving self-efficacy, self-determination, competence and control, attribution, and achievement goal theories. Students will consider applications to relevant contexts including the classroom, the workplace, social relationships, and performance.

PSYC226201
Baby Talk HARTSHORNE, JOSHUA K
Spring 2021
Children have an instinct for language. Every typically developing child learns language-- something neither our most powerful machines nor smartest non-human animals can do. Even adults do not learn language as quickly or successfully as children. If not exposed to a language, children will invent one. In this course, we try to understand how children learn language, why animals, machines, and adults have so much difficulty learning language, and what the answers to these questions say about what it means to be human. This course takes an interdisciplinary approach to the problem, drawing on psychology, linguistics, anthropology, animal behavior, and other fields.

Cognitive Psychology: Mental Processes and their Neural Substrates BROWNELL, HIRAM H
Spring 2021
This course introduces the scientific study of mental function from an information processing perspective. The course examines how information is processed and transformed by the mind to control complex human behavior.

Specific topics include the history of cognitive psychology, cognitive neuroscience, attention, perception, consciousness, short-term and long-term memory, mental imagery, language, decision-making, and problem solving. Course material will be drawn from work with clinical populations (e.g., people who have sustained brain injury) as well as from work with non-injured populations. Class sessions will be devoted to lecture, discussion, demonstrations, and (if practical) student presentations.

PSYC227401
Sensation and Perception MACEVOY, SEAN P
Spring 2021
How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

PSYC228501
Behavioral Neuroscience MCDANNALD, MICHAEL A
Spring 2021
This course presents an introduction to the physiological basis of behavior. Basic neuroanatomy and neurophysiology are presented, and the following topics are then discussed: neuropharmacology, psychopharmacology, and the biological bases of mental illness; brain mechanisms of reward and reinforcement; hormones and behavior; an introduction to the development of the nervous system; brain mechanisms of learning and memory; and brain mechanisms of emotion.

PSYC228901
Comparative Psychology: Study of Animal Behavior JOHNSTON, ANGELA M
Spring 2021
This course is a survey of animal behavior from the psychologist's perspective. The methods and aims of comparative psychology are presented as we consider how and why psychologists should study animal behavior. All species are faced with fundamental problems such as navigating in their environment, finding food and water, defending against predators, communicating with conspecifics, attracting a mate, and learning and remembering information. The course will examine the very different strategies that various species, including humans, have evolved for solving these problems, and discuss reasons why these different kinds of strategies have evolved.

PSYC332701
The Psychology of Prejudice and Discrimination ZIMBLER, MATTITIYAHU
Spring 2021
This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

PSYC332901
Psychophysiology of Stress IVKOVIC, VLADIMIR
Spring 2021
This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

PSYC333101
Developmental Psychopathology TISHELMAN, AMY C
Spring 2021
This course will provide an introduction to the field of developmental psychopathology, an area of psychology that combines the topics of developmental and abnormal psychology in order to facilitate an understanding of maladaptive behavior within a developmental framework. Course material will emphasize how aspects of development bear upon the subsequent adaptation of an individual and will generate an appreciation of normal and pathological behavior in the context of the individual, his or her developmental history, and current conditions. Examples of specific topics include the developmental impact of parent-child attachment, child maltreatment, peer relationships, and resilience in development.

PSYC334501
Social Motivation ZIMBLER, MATTITIYAHU
Spring 2021
How do other people affect our motivation to act? Psychology has given too much emphasis to extrinsic rewards and too little to the ways in which our relationships with others determine our choices, feelings, and thoughts. Many of our behaviors are motivated primarily by our relationships with others. In this course we will explore the influence of others on our behavior. Topics to be considered include kindness and cruelty, cooperation and competition, and conformity and rebellion.

PSYC336001
How Extraterrestrials Think HARTSHORNE, JOSHUA K
Spring 2021
This course covers what we know about the minds of extraterrestrials. You might think that we don't know anything about extraterrestrials on account of the fact that we haven't met any. In fact, study of human cognition has taught us a lot not just about humans, but about what is and isn't possible. So we actually can make some definitive statements about what aliens must be like (assuming there are any). For instance, it can be shown that society could not exist if we did not have memories, so we can be fairly certain that any extraterrestrials who are advanced enough to have large-scale societies must have memories. In short, thinking about extraterrestrial cognition allows us to hold up a mirror to humanity and ask why we are the way we are, and whether there are other ways to be. The course will involve approx. 50% reading relevant findings from psychology and 50% analyzing depictions of aliens from film and literature. There will be three units: alien perception, alien morality, and alien language.

PSYC336601
Social and Emotional Development ROSEN, KAREN
Spring 2021
In this course, we will explore developmental changes in social and emotional functioning from birth through adolescence. We will study the beginning of emotion expression and the emergence of attachment relationships, the development of emotional regulation, and the socialization of children during infancy. We will then continue to examine emotional changes and social development through toddlerhood, early childhood, middle childhood, and adolescence. The influences of parents, siblings, peers, and caregivers will be examined, as will the issues of individual differences, stability and change, and coherence of development across contexts and over time.

PSYC336901
Understanding the Social World: Social Cognition in Humans and Other Animals MCAULIFFE, KATHERINE J
Spring 2021
This course will address the puzzle of how we make sense of our social world by focusing on questions such as: how do we carve our world into meaningful social groups, understand what others are thinking and maintain productive cooperative relationships? These questions will be tackled using both developmental and comparative approaches, with the goal of understanding how social cognition takes shape over childhood and what aspects of human social cognition are shared with other animals.

PSYC337101
Cognitive Neuroscience RITCHEY, MAUREEN
Spring 2021
Have you ever wondered where your memories are stored? Or how we perceive a rich visual world based on simple changes in light? Or what is going on in your brain when you're distracted during class? Cognitive neuroscience aims to reveal the connections between mind and brain, linking cognitive phenomena to neurobiological processes. This course will introduce the neural bases of perception, attention, memory, emotion, and other cognitive functions, as well as the key research methods used to investigate these topics (functional MRI, EEG, lesion studies, neurostimulation). The course will also encourage critical evaluation of the scientific evidence presented in primary research articles in cognitive neuroscience. Class periods will include instructor-led lectures as well as team-led discussions of primary research articles.

PSYC337301
Learning and Motivation LAMOUREUX, JEFFREY A
Spring 2021
This course examines fundamentals of learning theory. We will examine principles of classical and instrumental learning in animals and will discuss the human application of these principles in the home, classroom and clinical settings. We will focus heavily on classic and recent experiments designed to assess the processes and content of associative learning. Lastly, we will consider whether animals simply acquire stimulus-response tendencies, or if they have a more cognitive representation of their world, again focusing on how we can even ask this experimentally.

PSYC337601
Developmental Neuroscience OGREN, MARILEE
Spring 2021
Developmental Neuroscience covers the principles governing the development of the nervous system. These principles include (but are not limited to) induction, neurogenesis, cell migration, differentiation, axonal guidance,

pattern formation, synaptogenesis, and experience dependent development of the nervous system. Principles of neural development are illustrated by research in a variety of vertebrate and invertebrate organisms. Students must have taken Introduction to Neuroscience and be comfortable with cellular and molecular biology.

PSYC337901
Disorders of Language and Communication BROWNELL, HIRAM H
Spring 2021
This course examines how human language and communication can be affected by neurological disorders, predominantly acquired brain injury. Specific topics include, among others, deficits producing and understanding words, sentences, discourse, and speech prosody. There is also some coverage of historical themes, neurology, neuropsychology, treatment approaches (speech-language pathology), recovery, and assessment. Thus, the course reflects both clinical and research perspectives. The emphasis is on adults rather than children. Class sessions will be devoted to lecture, discussion, and student presentations. Class attendance is important.

PSYC338101
Psychobiology of Emotional Learning None
Spring 2021
This course will introduce students to research and theory in regards to the psychobiology of emotional learning and behavior. Behavioral experiments demonstrating basic concepts in emotional learning will be described, as well as experiments aimed at determining the neural circuits which govern this learning and behavior. Additional coursework will explore the role of both developmental factors and sex differences in emotional learning. Most of the findings presented will be from non-human animal research, but some human studies will be highlighted.

PSYC339701
Cognitive and Neural Bases of Person Knowledge ANZELLOTTI, STEFANO
Spring 2021
This course is discusses how people acquire knowledge about others. The first part of the course focuses on the perceptual mechanisms involved in the recognition of other agents, their identity, their facial expressions, and their actions. The second part of the course covers how these perceptual "ingredients" are used to make inferences about other people's mental states (i.e., their emotions), their beliefs, their goals, and their traits. During the course, we will read and discuss recent research articles, and explore how different types of evidence and different methods can be used to constrain theories of cognition and of the brain.

Positive Psychology
CLUCAS LEADERMAN, EMILIE
Spring 2021
This advanced undergraduate seminar reflects a new direction in psychology that focuses on topics that emphasize people's positive characteristics and processes. Characteristics that will be studied include happiness, kindness, generosity, love, and gratitude. Growth, healing, relatedness, and curiosity are among the processes that will be examined. The course will also address the antecedents and consequences of positive social situations such as peace, solidarity, and massive public responses to catastrophes like 9/11.

PSYC443301
Addiction, Choice, and Motivation HEYMAN, GENE M
Spring 2021
Course provides a selective survey of drug use and abuse. Students will have the opportunity to explore the social and economic correlates of drug overdoses, using published but often difficult to access data from health services, judicial agencies, and behavioral science researchers. Class discussion and short writing assignments are an essential feature of the course. Goals include practice writing brief reports, critical analysis of claims about addiction, and practice analyzing and synthesizing quantitative data on features of drug use and its correlates. Familiarity with Excel is helpful but not essential.

PSYC443601
Clinical Fieldwork in Psychology ROSEN, KAREN
Spring 2021
This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

PSYC446501
Research Practicum in Developmental Psychology TOPPER, STACEE S
Spring 2021
This course is designed to serve as an overview of the research methods used in the study of Developmental Psychology. Over the course of the semester, you will become comfortable with all aspects of the scientific method. While completing a semester long research project proposal, you will learn to identify research questions, design a thoughtful scientific study, and propose statistical analyses. Students will gain experience reading, analyzing, and critiquing current research in developmental psychology. By the end of course, you will be familiar with the different methods used in developmental research and become critical consumers of research in this area.

PSYC447201 FMRI
SLOTNICK, SCOTT
Spring 2021
For over a century, human brain mapping has been conducted by correlating lesion location with impaired behavior. In the last 25 years, functional magnetic resonance imaging (fMRI)--a noninvasive neuroimaging technique with excellent spatial resolution--has given rise to an explosion of knowledge regarding the role of specific brain regions in particular types of cognitive processing (such as shifting attention or memory retrieval). The aim of this course is to provide an in-depth examination of fMRI by reviewing the physical basis of the fMRI signal and its relation to neural activity in addition to considering issues of experimental design and data analysis. Brain mapping techniques based on lesions and electrophysiology are also discussed.

PSYC449004
Senior Thesis I KENSINGER, ELIZABETH A
Spring 2021
Students may elect to write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Students must obtain the consent of a faculty member to serve as thesis advisor. Students who choose to write a thesis are encouraged to take an Independent Study with a prospective thesis advisor during the junior year to develop a thesis proposal. Registration requires a syllabus/contract form, which is found on the Psychology Department's website; go to Undergraduate, then Academic Opportunities, then Independent Courses: Research, Honors Program, and Senior Thesis.

PSYC449101
Senior Thesis II BROWNELL, HIRAM H
Spring 2021
This is a continuation of PSYC4490. Students writing a thesis may take only a one-semester thesis course, or they may take a two-semester sequence, PSYC4490 and PSYC4491.

PSYC558701
Cellular Perspectives on Motivated Behavior MCDANNALD, MICHAEL A
Spring 2021
The goal of the course is to describe how changes in activity--and the composition--of single cells contribute to motivated behavior. Behaviors to be covered include but are not limited to: fear and anxiety, reward learning, addiction, feeding, pair bonding, and aging. The bulk of the reading and lecture materials will come from the primary literature, and an extensive neuroscience background is required. As such this course is targeted for graduate students and only the exceptional undergraduate.
Credits: 03
Room and Schedule: CAMPION HALL 009,F 9 30-12;
Satisfies Core Requirement: None
Prerequisites: PSYC2285. At least two 3000-level courses in the Systems Neuroscience cluster.
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: UNDERGRAD & GRAD
Comments: None

PSYC659001
Scientific Writing CORDES, SARA J
Spring 2021
This course will cover all aspects of scientific writing, from formulating a strong thesis statement and crafting a perfect paragraph to creating an environment and daily schedule conducive to getting writing done. We will cover how to write empirical articles, literature reviews, grant proposals, and even poster presentations. This class will be based loosely on The Writing Workshop by Barbara Sarnecka, aimed towards promoting and improving scientific writing.
Credits: 01
Room and Schedule: MCGUINN HALL 303,T 3; **Satisfies Core Requirement:** None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: None
Status: OPEN

PSYC660101
Structural Equation Modeling RYU, EHRI
Spring 2021
This course provides an introduction to the theory and application of structural equation modeling (SEM). The topics are basic concepts of structural equation models, path models with measured variables, measurement models, confirmatory factor analysis, structural equations with latent and measured variables, and extensions and advanced application. The course assumes that you have already completed a course in multivariate statistics. LISREL will be used to perform statistical analysis.

Romance Languages and Literatures Courses: Summer 2020

RLRL102001
The Immigrant in Film and Literature WOOD, CHRISTOPHER
Summer 2020
The experiences of the displaced, the exile and the immigrant have inspired great literature and cinema in the Spanish speaking world. This course will delve into a variety of narratives about the perilous journeys of Central Americans and Mexicans making their way to the North, the terrifying voyages of the brave and desperate people crossing to Spain from North Africa, and the struggle to adapt to new social, cultural and linguistic realities. Students will read, in English translation, short stories,

short novellas, and first-hand accounts of immigrant experiences and watch several Spanish-language movies with English subtitles.

Student Level: UNDERGRAD ELECT **Comments:** Conducted in Portuguese **Status:** OPEN

RLRL332801
Islam and the Iberian Peninsula GOIZUETA, ELIZABETH T
Fall 2020
This course will examine the relationship between cultures in the Euro-Arab context from both historical and contemporary perspectives. It will begin with an examination of the historical influence of Islam in the Iberian Peninsula from the eighth to the fifteenth centuries. During that period, Spain presented an example of religious tolerance and the place where the followers of the three Abrahamic religions lived, arguably, in harmony with one another. Against this background, the course will explore the interactions and mutual influences between the Iberian and the Islamic cultures from the Middle Ages to the present.

SLAV116401
Death in Russian Literature: Heroes, Cowards, Humans EPSTEIN, THOMAS
Spring 2021
Russian literature has always had an affinity for narratives depicting the meaning(s) of death. Reading from its first great modern writer (Pushkin) to its latest Nobel Prize winner (Svetlana Alexeivitch), our course will investigate three primary representations of death in Russian literature: heroization of death (sacrifice and death as the condition of a good life); banalization of death (death as meaninglessness); demonization of death (death as sin; death that must be overcome). Throughout we will attempt to understand how the ways in which we conceive of death inform the ways we choose to live.
Credits: 03

SOCY103001
Deviance and Social Control CARROLL, JACLYN
Summer 2020
This course explores the social construction of boundaries between the "normal" and the so- called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.
Credits: 03
Room and Schedule: ONLINE COURSE;ASYNCHRONOUS;MAY 13 - JUN 26;
Satisfies Core Requirement: Cultural Diversity, Social Science
Prerequisites: None
Corequisites: None

SOCY334601
Environmental Justice COATARPETER, PATRICK
Summer 2020
This course examines challenges and controversies associated with the unequal distribution of environmental hazards across communities. Students will explore the social, industrial, and government forces that create inequitable burdens of environmental pollution as well as movements to reduce such burdens. While ■ majority of the course will focus on the United States, readings will include cases from around the world. Students will be expected to actively contribute to class discussions and to complete a pilot research project on the environmental justice implications of an area of everyday consumption such as food, clothing, cleaning, transportation, or technology.

Inside-Out: Perspectives on Crime, Corrections, and Justice DELSESTO, MATTHEW J
Summer 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain ■ deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Introduction to Sociology for Healthcare Professions FAN, WEN

Fall 2020
This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

Deviance and Social Control CARR, KYLE A
Fall 2020
This course explores the social construction of boundaries between the "normal" and the so- called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

Society and Environmental Transformations RIEGER, ANNIKA
Fall 2020
Where do contemporary environmental problems come from? Why is it so hard to resolve serious global environmental issues? Are environmental problems really social problems? This course will compel students to explore these questions, to devise answers to them, and to learn how to understand environmental problems with sociological analytical tools and methods. Students will explore the historical origins of the contemporary world, revisit the social and environmental changes brought about by the Industrial Revolution, the World Wars, and the liberalization of capitalism, and, through first-hand research, ponder how globalization might be the start of a new environmental transformation for society.

SOCY103601
Introduction to Latin American Societies MORELLO, GUSTAVO
Fall 2020
The aim of this course is to introduce students to sociology while exploring Latin American societies. The course will start with a general presentation of both sociology and Latin America. We will discuss what sociology is, and the different ways of studying societies. We will take some time to study the birth of modern Latin American nations. Relying on this historical background, we will explore Latin American societies through sociological concepts such as race, gender, social violence, religion, sports, and culture. Finally, we will pay attention to U.S.-LA relations and the fact of Latino people living in the United States.

Social Problems UYAN, DENIZ
Fall 2020
This course is an exploration of different sociological approaches to the study of social problems and social trends in contemporary society. It examines the linkages between social structures/institutions, culture and human experience. The course emphasizes theoretical research issues, especially how, and to what degree, the understanding of social problems are a direct result of the processes used to define social problems as well as the research methods and procedures used to investigate them. Students will learn to critique popular discourses from a critical sociological perspective and will be encouraged to form their own opinions and critiques.

SOCY105801
Sociology of the Family MOORMAN, SARA
Fall 2020
In recent years, U.S. public policy has focused on strengthening the nuclear family as a primary strategy for reducing poverty and improving the lives of America's youth. It is often assumed that this type of family is healthy, financially independent, heterosexual, violence-free, normative, and grounded in historical tradition. This course examines these assumptions sociologically while considering systemic variations in race/ethnicity, class, gender, ability, and sexual orientation within and among American families.

Global Inequalities CHUANG, JULIA
Fall 2020
What is globalization and what are its consequences? This course examines the relationship between globalization and global inequality. This course is divided into four parts. First we ask: who are the beneficiaries of the outsourced economy? Second, we look at the emergence of a new global underclass. Third, we look specifically at the U.S., and ask what the decline of the American manufacturing base. Finally, we return to examine the movement of capital across the globe, and ask: what are the new risks of globalization in the face of systemic financial crises like the banking crisis of 2008?

Women and the Body HESSE-BIBER, SHARLENE
Fall 2020
This course covers Western cultural pressures on women to be super-slender. We analyze biological, sociological, and feminist perspectives on the body especially with regard to issues of beauty and body image and sexuality. We analyze how race, ethnicity and class intersect to create differences among women's relationship to their bodies. In what way do biological perspectives illuminate as well as cloud understanding of women's relationship to their bodies? We explore mass-mediated pressures on women's bodies through films, women's magazine, reality TV, and social networking sites. We examine the plastic surgery industry and the growing trend toward "designer bodies."

SOCY109201
Peace or War DERBER, CHARLES
Fall 2020
We analyze issues of war and peace before and after the Cold War, focusing on U.S. wars, largely in the Third World. In the first part of the course, we explore core theories of the roots of war. In the second part, we focus on the Cold War era, examining Vietnam, El Salvador, and other U.S. conflicts. In the third part, we focus on more recent wars: Iraq, Syria, the Israeli-Palestinian conflict, the "war on terrorism," as well as conflicts such as Rwanda and Sudan. The fourth section explores the United Nations, social activism among students, and other routes to peace.

SOCY109601
Aging and Society MOORMAN, SARA
Fall 2020
"Age doesn't matter unless you're a cheese," quipped actress Billie Burke (the Good Witch in *The Wizard of Oz*). Nevertheless, age does matter within societies. This class will cover specific topics in four general areas of sociological study: roles and relationships (e.g., within the family), inequalities (e.g., ageism), institutions (e.g., health care), and social change (e.g., the aging of the population). By the end of the course, you will have acquired a new approach to thinking about how you and others age in the social world and the ways in which age is portrayed in the media.

Planet in Peril: The History and Future of Human Impacts on the Planet SCHOR, JULIET; PARTHASARATHI, PRASANNAN
Fall 2020
The twenty-first century opened with crises of climate, bio-diversity, and eco-system functioning. In this class we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, inequality, and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but to solutions. Topics to be covered include: the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action, and social innovation.

From #BlackLivesMatter to #MeToo: Violence and Representation in the African Diaspora JEAN-CHARLES, REGINE M; MCGUFFEY, CLIFTON S
Fall 2020
This course explores pressing problems of modern race and gender-based sexual violence in the U.S. and throughout the African Diaspora. Utilizing interdisciplinary perspectives in both the humanities and social sciences, we will examine the roots of sexual violence, the ways in which it has been expressed, the meanings attached to it, and its implications for society from an intersectional perspective. Students will: (1) examine the wide-ranging ramifications of racism on rape culture; (2) formulate solutions for intervening in and eradicating rape culture; and (3) summon their imaginations to envision a world without sexual violence.

Growing Up Gendered: Socio-Cultural Perspectives onto Gender in Contemporary Society HESSE-BIBER, SHARLENE
Fall 2020
To what extent is anatomy destiny? We discuss key concepts of sex vs. gender. We delve into the critical societal forces that normalize a gender binary "male" and "female." We address biological, sociological and psychological frameworks that maintain the sex/gender binary across the life cycle (childhood through adulthood). How is our gendered identity constructed? What impacts do families, schools, the mass media and our social relationships on and off-line reinforce or challenge our gender identity? Our sexuality? How does our gender and sexual identity intersect with other dimensions of individual identity such as race, class, ethnicity and sexual preferences? We examine the cultural pressures on women to be slender and men to be muscular body and ways in which conformity to these body image ideals can lead to eating disorders and gendered violence. The class includes lectures, small group discussions, and group reflection projects.

Community Service Research Seminar HAIDER, MAHEEN
Fall 2020
CRP is a two-semester program (SOCY2254 and SOCY2255) offering leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In Fall, students in SOCY2254 learn the process of community- based research and its methodologies, and begin to design a proposal for an independent study for Spring. In Spring, students sign up for SOCY2255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

SOCY323301
Building the American Body: Sex, Food, and Fitness CARROLL, JACLYN
Fall 2020
This course is an examination of how bodies have been conceptualized, valued, and regulated in health and wellness initiatives throughout American history. Students will explore the many ways that bodies have been known, evaluated, and managed throughout the Western world, and in doing so, they will be exposed to the rich and peculiar theoretical history of the body. Using contemporary "health and wellness" discourses as a guidepost, the course engages theoretical traditions dating back to the seventeenth century and many case studies in between. The course will focus in particular on attitudes and behaviors related to sex, food, and physical fitness. Students will be invited to consider spiritual, medical, legal, and economic health initiatives that have shaped the parameters of human wellness. As students confront these "projects of the body," they will enrich their understanding of social theory and refine their critical capacities as consumers of, and participants in, the culture of bodies.

Social Construction of Whiteness PIATELLI, DEBORAH A
Fall 2020
This course explores the social construction of race through the lens of whiteness. By examining whiteness as both a race and historical system of privilege, students will gain a deeper understanding of the persistence of racism. We will examine the distribution of privilege within American society at both the interpersonal and institutional levels; as well as consider how whiteness operates within the social constructs of class and gender. Through writing and in- class group discussion, students will examine their own identities and consider how consciously or unconsciously they are affected by these processes, as well as consider strategies for challenging racism.

Consumption, Health, and the Environment OUIMETTE, MONIQUE
Fall 2020
There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Immigrant Experiences and the Family MILLAN OVANDO, DANIEL
Fall 2020
Migration processes shape the composition of families through separation and reunification. Importantly, immigration laws in the United States have centered on the family. However, immigration policies can also place families at risk of separation. This course will address the contemporary experiences of immigrants and their families, including family formation, detention/deportation, educational experiences, and labor. We will undertake a multi-method approach by encountering texts from researchers who draw upon survey, demographic, interview, and/or ethnographic data to analyze the role of immigration policies and practices on the experiences of immigrant families.

SOCY333401
Inequality and Education
MILLAN OVANDO, DANIEL
Fall 2020
Educational attainment has been framed as instrumental for upward mobility. However, educational spaces can reproduce inequality. This course will use an intersectional approach to consider the role of race, class, gender, and immigration status in the educational experiences of children from kindergarten through 12th grade and young adults in college. Quantitative approaches can highlight representative patterns in educational performance and attainment while qualitative approaches can provide a textured viewpoint in day-to-day educational experiences. We will draw on both to understand educational disparities and their short and long-term consequences.

SOCY334201
Faith and Conflict: Religion and Social Change in Latin American Societies MORELLO, GUSTAVO
Fall 2020
Liberalism was a major political influence in most of the new Latin American republics during the nineteenth century. During most of the twentieth century, the church stood itself against modernity and fought against progressive and liberal positions. However, during the Sixties, a very important renewal in theology took place in the church. This renewal had political consequences in Latin America, where wide portions of the faithful and clergy supported progressive theology. The seminar will study the progressive theological ideas and their impact in Latin America. We will frame this discussion in the debate about secularization and modernity in the continent.

SOCY335801
Gender and Sports KIM, KYOUNG-YIM
Fall 2020
This course uses sport to understand gender relations in a society. The course examines the ways that gender and intersections of race, class, and sexuality are produced by and within relations of power, and how normative definitions of gender and its intersections underpin normative practices in sport, health, and physical cultural contexts. Drawing on feminist scholarship, this course provides a critical insight into the history of gender relations, and how gender is used to reproduce and resist inequalities in sport, health, and physical culture.

SOCY336501
Human-Wildlife Conflicts and Co-existence KELLY, JENNIFER R
Fall 2020
This course introduces students to a wide spectrum of wild animal issues through an interactive and interdisciplinary lens. The course captures the diversity of both negative and positive interactions between humans and wildlife in rural and urban contexts. To highlight these different encounters, we will look at a range of ecosystems around the world including those in New England and Costa Rica. The course covers: the ecological, social and economic significance of species; the social and economic impacts of species in our backyards; how species are adapting to smaller spaces; and the increase in human-wildlife interactions. This course ensures that students gain more than a basic understanding of the topics discussed by working with an organization that focuses on wild animals, by encouraging students to reflect on the wild animals they encounter in their own communities, and in bringing their personal experiences to discussion forums. The discussions, service learning, case studies and examples allow for a deeply rich and applied understanding of the course themes. Human-Wildlife Conflicts and Co-existence provides an academic experience that is engaging, interdisciplinary, applied, personal, and inclusive, not just in terms of its accessibility and variety, but in terms of the multi-species perspectives it uncovers. Social Justice in Israel/Palestine SPANGLER, EVE
Fall 2020
This seminar provides the intellectual underpinnings for an immersion trip to Israel/Palestine in January. Students in this course must commit to the trip and, upon their return, to a project that uses the knowledge they gained in Israel/Palestine. The seminar will include a review of the Israeli and Palestinian history, an analysis of the contested theological claims to the land, and an examination of conflict resolving strategies focusing on cross-border groups operating in Israel/Palestine (e.g., Prime, Combatants for Peace, Parents Circle). Finally, we will consider possible economic futures for the area under both one and two state scenarios.

American Economic Crisis and Social Change DERBER, CHARLES
Fall 2020
This course offers a new way to think about America, focusing on our values, our intertwined economic and social crises exploding in the 2008 Wall Street meltdown, and systemic solutions. Our economic problems include growing poverty and inequality, a shrinking job market, and the failure of many of our industries and corporations to compete globally; our social crisis includes the growth of violence, family breakdown, global warming, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio- economic system.

Inside-Out: Perspectives on Crime, Corrections, and Justice DELSESTO, MATTHEW J
Fall 2020
This Inside-Out course is an opportunity for a group of students from Boston College and the Suffolk County House of Correction to exchange ideas and perceptions about crime, corrections, and justice. It is a chance for all participants to gain a deeper understanding of the United States criminal justice system through the marriage of theoretical knowledge and practical experience achieved in meetings throughout a semester. Topics include causes and definitions of crime, criminal justice institutions, myths and realities of prison life, experiences of crime victims, theories of punishment and rehabilitation, and the relationship between crime and community. Most sessions will meet at the Suffolk County House of Correction.

Internship in Sociology I JORGENSON, ANDREW K
Fall 2020
This internship program is designed for students who wish to acquire practical work experience in a human service, political, social research, or social policy agency--private or governmental, profit or nonprofit. Students have the primary responsibility of locating their own placement setting; however, both the instructor and the BC Internship Program Office in the Career Center can be of help. Students must meet with the instructor before registering to receive permission to register for the course, make sure that they will be available at the time the seminar will meet, and receive the details about the course and placements.

SOCY557001
Political Sociology KADIVAR, MOHAMMAD ALI
Fall 2020
An intensive examination of foundational texts representing pluralist, elite, and class theories of the state in industrialized capitalist democracies. The course includes lecture and seminar-style discussion of the historical dimensions of political sociology as well as its application to current areas of inquiry. After revealing its foundations, the course will explore how political sociology is used in studies on governmentality, globalization and state crises, and environmental history.
Students will be expected to participate in course discussions, provide weekly write-ups, and write a final paper.
Credits: 03

SOCY667001
Technology and Culture GRIFFITH, WILLIAM
Fall 2020
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.
Credits: 03
Room and Schedule: M 4 30-6 50;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

Regression Models for Categorical Data FAN, WEN
Fall 2020
This applied course is designed for students in sociology, education, nursing, organizational studies, political science, psychology, or social work with a prior background in statistics at the level of SOCY7703 Multivariate Statistics. It assumes a strong grounding in multivariate regression analysis. The major topics of the course will include OLS regression diagnostics, binary, ordered, and multinomial logistic regression, models for the analysis of count data (e.g., Poisson and negative binomial regression), treatment of missing data, and the analysis of clustered and stratified samples. Familiarity with Stata is required for this course.

SOCY771001
Social Inquiry Research Seminar SARKISIAN, NATALIA
Fall 2020
This course presents the wide range of alternative research methods available to and widely used by the social researcher. Among those considered are the following: survey research, observational field research, intensive interviewing, experimental research, historical analysis, and content analysis. Considerable attention will be given to comparisons among these alternative methods, to an assessment of the relative strengths and limitations of each, and to issues related to research design and proposal writing. In the context of these alternative research methods, attention will be given to problem formulation, measurement, reliability, validity, sampling, and ethical considerations.

Second Year Graduate Writing Seminar CHUANG, JULIA
Fall 2020
The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects. Students will be graded on the drafts of their research papers submitted at the end of the spring semester.
Credits: 03
Room and Schedule: BY ARRANGEMENT; **Satisfies Core**
Requirement: None **Prerequisites:** None
Corequisites: None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to
register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry.
Status: OPEN

SOCY776301
Topics in Environmental Sociology I SCHOR, JULIET
Fall 2020
This Ph.D.-level course is designed as both a stand-alone seminar and a follow-up to the Environmental Sociology seminar (SOCY5562). The seminar will focus on a set of identified topics in contemporary environmental sociology. Emphasis is placed on the reading and discussion of published empirical work.

Sociology Courses: Spring 2021

SOCY100101
Introductory Sociology OUIMETTE, MONIQUE
Spring 2021
This course conveys a sense of the history of sociology and introduces students to the most essential concepts, ideas, theories, and methods of the discipline. Special topics may include interaction in everyday life, sociology of the family, gender roles, race and ethnic relations, and the sociology of work, among others. We will deal with fundamental questions about what it means to be a human being living in a society at a given moment in history. Ordinarily, SOCY1001.01 is reserved for majors and minors. Note that Introductory Sociology is taught by different instructors; check each instructor's syllabus for a more exact description.
Credits: 03
Room and Schedule: CAMPION HALL 328,T TH 1 30*;HYBRID;
Satisfies Core Requirement: Social Science
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE
Comments: Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor.
Status: OPEN

SOCY100201
Introduction to Sociology for Healthcare Professions GOLDMAN, ALYSSA W
Spring 2021
This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

SOCY103001
Deviance and Social Control CARR, KYLE A
Spring 2021
This course explores the social construction of boundaries between the "normal" and the so- called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.
Credits: 03
Room and Schedule: ONLINE;ASYNCHRONOUS;
Satisfies Core Requirement: Cultural Diversity, Social Science

Social Problems UYAN, DENIZ
Spring 2021
This course is an exploration of different sociological approaches to the study of social problems and social trends in contemporary society. It examines the linkages between social structures/institutions, culture and human experience. The course emphasizes theoretical research issues, especially how, and to what degree, the understanding of social problems are a direct result of the processes used to define social problems as well as the research methods and procedures used to investigate them. Students will learn to critique popular discourses from a critical sociological perspective and will be encouraged to form their own opinions and critiques.

SOCY107101
Global Inequalities CHUANG, JULIA
Spring 2021
What is globalization and what are its consequences? This course examines the relationship between globalization and global inequality. This course is divided into four parts. First we ask: who are the beneficiaries of the outsourced economy? Second, we look at the emergence of a new global underclass. Third, we look specifically at the U.S., and ask what the decline of the American manufacturing base. Finally, we return to examine the movement of capital across the globe, and ask: what are the new risks of globalization in the face of systemic financial crises like the banking crisis of 2008?

Peace or War DERBER, CHARLES
Spring 2021
We analyze issues of war and peace before and after the Cold War, focusing on U.S. wars, largely in the Third World. In the first part of the course, we explore core theories of the roots of war. In the second part, we focus on the Cold War era, examining Vietnam, El Salvador, and other U.S. conflicts. In the third part, we focus on more recent wars: Iraq, Syria, the Israeli-Palestinian conflict, the "war on terrorism," as well as conflicts such as Rwanda and Sudan. The fourth section explores the United Nations, social activism among students, and other routes to peace.

SOCY150301
Understanding Race, Gender and Violence JOHNSON, MARILYNN; MCGUFFEY, CLIFTON S
Spring 2021
This course explores pressing problems of modern race and gender-based violence across the globe, including domestic violence, youth gangs, police violence, sexual assault, and genocide. Using both historical and sociological perspectives, we will examine the roots of such violence, the ways in which it has been expressed, the meanings attached to it, and its implications for society--particularly for racial/ethnic minorities, women, and LGBT people. The lab for the course will involve students in collaborative work with local anti-violence projects and organizations in the Boston area.

Consumer Culture: Past, Present and the Fate of the Planet SCHOR, JULIET; FLEMING, ROBIN
Spring 2021
Although we are increasingly aware that our habits of consumption affect the environment, it is hard to imagine that consuming patterns are capable of being changed. In this class, students will learn that practices of consumption are both socially and historically constructed, that they change dramatically over time, and that there are (and always have been) urgent moral issues connected to practices of consumption. We will explore the global, social, and environmental dimensions of consumption, studying things like the 1897 Sears catalog, 1950s television shows, Canada Goose jackets, DIY manuals and makerspaces, and hippy cookbooks of the 1960s.

SOCY172501
Who Are You? The Sociology of Self GROSS, NORA
Spring 2021
How do you answer the question of who you are? Are you your body, your IQ, your race, your gender, your personality, your social roles or relationships (e.g., student, sibling), where you grew up? These courses explore the science and sociology of the self. We will examine how the modern sciences have understood the self since the nineteenth century. Scientific knowledge has been used to quantify and compare human traits and make recommendations about how best to live, work, and play. It has also been deployed to reinforce social inequalities and stigmatize minority groups. Similarly, sociologists have theorized the ways people define themselves in relation to others, sort themselves into groups and construct social boundaries, and perform their identities. Sociological thinking also examines the role of institutions (like colleges) in both reproducing and disrupting unequal outcomes for various social groups.
Course topics will include racial and sexual science, the social construction of deviant identities, the self in relation to college life, and the self in the age of social media, self-care, and quarantine.
Credits: 03

SOCY200001
Oh my God! A Sociological Intro to Religion in the U.S. MORELLO, GUSTAVO
Spring 2021
This course presents you a basic sociological approach to religion in the United States. We ask what religion is, how it is present and influential in U.S. society, its interactions with ethnicity, gender, and American politics. We will focus on people's religious practices, and how religiosity influence their personal lives. This is not a class about U.S. religious history, or about a comparison of the main beliefs among different traditions. We will pay attention to historical developments and theological ideas, but our aim is to understand how do people live religion in their daily lives, and how that practices relates to other aspects of their social life.

Introduction to Feminisms MURPHY, ANNALYSSA G
Spring 2021
This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

Advanced Community Service Research Seminar II HAIDER, MAHEEN
Spring 2021
CRP is a two-semester program (SOCY2254 and SOCY2255) offering leadership, research, and public policy training for students interested in working with Latino, Asian American, and/or African Diaspora communities. In fall, students in SOCY2254 learn the process of community- based research and its methodologies, and begin to design a proposal for an independent study for spring. In spring, students sign up for SOCY2255 in conjunction with a Readings and Research to conduct their projects. The spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

SOCY225601
Gender, Sexuality, and Athletics KIM, KYOUNG-YIM
Spring 2021
This course aims to examine sport as a form of popular culture where ideas around gender, sexuality, and status in North American cultures are embodied and performed. In this course, we will discuss the significance of sports to ideas of the self and the body as well as in broader cultural, social, economic, and political realms. We will analyze a variety of issues including the relationships of sport and gender to some institutions like the government, media, business, religion, and education. We will chart changing conceptions of health, fitness, and the body as well as the relationship between technology and the body in sports. The role of celebrity and commercial media in producing sports as entertainment will be discussed. We will also investigate questions about the significance of sports and athletes to contemporary processes of globalization. The material in this course covers a broad array of topics and methodologies from anthropology, sociology, literature, kinesiology, and women's and gender studies. The interdisciplinary design encourages critical thinking about the complex ways that sports normalize ideologies of biological difference, capitalist competition, and essential inequalities between people. The course presents students of culture and society with some approaches in the study of social difference, inequality, and change. Throughout this course, students will be encouraged to think about how sports operate in their everyday lives and to apply concepts.

Language and Ethnicity THOMAS, MARGARET
Spring 2021
An examination of how we use language to regulate power relations among social groups and of how individuals define personal identity through speech. Case studies include: the linguistic representation of social class membership, dialect geography, Native Americans and U.S. language policy, the Ebonics controversy, and arguments for and against maintaining public language standards. Emphasis on the status of language and ethnicity in the United States, viewed in cross-cultural perspective.

Crime and Punishment GOLDMAN, ALYSSA W
Spring 2021
This course will examine major themes and insights in the areas of crime and criminal justice. The first half of the course will orient students with foundational theories of criminology, and review how these theories have informed recent empirical developments within the field. The second half of the course will focus on the American criminal justice system, with emphasis on how policy changes since the 1970s have driven an expansion in incarceration and other criminal justice sanctions in the United States, as well as the social consequences of such changes for individuals, families, and communities.

Genetics and Society HESSE-BIBER, SHARLENE
Spring 2021
This course is geared toward social science and humanities students as well as those in the sciences. We examine the rise of genetic knowledge and advanced biotechnologies and their consequences on society. We examine the historic and contemporary aspects of genetic research from the eugenics movement to the sequencing of the human genome. We provide a sociological lens focusing issues such as the ethics and science of genetics and genetic testing, genetic engineering, human cloning. We analyze the ethical, political, and economic impacts of genetic technologies. We delve into how genetic knowledge impacts concepts such as self, identity, disability, reproduction, and delinquency. We examine the nature versus nurture debate by analyzing the origins of sex differences, gender identity, and gender inequity.

SOCY322201
Closed on Sundays: Religious Change in Modern Societies MORELLO, GUSTAVO
Spring 2021
What is going on with religion in our world? How do we understand it? What is the role of religion in contemporary societies, if any? We will explore the current answers to these questions, and also devote time to reading the classics. We will explore what the 'Founding Fathers' of sociology (Marx, Durkheim, Weber, and Du Bois) had said about religion, and also study the main theoretical frameworks to understand religion from a sociological perspective: secularization and rational choice theories. Finally, we will debate new trends in understanding religion in our globalized societies. Students will gain knowledge on the classics of the sociology of religion, the main theoretical discussions, and the contemporary trends in the field. It will cover some theoretical and methodological perspectives, as well as research literature, and include different geographical and cultural region.

Consumption, Health, and the Environment OUIMETTE, MONIQUE
Spring 2021
There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and

analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Immigrant Experiences and the Family MILLAN OVANDO, DANIEL
Spring 2021
Migration processes shape the composition of families through separation and reunification. Importantly, immigration laws in the United States have centered on the family. However, immigration policies can also place families at risk of separation. This course will address the contemporary experiences of immigrants and their families, including family formation, detention/deportation, educational experiences, and labor. We will undertake a multi-method approach by encountering texts from researchers who draw upon survey, demographic, interview, and/or ethnographic data to analyze the role of immigration policies and practices on the experiences of immigrant families.

Masculinity, Sexuality, and Difference INGRAM, BRETT D
Spring 2021
This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about "acceptable" masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberating potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

American Economic Crisis and Social Change DERBER, CHARLES
Spring 2021
This course offers a new way to think about America, focusing on our values, our intertwined economic and social crises exploding in the 2008 Wall Street meltdown, and systemic solutions. Our economic problems include growing poverty and inequality, a shrinking job market, and the failure of many of our industries and corporations to compete globally; our social crisis includes the growth of violence, family breakdown, global warming, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio- economic system.

SOCY339101
Social Movements KADIVAR, MOHAMMAD ALI
Spring 2021
Social movements have played a major role historically, helping bring about much that is often taken for granted: democratic governance, chattel slavery's demise, women's suffrage, the 40- hour work week, and basic environmental regulations. Today, movements remain central to social change, but just as in the past, they are often denigrated, from the left and the right. This course critically surveys movements across time, space, and ideology, though we focus on the U.S., with particular attention to the modern climate justice movement and conservative countermovement. Students will learn concepts and tools from social movement theory while applying them experientially.

Environmental Sociology I KELLY, JENNIFER R
Spring 2021
This is a reading and discussion seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of theory and research that are national, international, and global in scope and research that is structural in orientation, with a key focus on how large-scale social institutions and organizational forms impact the environment, and also how they shape the ways in which individuals and smaller groups interact with the natural environment. Attention is also given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science.

Important Readings in Sociology SCHOR, JULIET
Spring 2021
Ordinarily, students will take this course during the spring of their junior year. The purpose of this seminar will be to read and discuss a series of books that are generally thought to be important contributions to the field. The books chosen will reflect a range of substantive issues, methodological approaches, and theoretical perspectives. The abiding question throughout this seminar class will be the following: What are the characteristics of powerful and compelling sociological work?

Interviewing Methods CHUANG, JULIA
Spring 2021
In this course, students will develop the necessary skills to conceptualize, plan, and execute interview-based research projects. We will go from formulating a research question, designing a rigorous research design, recruiting respondents, creating an interview guide, conducting interviews, and analyzing and writing up data. This is a practicum course: students are expected to

either collect interview data in tandem with the course or begin the course with interview data already collected and ready to analyze. We will workshop data, and we will consider various strategies for knitting together data with theory in order to produce analysis. Finally, we will also consider reflexivity, ethics, and the complexities of interviewing various populations. Students at all levels of the graduate student process are welcome, as course participants will be organized into working groups based on their project's current stage.

Craft of Ethnography CHUANG, JULIA
Spring 2021
This course introduces students to the craft of sociological ethnography. It has three components. In the first, students learn the basic techniques of three 'schools' of ethnography. In the second, students read ethnographies from each approach, seeking to understand which techniques led to the finished text. In the final and main course component, students will put these techniques to practice during the term, as they design and conduct a small-scale ethnographic research project, learning in the process the logistics of selecting a field site, recruiting informants, interviewing, recording and analyzing data.

Advanced Topics in Transnational Feminism HESSE-BIBER, SHARLENE
Spring 2021
Transnational feminism challenges the view of "global/international" feminisms that erases differences within and between nations. There is a tendency toward a Eurocentric/Colonial viewpoint that melds difference into one "feminist mold." Transnational Feminisms highlight the varying contexts of women's lives looking at multiple frameworks of difference. Transnational Feminists focus on the link between women's situated lives and the ever-changing relationships in which they are engaged in terms of movements of people, capital, and ideas. This course will challenge Western feminists to examine their own standpoint within a global system.

Technology and Culture GRIFFITH, WILLIAM
Spring 2021
This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

SOCY770301
Multivariate Statistics FAN, WEN
Spring 2021
Starting with the spring semester of 2018 this course will assume knowledge of the material covered in the current version of SOCY7702 and that includes (1) a solid background in Stata programing and (2) a recent course in basic statistics. We will be switching from SPSS used last year to Stata to be used this year. We will cover exploratory factor analysis, logistic regression, basic discriminant analysis, and multiple imputation to deal with missing data; but our focus, and more than 50% of the course, will deal with multiple regression and related issues and procedures including: data transformations, analysis of residuals and outliers, interaction terms, quadratic regression, dummy variables, analysis of covariance, stepwise regression, and path analysis. This course does not require knowledge of matrix algebra or calculus. Students who are advanced undergraduates or graduate students from other departments are welcome, but you must first get the written permission of the instructor.

SOCY771101
Empirical Research Seminar BABB, SARAH L
Spring 2021
This course guides graduate students through data collection and analysis, explores techniques and technologies of analysis and interpretation, and discusses research ethics arising in the process of data collection. The course has three components. First, students refine and revise their proposals from SOCY7710, complete IRB approval of their projects, and begin data collection and analysis. Second, students compile and begin to incorporate into their analysis a reading list that will constitute the basis of their literature review for this project. Third, students attend and submit written responses on the departmental seminar series and sessions with invited speakers across the university.
Credits: 03
Room and Schedule: F 9-11 30;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None

SOCY771601
Contemporary Social Theory MAGUBANE, ZINE
Spring 2021
This seminar is a graduate level introduction to contemporary social theory. It concerns the historical context and development of a wide variety of perspectives used by social theorists to make sense of multiple social worlds. It also concerns the ways in which social theories are themselves sociologically constructed. Theoretical frameworks addressed include: functionalism and cybernetics; symbolic interactionism and pragmatism; exchange, behavioral, and conflict perspectives; feminism; Marxism; phenomenology and ethnomethodology; critical race theory; queer theory; structuralism and poststructuralism; as well as postcolonial and postmodern theories of the subject and power.

SOCY776101
Second Year Graduate Writing Seminar CHUANG, JULIA
Spring 2021
The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects. Students will be graded on the drafts of their research papers submitted at the end of the spring semester.
Credits: 03
Room and Schedule: T 4 30*;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: None
Prerequisites: None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually
Student Level: GRADUATE
Comments: This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry.

ARTS111501
Imagination and Creativity in Irish Landscapes IVY, CANDICE M
Summer 2020
This hands-on study abroad course is open to students of all levels of artistic background and areas of concentration. This course comprises a uniquely immersive and field-based study at the Burren College of Art--based within the renovated remains of a sixteenth-century castle on the west coast of Ireland. The surrounding landscape is the Burren, a one-of-a-kind ecological land mass of limestone, formed under an ancient ocean, and fostering ecosystems containing flora and fauna unique to the area. Culturally, the region is home to numerous unearthed remains of historical dwellings, tombs, and artifacts, which further sculpt the terrain. Through individual and collaborative creative projects using a variety of media, students use the terrain to investigate, question and expand upon firsthand observation and analysis of relationships between cultural and natural systems. Course content will consist of trips to regional sites, field based research, creative workshops, lectures and art production supported by local ecologists, artists, story-tellers and historians.
Credits: 03
Room and Schedule: MAY 16 - JUN 13; **Satisfies Core Requirement:** Arts **Prerequisites:** None

ARTS225001
Introduction to Graphic Design REEVES, BRIAN A
Summer 2020
This course is an immersive project-based introductory overview of concepts, contexts, tools, and techniques useful in solving a wide range of contemporary design problems,

including logos, business cards, propaganda posters, multi-page documents, data visualizations, web page designs, app wireframes, and proposals for site-specific graphics. Beyond the necessary focus on software, including Adobe InDesign, Illustrator, and Photoshop, the course will incorporate discussion and application of typography, color theory and other 2D design concepts affecting how subject matter is perceived. Students will solve problems on behalf of themselves and choose one or more other clients whom they'll strive to serve.

Issues and Approaches to Studio Art GALLAGHER, SHEILA E
Fall 2020

This course is intended for Studio Majors and Minors and serious students with previous studio experience. This course enables students to develop skills and ideas by exploring objective, subjective, and conceptual approaches to a variety of media. Practical exercises include live models, scenarios, memory, and imagination. Students develop skills and confidence by exploring a variety of ideas and techniques in preparation for a more individually directed approach in subsequent courses. Discussions and group or individual critiques develop students' critical and analytical skills and provide an open forum for students to bring questions and problems for exploration.

ARTS110401
Design: Seeing Is Believing REISS, PAUL V
Fall 2020
Seeing is Believing is a hands-on class that will help open the door to the mystery behind effective and engaging visual decision making. Do you find yourself using ambiguous gut feelings to make something that looks "good" without applying meaningful criteria? Using a variety of approaches and materials including photography, charcoal, and collage, assignments, exercises, and field trips are designed to strengthen visual acuity and the ability to communicate dynamically and creatively. This class is designed for both advanced and entry-level students with 2-D and 3-D assignments providing enough flexibility to meet each student at whatever level they are.

ARTS110701
Design I: Foundations REEVES, BRIAN A
Fall 2020
This foundation course is structured to introduce students to the fundamental issues of design by providing a basis for regarding our environment and organizing what we see into a coherent whole. We will learn how to process our surrounding visual information primarily through the exercise of drawing. In the process of learning a new visual language, we will emphasize discovery of personal attitudes and approaches rather than on the techniques of the finished work. Students will be introduced to the process of design through the exploration of the basic concepts of the elements and principles of design, historical approaches, and skills involved in design.

Room and Schedule: M 9-12;ONLINE;SYNCHRONOUS;
Satisfies Core Requirement: Arts **Prerequisites:** None **Corequisites:** None **Cross-listed with:** None **Frequency:** Annually **Student Level:** CORE **Comments:** None **Status:** OPEN

ARTS110901
Design is Human BURNS, JENNIFER L
Fall 2020
"Design" today is buzzed about in fields as diverse as business, medicine, and engineering. But if design can mean everything from the swoosh on a shoe to preparing coastal cities for sea-level rise, how do we comprehend this elastic concept? Considering specific examples from graphic, fashion, and product design, studying the shaping of place by architects, planners and infrastructure engineers, and finally exploring the virtual worlds of gaming, the internet and social media, this introductory course critically surveys design practices from the late-nineteenth to early-twenty-first century to understand what design has promised, what it delivered, and what it could still become.

Fall 2020
Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

ARTS114101
Ceramics I COOPER, MARK
Fall 2020
This course will deal with all phases of ceramics from slab construction to bowl making and a good deal of effort will go into considering a variety of sculptural possibilities at a foundation level. This course covers the broadest range of ceramic techniques and information. The emphasis in the second semester will be on combining the various techniques and concepts acquired previously into a working order, as well as an exposure to additional technical and conceptual information. Those students starting ceramics in second semester will be given individual assistance in beginning techniques.

ARTS114501
Ceramics/Mixed Media Sculpture COOPER, MARK
Fall 2020
Ceramics/Mixed Media Sculpture is a course that will focus on the development of ideas to be expressed through ceramics and mixed media. Students will be introduced to a range of approaches both conceptually and technically throughout the class. The course will address the individual ideas and concerns of each student allowing for a wide range of approaches, materials, and scale. This could include anything from very small-scale sculptural objects to installations and large public scale projects to be created in modular units. This course does not require previous experience. Students will be introduced to working methodologies that match their previous knowledge while introducing new approaches.

ARTS116101
Photography I KESSLER, LISA H
Fall 2020
This class explores the concepts, techniques, and language of photography via the use of contemporary digital technologies. Through lectures, class instruction, assignments and critiques, students will develop visual literacy, proficiency with the digital SLR camera, and an understanding of the fundamentals of photography and Photoshop. We will be looking at trends in contemporary photography and referencing its history to create a full picture of the medium. Students will be introduced to a well-structured workflow for the capture, upload, organization, selection, post-processing, and export of the digital photograph. Students will have multiple photographing assignments and critiques designed to build visual, technical and conceptual skills, and will produce a final portfolio of sequenced or thematic imagery. This course introduces the fundamental principles of photography and its history for universal applications and is available to all majors. Students will need to have a DSLR or mirrorless camera with manual controls that captures RAW files of at least 10 megapixels. This course requires no previous photography experience. It DOES NOT fulfill a CORE Arts requirement.

ARTS220601
The Art of Portraiture CHONG, SAMMY
Fall 2020
This drawing course focuses on the genre of portraiture, both in theory and in practice. The Mona Lisa, carnival portraits, and everything in between they all share the same initial approach to the figure. We will first hone in on the structure of the head. From there, we will use value, shapes, and color to create strong portraits with charcoal, gouache, and watercolor pencils.
Along with traditional methods we will explore contemporary approaches to portraiture, with differing uses of format, composition, and color schemes.

ARTS220701
Urban Design for Complexity and Sustainability LITTELL, MATTHEW
Fall 2020
The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

ARTS223001
Introduction to Video Art HOELTERMANN, JANNE
Fall 2020
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue

ARTS110302
Issues and Approaches to Studio Art GALLAGHER, SHEILA E
Spring 2021
This course is intended for Studio Majors and Minors and serious students with previous studio experience. This course enables students to develop skills and ideas by exploring objective, subjective, and conceptual approaches to a variety of media. Practical exercises include live models, scenarios, memory, and imagination. Students develop skills and confidence by exploring a variety of ideas and techniques in preparation for a more individually directed approach in subsequent courses. Discussions and group or individual critiques develop students' critical and analytical skills and provide an open forum for students to bring questions and problems for exploration.

ARTS110501
Making Prints/Making Books: An Introduction to Printmaking and Book Arts STIGLIANO, STEPHANIE
Spring 2021
In this course, students will be introduced to the world of printmaking and book arts through practical, hands-on assignments. Students will learn to make relief prints, and will leave the class with a book designed from their prints. Art in book form tells a story with words, images, structure, and material. The developmental process of making a print is akin to the building of a narrative. Both of these graphic arts have existed in tandem throughout history. They are ways to communicate ideas to a broader public, so it makes sense to explore them together in the classroom. Students who are just learning to draw and accomplished draftsmen can both benefit from making prints and books. Each assignment will balance technical, conceptual, and formal goals. We will discuss the design basics of line, shape, texture, light and shadow, space, and composition. The printmakers will create series, sequences, and variations on a theme. We will look at books and prints from different eras and cultures, and take advantage of the college's numerous collections. There will be written components, such as an observational response to a single print and a reflection on an individual book work. The students will present their artwork as the focus of group discussion and critique. Additionally, they will receive individual feedback during each class meeting.

ARTS110901
Design is Human BURNS, JENNIFER L
Spring 2021
"Design" today is buzzed about in fields as diverse as business, medicine, and engineering. But if design can mean everything from the swoosh on a shoe to preparing coastal cities for sea-level rise, how do we comprehend this elastic concept? Considering specific examples from graphic, fashion, and product design, studying the shaping of place by architects, planners and infrastructure engineers, and finally exploring the virtual worlds of gaming, the internet and social media, this introductory course critically surveys design practices from the late-nineteenth to early-twenty-first century to understand what design has promised, what it delivered, and what it could still become.

ARTS112501
Innovation through Design Thinking RUTIRASIRI, CHOKDEE R
Spring 2021
Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

ARTS116101
Photography I MULDOWNEY, GREER R
Spring 2021
This class explores the concepts, techniques, and language of photography via the use of contemporary digital technologies. Through lectures, class instruction, assignments and critiques, students will develop visual literacy, proficiency with the digital SLR camera, and an understanding of the fundamentals of photography and Photoshop. We will be looking at trends in contemporary photography and referencing its history to create a full picture of the medium. Students will be introduced to a well-structured workflow for the capture, upload, organization, selection, post-processing, and export of the digital photograph. Students will have multiple photographing assignments and critiques designed to build visual, technical and conceptual skills, and will produce a final portfolio of sequenced or thematic imagery. This course introduces the fundamental principles of photography and its history for universal applications and is available to all majors. Students will need to have a DSLR or mirrorless camera with manual controls that captures RAW files of at least 10 megapixels. This course requires no previous photography experience. It DOES NOT fulfill a CORE Arts requirement.

ARTS220801
Drawing the Figure (Drawing II): Observation to Expression CHONG, SAMMY
Spring 2021
Together we will venture into a world of the body as represented through drawing materials on 2D surfaces. You will learn techniques and approaches to drawing the figure and will work in the studio from a live model. Simultaneously, you will examine the relationship between cultural philosophies and their effects on the figurative representations they produced. Studio work include: drawing the body; revise those ideas; developing finished drawings; researching historical and contemporary innovations and doing creative copies of these master works; working from memory and contextualized imagination; translate sensory experience through the representations of the body.

ARTS222301
Intermediate Painting III AUSTEN, HARTMUT
Spring 2021
The course reviews and expands on the fundamental painting skills and materials acquired in Painting 1. Students continue to work on assigned and individual projects that highlight historical and contemporary methods and concepts of the discipline. Projects are mostly based on work from direct observation, but some will use found images, memory, and imagination as sources to promote visual judgment and development of a more personal direction. Exhibition visits, illustrated presentations, and a writing assignment are supplementing the program.

ARTS222401
Bare Naked Approaches to Painting the Figure-Painting III CHONG, SAMMY
Spring 2021
This course is an introduction to the human body as a form and as a subject for creating paintings. The course will introduce the student to portraiture and full figure painting, using both the student and in class models as the subject. The student will be introduced to a variety of painting styles and techniques through side presentations and assigned projects. This is an intermediate/advanced level course and the student will be encouraged to focus on personal imagery and style while maintaining a concentration on representational painting.

ARTS223010
Introduction to Video Art HOELTERMANN, JANNE
Spring 2021
Introduction to Video Art is an Art course examining video as a medium for artistic expression and conceptual inquiry. How can we use video to ask questions about ourselves, our viewers, or our world? Responding to instruction about video, sound, and editing techniques, students produce multiple assignment based video art pieces and a self-designed final project. Class sessions are comprised of screenings, discussions, technical demonstrations, and group critiques of students' projects. Screenings and readings cover a variety of topics, including: past and present video art, experimental/expanded cinema, performance art, art in the age of digital culture, and philosophical and sociological topics. Readings, screenings, and discussions are designed to provide a conceptual basis for students' video art projects, while critiques and writing assignments provide a forum for dialogue

ARTS330601
Alternative Approaches in Drawing AUSTEN, HARTMUT
Spring 2021
Fresh ideas and approaches to drawing are essential for the creative development of a department and its students. This class will explore both traditional and new conceptions of what drawing can be. We will conduct our investigation using traditional materials as well as new media in the service of crossing and pushing established boundaries. Utilizing and deepening our understanding of "mark-making," we will further explore drawing's breath and expanse across disciplines as well as its potential to expand on the what it means to "draw from observation."
Credits: 03
Room and Schedule: DEVLIN HALL 413,T 9-12;DEVLIN 406&408;
Satisfies Core Requirement: None
Prerequisites: Two previous studio classes (one in drawing) or permission of instructor.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically

ARTS332801
Senior Minor Project AUSTEN, HARTMUT
Spring 2021
This course comprises hands-on studio work and readings that address contemporary issues in the visual arts. It is an upper level class for those with a serious interest in art making and visual thinking. Students are expected to work in a medium of their choice with which they are familiar. Studio assignments will be developed out of the issues explored in the readings.
Students are expected to produce a body of studio work and to make an oral presentation that situates their work in relation to the topics under investigation.
Credits: 03
Room and Schedule: DEVLIN HALL 413,W 2-5;DEVLIN 413&425;
Satisfies Core Requirement: None **Prerequisites:** Required for Studio Art Minor. **Corequisites:** None
Cross-listed with: None
Frequency: Annually
Student Level: UNDERGRAD ELECT
Comments: This course is limited to Studio Art Minors in their senior year or by permission of the instructor.

ARTS333501
Advanced Digital Design: Designing Spaces DEPT
Spring 2021
This course explores the possibilities of using 3D modeling software to design and describe 3D spaces and objects. Beginning with a solid foundation in the principles of architectural drawing and 3D modeling, students will develop their spatial design skills and build software proficiency in parallel through creative projects, readings, and short essays. Students will draw on their personal experiences of the built environment to create new 3D works. Key course concepts will be drawn primarily from the fields of architecture and sculpture, with additional materials from the fields of art and architectural history, photography, industrial design, and graphic design.
This course provides an opportunity for upper-level art students interested in design to create a large amount of portfolio-quality work, and final projects are student-driven. Students should have a working knowledge of the Adobe Creative Suite before taking this course.
Credits: 03
Room and Schedule: None
Satisfies Core Requirement: None
Prerequisites: (ARTS2250 OR ARTS2276). Or permission of the Instructor. Adobe Creative Suite knowledge.
Corequisites: None **Cross-listed with:** None **Frequency:** Periodically
Student Level: UNDERGRAD ELECT
Comments: Preference will be given to majors and minors in Studio Art.
Status: CANCELLED

ARTS336101
Intermediate Photography: Conceptual and Studio MULDOWNEY, GREER R
Spring 2021
This production course explores the potential of the photographic medium through both color and black and white pictures. Working with current photographic digital imaging technology and techniques, students will advance their skills in digital-image capture and high-quality output as well as analog printing. Lectures and assignments will concentrate on both traditional photographic-based picture making and digital technologies. Students will be expected to develop their own project ideas and to work in series. This course requires additional work outside of class time.

Theatre Courses: Summer 2020

THTR117001
Introduction to Theatre CRONIN, BRIAN P
Summer 2020
This is a survey course for primarily non-majors. Its aim is to impart an appreciation of the theatre as an artistic and humanizing experience. There will be discussion of the various elements that contribute to the development of theatre as a specialized art form including historical and cultural influences, staging styles and techniques, and the multiple genres of dramatic writing. Several plays illustrating the above will be read and attendance at selected performances is required.

Theatre Courses: Fall 2020

THTR101101
Theatre Production Lab I: Scenery Run SWIFT, RUSSELL L
Fall 2020
The Theatre Production Run Labs will introduce students to the skills necessary to rehearse and perform the technical duties needed to produce a stage production. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production related to scene shifting, prop running, rigging, and performance needs. Students will work on a departmental production during the semester. The work that students do on that production will vary by student and will be determined by the needs of the production and may evolve during rehearsal. Students may do multiple labs in a semester but they must be in different areas.

THTR102701
Theatre Production Lab II: Dramaturgy LANG, THERESA
Fall 2020
The course will be based on the practical application of Dramaturgy Basics: THTR2240. The major emphasis is on the practice and application of the art and science of dramaturgy.
Students will apply the knowledge of Dramaturgy Basics to a Theatre Department production. Students will implement typical dramaturgical tasks and receive guidance and feedback on their execution. More importantly, the lab will frame the dramaturgical point of view so students will be able to effectively navigate the role in production. Over the course of the semester students will work on: Script selection and analysis, production dramaturgical research and response, in rehearsal practice and protocol, audience contact, program notes, lobby display and talk backs, new play development, building a theatrical season, and civic engagement.

THTR103901
Theatre Production Lab III: Assistant Stage Manager TRAUB, ADELE N
Fall 2020
Every department production has two or more assistant stage managers. These students help the stage manager to run rehearsals and are in charge of backstage

during performances. ASMs must be at many of the regular rehearsals and at all of the technical and dress rehearsals and performances for the show that they are assigned. ASMing counts as a one credit lab. While it takes a little more time than other labs, you learn how all the theatrical pieces of a show fit together. This lab requires department permission; however, there are no majors only restrictions and no experience is necessary to assistant stage manage a show.

THTR104101
Advanced Production Lab: Scenic Design TIALA, CRYSTAL
Fall 2020
Students who have taken Stage Design may apply with the instructor to design a Theatre Department workshop production the following academic year. Students will work in teams of undergraduate designers and directors. All work is mentored by the Theatre faculty. This counts two credits toward production labs for majors. You do not need to be a major to apply.

THTR104901
Advanced Production Lab: Stage Manager TRAUB, ADELE N
Fall 2020
Once students gain experience as an assistant stage manager, they may advance to the two credit Stage Management lab. The stage manager works alongside the director on a production and is in charge of organizing rehearsals, communicating with the production team, and running performances. Stage managers plan each rehearsal with the director, create rehearsal schedules, keep track of blocking, costume and prop needs, and distribute rehearsal reports to theatre staff and designers. Stage managers are assigned at the end of the previous academic school year to stage manage one of the six Theatre Department productions. This lab requires department permission and significant production experience. Stage managers at BC work alongside students and professionals alike and are considered leaders within the department.

THTR110301
Acting I: Fundamentals of Performance SHEA, JEROME E
Fall 2020
Acting I trains students to acquire the essential skills of an actor: vocal and physical exercises to free the body and voice; improvisation and ensemble exercises to encourage creativity, to free one's imagination, and to release emotional spontaneity; and monologue and/or scene work to learn about the crafting and performance process of the actor. This is required for Theatre majors and minors, but others are also welcome. Contact the professor of the section for permission to enroll.
